The idea was that this formula and direction would yield novel information and fresh insights. The Hospitalized Child Psychosocial Issues is a comprehensive abstracted bibliography focusing on the behavioral and developmental consequences of short term long term or recurrent hospitalization during childhood and adolescence. Publications are included which identify potential problems of hospitalization coping mechanisms of patients parents and staff and possible solutions. For example the articles covered in this volume discuss the trauma which may result from the child's separation from mother family peers anxiety over medical procedures unfamiliarity of the hospital environment absence from school restrictions on physical activity forced dependency and concerns over body image. The search for solutions to adaptation difficulties often results in the creation of new hospital programs. These too are reviewed in this bibliography. Examples include child life programs the care by parent units foster grandparent surrogate mother programs and hospital or surgical orientation programs. New therapeutic approaches have been attempted in a hospital setting including bibliotherapy puppet therapy play therapy and mutual story telling techniques. Each of these

innovations is represented in the bibliography Further hospital redesign schemes are reviewed including the feasibility of separate adolescent wards And finally modification of hospital policy has been examined including establishment of liberal visiting privileges parent rooming in day v vi PREFACE surgery and improved communication between patient parent and hospital staff
