Social Psychology An Attributional Approach:

Social Psychology John H. Harvey, William P. Smith, 1977 **Social Psychology : an Attributional Approach** J. H. Harvey, 1977 **Handbook of Social Psychology: Theory and method** Gardner Lindzey, Elliot Aronson, 1985 **An Attributional Theory of Motivation and Emotion** Bernard Weiner, 2012-12-06 For a long time I have had the gnawing desire to convey the broad motivational significance of the attributional conception that I have espoused and to present fully the argument that this framework has earned a rightful place alongside other leading theories of motivation Furthermore recent investigations have yielded insights into the attributional determinants of affect thus providing the impetus to embark upon a detailed discussion of emotion and to elucidate the relation between emotion and motivation from an attributional perspective The presentation of a unified theory of motivation and emotion is the goal of this book My more specific aims in the chapters to follow are to 1 Outline the basic principles that I believe characterize an adequate theory of motivation 2 Convey what I perceive to be the conceptual contributions of the perspective advocated by my colleagues and me 3 Summarize the empirical relations reach some definitive conclusions and point out the more equivocal empirical associations based on hypotheses derived from our particular attribution theory and 4 Clarify questions that have been raised about this conception and provide new material for still further scrutiny In so doing the building blocks if any laid down by the attributional conception will be readily identified and unknown queries of present and future peers can then better determine the value of this scientific product **Social Psychological Approaches to Responsibility and Justice** V. Lee Hamilton, 1992 **Blackwell Handbook of Social Psychology** Abraham Tesser, Norbert Schwarz, 2008-04-15 This volume on intraindividual processes is one of a set of four handbooks in the social psychology field and covers social cognition attitudes and attribution theory Includes contributions by academics and other experts from around the world to ensure a truly international perspective Provides a comprehensive overview of classic and current research and likely future trends Fully referenced chapters and bibliographies allow easy access to further study Now available in full text online via xreferplus the award winning reference library on the web from xrefer For more information visit www.xreferplus.com

Motivation - Mechanisms of the Mind and their Quest for Expression Menno A. Mennes, 2025-10-01 This volume presents a first introduction to a thought provoking Model of Motivation developed by Menno Mennes over a period of almost thirty years The Model of Motivation in its approach presents a radical departure from everything that has appeared so far in literature on the subject And yet it provides a surprisingly detailed account of how motivation works which appears to be supported by findings from theories and research from current literature In an unparalleled analysis the Model seamlessly integrates these major theories into a consistent comprehensive approach to motivation explaining not only the essentials of each theory but also providing explanations for controversies that have hitherto remained largely unresolved Motivation appears to be an inner dialogue a stepwise partly cyclical Process in which we deal with our surroundings that often interfere

Self-Handicapping Raymond L. Higgins,C.R. Snyder,Steven Berglas,2013-11-11 The concept of self handicapping can be legitimately anchored in a variety of intellectual contexts some old and some newer As this volume reminds us Alfred Adler was perhaps the first to articulate the significance of various self defeating claims and gestures for protecting the self concept Thus the apparent paradox of defeat in the interests of protection More recently but still more than 30 years ago Heider s naive psychology added attributional rhetoric to the description of self defeating strategies While predominantly cognitive in its thrust the attributional approach incorporated several motivational influences especially those involving egocentric concerns Heider hardly violated our common sense when he suggested that people are inclined to attribute their performances in a self serving manner the good things I caused the bad things were forced upon me The notion of self handicapping strategies proposed by Berglas and myself a little more than a decade ago capitalized on these homely truths while adding a particular proactive twist We not only make excuses for our blunders we plan our engagements and our

situational choices so that self protective excuses are unnecessary In doing so we use our attributional understanding to arrange things so that flawed and failing performances will not be interpreted in ways that threaten our self esteem
