Their territory has roughly the shape of a thirty-kilometre-wide square. A minimum of one-and-a-half day's walk is necessary to cover the distance separating Ankave land from the nearest road, airstrip, school, shop, or health centre. The altitude of Ankave land, which is entirely covered with forests, except for patches of permanent grassland where hamlets have been established for many generations, varies between 600 and 2,300 metres.

The vegetal world is of key importance in Ankave daily life. It provides the bulk of their food, and most of the raw materials they need for technical activities. The gardens produce mainly tubers, bananas and sugar cane. An important complement to the diet comes from the seasonal fruits and nuts of trees grown spontaneously, or deliberately maintained and planted, in particular the red pandanus and the

universities Entangled and Empowered finds hope in the shadow of despair It engages with work by Anna Lowenhaupt Tsing on entanglement Donna Haraway on kin making and multispecies communities and Karen Barad on intra actions among others while also showing how critiques of these ideas can make the world both more promising and more endangered This collection will be useful for scholars working in all subfields of environmental humanities especially those intersecting with the theories described above and as an archive of examples analyzing practical aspects of agency in diverse multispecies communities Scholars studying texts as well known as The Handmaid s Tale and as obscure as the codices of the Mopan Maya will find value in having both under one cover
