U.S. Social Security Steven G. Livingston, 2008-05-16 This handbook is a one stop forum for nonpartisan discussion of the major proposals for addressing Social Security's coming financial crisis. This timely volume details the history and development of the American system of Social Security and examines the serious problems it faces. It covers the prehistory of Social Security dating back to the 19th century and projects the program's likely future over the next several generations. Thematically the book chronicles the origination of the initial Social Security Act of 1935, each major reform to the act through today, the nature and magnitude of the current difficulty facing Social Security and each major remedy that has been proposed. It also examines programs in other nations and how they have attempted to address similar problems. This handbook is essential reading for anyone trying to understand how this vital program evolved and where it could be going.

*Essays On Surviving COVID-19 and Beyond* Dr. Jules Mitchel,2022-12-14 This book is a culmination of thoughts and

reflections triggered by the initial devastating wave of deaths from COVID 19 together with the mishandling of the responses and the manifestation of human fantasies all of which were quite similar to what occurred during the Spanish flu pandemic at the time of World War I Research on the history of plagues wars tyrants and human behavior reinforced that there was nothing new under the sun As a biologist with an interest in evolutionary biology I was curious to see if there were any insights we could learn from other species but especially how mammals deal with behaviors such as competition cooperation empathy and altruism I discovered not only the well known survival differences between the bonobo and chimpanzee but also how totally unrelated species can work together for the common good One example is how the honeyguide bird in Africa helps humans find beehives and then how the honeyguide bird eats the leftovers It also has become clear for humans to reflect that based on the complexity of societies and living organisms in general there are no simple solutions to the survival of any species However one thing is clear only through cooperation empathy and acts of altruism like firefighters entering a burning building soldiers confronting the enemy and police protecting our schools will the human species be able to live in harmony Also only by confronting selfish greedy autocracies plutocracies and kleptocracies will the human species be able to survive on planet Earth
