Socialist Network:

The Socialist Network Nesta Helen Webster, 1926 The object of this book is not to provide a history of Socialism but merely an account of the Socialist organizations of modern times It gives accounts of persons connected with or giving rise to concrete societies or groups Contents origins of modern Socialism Marxian Socialism prewar period anarchism and syndicalism the war and pacifism Russian revolution world Bolshevism Bolshevism in Great Britain capture of trade unionism Bolshevisation of British trade unionism subsidiary Communist organizations pacifism postwar youth movements Socialism and Christianity Inhuman Networks Grant Bollmer, 2016-08-11 Social media's connectivity is often thought to be a

manifestation of human nature buried until now revealed only through the diverse technologies of the participatory internet Rather than embrace this view *Inhuman Networks* Social Media and the Archaeology of Connection argues that the human nature revealed by social media imagines network technology and data as models for behavior online Covering a wide range of historical and interdisciplinary subjects Grant Bollmer examines the emergence of the network as a model for relation in the 1700s and 1800s and follows it through marginal often forgotten articulations of technology biology economics and the social From this history Bollmer examines contemporary controversies surrounding social media extending out to the influence of network models on issues of critical theory politics popular science and neoliberalism By moving through the past and present of network media *Inhuman Networks* demonstrates how contemporary network culture unintentionally repeats debates over the limits of Western modernity to provide an idealized future where the human is interchangeable with abstract flowing data connected through well managed distributed networks **The Post-Socialist Internet** Migue

Bareikyte, 2022-01-05 How is the Internet produced as an infrastructure in post socialist Lithuania Migue Bareikyte contributes to the growing field of STS and media studies with a distinct focus on Eastern Europe She situates the Internet development in Lithuania's telecom industry with the exploration of its labor practices geopolitical imaginaries and critical negotiations from a bottom up perspective Bareikyte further explores how fieldwork based research can foster new theorizations of media infrastructures Finally she argues for a situated investigation of new places and actors beyond the United States and Western Europe such as post socialist regions in order to explore the diversity of media infrastructures

Transnational Socialist Networks in the 1970s Christian Salm, 2016-04-08 *Transnational Socialist Networks in the 1970s* argues that western European socialist parties transnational cooperation across national borders significantly influenced politics and policy making in what was the European Communities EC It focuses on the network like informal structures that characterised transnational cooperation between the party members and leaders of different socialist parties involved in European affairs Taking the example of two case studies namely EC development aid policy and EC southern enlargement policy the book demonstrates that the socialist parties strengthened their informal transnational network structures for the purposes of debating ideological and programmatic issues and finding policy solutions to common challenges in both policy

fields Moreover it shows that the networks developed various functions to influence European governance Against this background the analysis in this book makes not only a significant contribution to the study of transnational networks of western European socialist parties and the history of European integration but also adds to the understanding of the role of transnational networks in European politics and policy making

Leftist Internationalisms Michele Di Donato, Mathieu Fulla, 2023-01-26 This volume offers a new perspective on the political history of the socialist communist and alternative political Lefts focusing on the role of networks and transnational connections Embedding the history of left wing internationalism into a new political history approach it accounts for global and transnational turns in the study of left wing politics The essays in this collection study a range of examples of international engagement and transnational cooperation in which left wing actors were involved and explore how these interactions shaped the globalization of politics throughout the 20th century In taking a multi archival and methodological approach this book challenges two conventional views that the left gradually abandoned its original international to focus exclusively on the national framework and that internationalism survived merely as a rhetorical device Instead this collection highlights how different currents of the Left developed their own versions of internationalism in order to adapt to the transformation of politics in the interdependent 20th century world Demonstrating the importance of political convergence alliance formation network construction and knowledge circulation within and between the socialist and communist movements it shows that the influence of internationalism is central to understanding the foreign policy of various left wing parties and movements

