Bodies Sarah Kay, Miri Rubin, 1996 In this book available at last in paperback Kauppi develops a structural constructivist theory of the European Union and critically analyses through French and Finnish empirical cases the political practices that maintain the Union's democratic deficit Kauppi conceptualises the European Union as both an arena for political contention and a nascent political order In this evolving multi levelled European political field individuals and groups construct material and symbolic structures of political power grounded in a variety of social resources such as nationality culture and gender The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy Supranational executive networks have become more autonomous reinforcing the dominance of the resources they control At the same time national political cultures condition the political status of elected institutions such as the European parliament The book is particularly suited for undergraduate and graduate students in the fields of European Politics European Union Studies and International Relations **American Book Publishing Record**
