Systems of

Psychotherapy James O. Prochaska, John C. Norcross, 2024 The field of psychotherapy has been fragmented and staggered by over choice We have witnessed the hyperinflation of brand name therapies In 1959 Harper identified 36 distinct systems of psychotherapy by 1976 Parloff discovered more than 130 therapies in the therapeutic marketplace or perhaps more appropriately the jungle place Recent estimates put the number at over 500 and growing Pearsall 2011 **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress. Self-Handicapping Raymond L. Higgins, C.R. Snyder, Steven Berglas, 2013-11-11 The concept of self handicapping can be legitimately anchored in a variety of intellectual contexts some old and some newer As this volume reminds us Alfred Adler was perhaps the first to articulate the significance of various self defeating claims and gestures for protecting the self concept Thus the apparent paradox of defeat in the interests of protection More recently but still more than 30 years ago Heider's naive psychology added attributional rhetoric to the description of self defeating strategies While predominantly cognitive in its thrust the attributional approach incorporated several motivational influences especially those involving egocentric concerns Heider hardly violated our common sense when he suggested that people are inclined to attribute their performances in a self serving manner the good things I caused the bad things were forced upon me The notion of self handicapping strategies proposed by Berglas and myself a little more than a decade ago capitalized on these homely truths while adding a particular proactive twist We not only make excuses for our blunders we plan our engagements and our situational choices so that self protective excuses are unnecessary In doing so we use our attributional understanding to arrange things so that flawed and failing performances will not be interpreted in ways that threaten our self esteem