How Not to Network a Nation Benjamin Peters, 2016-03-25 How despite thirty years of effort Soviet attempts to build a national computer network were undone by socialists who seemed to behave like capitalists Between 1959 and 1989 Soviet scientists and officials made numerous attempts to network their nation to construct a nationwide computer network None of these attempts succeeded and the enterprise had been abandoned by the time the Soviet Union fell apart Meanwhile ARPANET the American precursor to the Internet went online in 1969 Why did the Soviet network with top level scientists and patriotic incentives fail while the American network succeeded In *How Not to Network a Nation* Benjamin Peters reverses the usual cold war dualities and argues that the American ARPANET took shape thanks to well managed state subsidies and collaborative research environments and the Soviet network projects stumbled because of unregulated competition among self interested institutions bureaucrats and others The capitalists behaved like socialists while the socialists behaved like capitalists After examining the midcentury rise of cybernetics the science of self governing systems and the emergence in the Soviet Union of economic cybernetics Peters complicates this uneasy role reversal while chronicling the various Soviet attempts to build a unified information network Drawing on previously unknown archival and historical materials he focuses on the final and most ambitious of these projects the All State Automated System of Management OGAS and its principal promoter Viktor M Glushkov Peters describes the rise and fall of OGAS its theoretical and practical reach its vision of a national economy

managed by network the bureaucratic obstacles it encountered and the institutional stalemate that killed it Finally he considers the implications of the Soviet experience for today s networked world *The Spirit of New Socialism and the End of Class-based Politics* Robert Corfe,2005 Changes in society over the past 50 years call for a new type of Socialism and this book presents a striking new dynamic to attract the 90 per cent majority in the industrialised economies of today **Life Trajectories Into and Out of Contemporary Neo-Nazism** Christer Mattsson,Thomas Johansson,2019-10-10 This book provides the first comprehensive sociological study of the contemporary National Socialist movement in Sweden including how it has developed since the 1990s until the present It covers the ideas and political aspects of the movement as well as the subjective and very personal stories told by young men and women who in some cases have left the movement and in others remained Through a large number of detailed stories of the movement s violence hatred and ideology as well as stories of the life plans and dreams involved in re entering society the study on which the book is based provides knowledge hope and new directions for studies on the National Socialist movement Additionally the book provides innovative research on the relation between the life trajectories of National Socialists and their significant others allowing us to establish better and more scientific strategies for preventing radicalization and promoting de radicalization The book is aimed at students of sociology social science and researchers studying hate movements and violent extremism It is also meant for professionals such as teachers social workers and youth workers who may encounter radicalization in their work as well as being a vital contribution for policymakers within the field **The Labour Party, Denis Healey and the International Socialist Movement** Ettore Costa,2018-05-18 This book describes how after the Second World War the Labour Party assumed leadership of the International Socialist Movement thanks to the achievements of the Attlee Government International Secretary Denis Healey guided the reconstruction of the Socialist International through the early Cold War making the British vision for socialist internationalism prevail over the French and Belgian At first the provisional Socialist International International Socialist Conference and Cominfo supported cohabitation with pro communist socialists and the USSR but with the Sovietisation of Eastern Europe it committed to militant anti communism Ambiguity between the Labour Party and Labour Government influenced British policy in Austria Czechoslovakia Greece Italy and Poland while the characterization and stereotypes of Eastern and Southern Europe shaped the language and actions of the British Furthermore the book shows how international contacts and the British and Swedish model encouraged the transition of socialist parties to responsible government parties fully embracing Western democracy and prepared the ideological revision of the 1950s **Women and American Socialism, 1870-1920** Mari Jo Buhle,2023-02-03 Socialist women faced the often thorny dilemma of fitting their concern with women s rights into their commitment to socialism Mari Jo Buhle examines women s efforts to agitate for suffrage sexual and economic emancipation and other issues and the political and intellectual conflicts that arose in response In particular she analyzes the clash between a nativist socialism influenced by ideas of individual rights and the class based

