Social Geographies Of Educational Change:

Social Geographies of Educational Change F. Hernandez, I.F. Goodson, 2004-10-11 Social Geographies as spatial location is a factor relevant to understanding the variety of people's interpretations and appropriations of educational innovations and changes. Their location in the social space also influences their response to change. In the field of educational change, social space means, for example, skin colour, gender, distribution of teachers in one school, children's self-cultural representations or parents' religious attitudes. By using the notion of Social Geographies in the context of educational change, the authors address the following questions: How initiatives in a classroom or department are influenced by the surrounding context of the school, the district or the nation? How innovation spreads or diffuses from one school to another? How and whether reforms can be scaled up from a few schools to a whole system? How seemingly standardised reforms affect schools differently depending on where they are located? How schools influence one another? How the identities of and interrelationships among schools are affected by technology, principles of market competition and choice, and other initiatives? This volume is relevant to educationalists, policy makers, teachers and students interested in a more complex approach to understand and intervene in educational change processes.

that have been brought about by social change and shifting contexts of educational reform Like the first best selling Handbook this one will also undoubtedly become an essential resource for people involved in all spheres of education from classroom teachers teacher leaders and administrators to educational researchers curriculum developers and university professors No other work provides such a wide ranging and comprehensive examination of the field of educational change

Leading Educational Change Wisely Christopher M. Branson, 2010-01-01 Despite over 40 years of research and writing about how to lead educational change we still can't get it right Although we keep fine tuning our present ways we are yet to come up with an approach that enables educational change to happen successfully and sustainably Although this book acknowledges the importance of learning from our past it also highlights a key deficiency that has consistently compromised these efforts To date our approach to leading educational change has mainly focussed on trying to come up with the perfect practical strategy or plan In contrast this book argues that leading educational change successfully is not about following a clearly defined process like following a recipe but it is an improvisational art more like driving down a busy main street during peak hour traffic The successful leadership of educational change is an improvisational art because although the leader needs to have an overarching strategy a guiding plan what they actually do from moment to moment cannot be scripted The leader has to move back and forth from their plan to the reality currently being experienced so that the plan is being achieved but any adverse effects on those involved are being empathically and immediately attended to as well This approach to the leadership of educational change emphasises the need of the leader to be able to cope with the unforeseen the unexpected and the idiosyncratic Moreover this approach to the leadership of educational change emphasises the relational as well as the rational requirements While such views might be familiar to many what is new and unique about this book is that it describes how it all can be achieved It provides clear research supported guidance for those who wish to finally lead successful and sustainable educational change

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth

and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Whole School Approaches to Sustainability Arjen E.J. Wals, Birgitte Bjønness, Astrid Sinnes, Ingrid Eikeland, 2024-06-22 In response to urgent global sustainability challenges Education for Sustainable Development ESD and Global Citizenship Education have been prioritized in the United Nations Agenda 2030 under SDG 4 7 There is a growing awareness that treating concepts such as global citizenship sustainable development climate urgency and health and well being as separate subjects or topics to be added to a curriculum is ineffective as they are highly interconnected Additionally this approach is problematic as schools already have an overcrowded curriculum This edited volume brings together a range of scholars and reflective practitioners from across the globe who are investigating and enacting a whole school approach WSA in education for sustainability While the WSA and related approaches such as those advocated by EcoSchools are becoming more popular there is a lack of understanding of their underlying principles and the different manifestations in diverging socio cultural contexts at different educational levels This collection of chapters provides a deeper understanding of the WSA while also addressing its effectiveness possibilities for upscaling professional development needs for WSA practitioners interlinkages with more conventional curriculum requirements expectations of students and parents and more This is an open access book