socialism championed by German American immigrants As she shows the two sides diverged often greatly in their approaches and their definitions of women s emancipation Their differing tactics and goals undermined unity and in time cost women their independence within the larger movement The History of the European Union Wolfram Kaiser,Brigitte Leucht,Morten Rasmussen,2008-09-05 This book radically re conceptualises the origins of the European Union as a trans and supranational polity as it emerged between the Schuman Plan of May 1950 and the first enlargement of the European Communities at the start of 1973 Drawing upon social science theories and debates as well as recent historical research Wolfram Kaiser and Morten Rasmussen in their introductory chapters discuss innovative ways of narrating the history of the EU as the emergence of a transnational political society and supranational political system Building on these insights eight chapters based on multilateral and multi archival research follow each with case studies of transnational networks public sphere and institutional cultures and policy making which illustrate systematically related aspects of the early history of the EU In the concluding chapter leading political scientist Alex Warleigh Lack demonstrates how greater interdisciplinary cooperation especially between contemporary history and political studies can significantly advance our knowledge of the EU as a complex polity This book will be of interest to students and scholars of Politics European Studies and History **Your Computer Is on Fire** Thomas S. Mullaney,Benjamin Peters,Mar Hicks,Kavita Philip,2021-03-09 Techno utopianism is dead Now is the time to pay attention to the inequality marginalization and biases woven into our technological systems This book sounds an alarm after decades of being lulled into complacency by narratives of technological utopianism and neutrality people are waking up to the large scale consequences of Silicon Valley led technophilia This book trains a spotlight on the inequality marginalization and biases in our technological systems showing how they are not just minor bugs to be patched but part and parcel of ideas that assume technology can fix and control society Contributors Janet Abbate Ben Allen Paul N Edwards Nathan Ensmenger Mar Hicks Halcyon M Lawrence Thomas S Mullaney Safiya Umoja Noble Benjamin Peters Kavita Philip Sarah T Roberts Sreela Sarkar Corinna Schlombs Andrea Stanton Mitali Thakor Noah Wardrip Fruin *Social Discredit* Janine Stingel,2000 In *Social Discredit* Janine Stingel exposes a crucial yet previously neglected part of Social Credit history the virulent anti Jewish campaign it undertook before during and after the Second World War While most Canadians acknowledged the perils of race hatred in the wake of the Holocaust Social Credit intensified its anti Semitic campaign By examining Social Credit s anti Semitic propaganda and the reaction of the Canadian Jewish Congress Stingel details their mutual antagonism and explores why Congress was unable to stop Social Credit s blatant defamation She argues that Congress s ineffective response was part of a broader problem in which passivity and a belief in quiet diplomacy undermined many of its efforts to combat intolerance Stingel shows that both Social Credit and Congress changed considerably in the post war period as Social Credit abandoned its anti Semitic trappings and Congress gradually adopted an assertive and pugnacious public relations philosophy that made it a champion of human rights in Canada *Social Discredit*

offers a fresh perspective on both the Social Credit movement and the Canadian Jewish Congress substantively revising Social Credit historiography and providing a valuable addition to Canadian Jewish studies **Feminism Beyond Left and Right** Holly Lawford-Smith, 2025-07-14 An unquestioned assumption of contemporary politics is that the left owns minority groups in the sense that the left exclusively champions the interests of minorities and is for that reason owed the allegiance of minorities This in turn gives rise to the sense of dissonance created by right wing dissenters the black social conservative the gay ultra nationalist the female libertarian the poor pro capitalist This same dissonance exists for women and feminism creating a default assumption that a feminist is a left wing woman We don't make a distinction between left wing feminists and feminists we don't need to There's nothing a philosopher loves more than an unquestioned assumption and in this book political philosopher Holly Lawford Smith systematically dismantles the assumption that feminism is an exclusively left wing project Once dismantled the path is clear to a new set of questions Who counts as a feminist in the first place If women from anywhere on the political spectrum can be feminists who is it that feminists should or shouldn't be working with And what can be said more generally about the ethics of alliances and coalitions In *Feminism Beyond Left and Right* Lawford Smith makes the case for non partisan feminism feminism outside the constraints of the left right political spectrum a feminism for and about all women as women

Contemporary Trotskyism John Kelly, 2018-03-14 Almost 80 years after Leon Trotsky founded the Fourth International there are now Trotskyist organizations in 57 countries including most of Western Europe and Latin America Yet no Trotskyist group has ever led a revolution or built an enduring mass political party Contemporary Trotskyism looks in detail at the influence resilience and weaknesses of the British Trotskyist movement from the 1970s to the present day The book argues that to understand and explain the development resilience and influence of Trotskyist groups we need to analyse them as bodies that comprise elements of three types of organization the political party the sect and the social movement It is the properties of these three facets of organization and the interplay between them that gives rise to the most characteristic features of the Trotskyist movement frenetic activity rampant divisions inter organizational hostility authoritarian and charismatic leadership high membership turnover and ideological rigidity Trotskyist groups have been involved in a wide range of important social movements including trade unions student unions anti war anti racist and anti fascist groups While their energy and activity in civil society have had some success their influence has never been reflected in votes or seats at elections even after the financial crisis Drawing on extensive archival research as well as interviews with many of the leading protagonists and activists within the Trotskyist milieu this is essential reading for students activists and researchers with an interest in the far left social movements and contemporary British political history

European Integration Beyond Brussels Matthew Broad, Suvi Kansikas, 2020-08-14 Europe is a continent whose history has in one form or another long been dominated by integration And yet the European integration process is often treated as synonymous with the evolution of just one particular and until recently geographically quite limited Western centred

organisation the European Union EU This trend obscures the multitude of ways European states have acted collectively on both sides of the Iron Curtain and continue to do so throughout the continent today With contributors drawn from history and political science this book explores some of these diverse integration efforts beyond Brussels We shine a light on international organisations trade frameworks and various political social scientific and cultural forms of unity in both Eastern and Western Europe In so doing the book seeks to redefine the history of the European integration process not only as a less purely EU centric phenomenon but as a less strictly Western European one too

Visualising far-right environments

Bernhard Forchtner,2023-10-17 This volume presents ground breaking analyses of how the far right represents natural environments and environmentalism around the globe Images are not simply pervasive in our increasingly visual culture they are a means of proposing worlds to viewers Accordingly the book approaches the visual not as something extra or illustrative but as a key means of producing identities and doing politics Putting visuality centre stage and covering political parties and non party actors in Africa Asia Australia and New Zealand Europe and the United States contributors demonstrate the various ways in which the far right articulates natural environments and the rampant environmental crises of the twenty first century providing essential insights into such multifaceted politics

Digital Architecture Beyond Computers

Roberto Bottazzi,2018-05-31 Digital Architecture Beyond Computers explores the deep history of digital architecture tracing design concepts as far back as the Renaissance and connecting them with the latest software used by designers today It develops a critical account of how the tools and techniques of digital design have emerged and allows designers to deepen their understanding of the digital tools they use every day What aesthetic spatial and philosophical concepts converge within the digital tools architects employ What is their history And what kinds of techniques and designs have they given rise to This book explores the answers to these questions showing how digital architecture brings together complex ideas and trajectories which span across several domains and have evolved over many centuries It sets out to unpack these ideas trace their origin and permeation into architecture and re examine their use in contemporary software Chapters are arranged around the histories of nine fragments each a fundamental concept embedded in popular CAD applications database layers and fields parametrics pixel programme randomness scanning topology and voxel maxel with each theme examined through a series of historical and contemporary case studies The book thus connects the digital design process with architectural history and theory allowing designers and theorists alike to develop more analytical and critical tools with which to conceptualise digital design and its software
