Society In China:

Society in China Sir Robert Kennaway Douglas, 1901 Civil Society in China Timothy Brook, B. Michael Frolic, 2015-03-04 The concept of civil society was borrowed from 18th century Europe to provide a framework for understanding the transition to post authoritarian regimes in Latin America and post communist regimes elsewhere This book asks whether this concept is useful for analyzing China **Civil Society in China** Runya Qiaoan, 2021-09-30 Chinese civil society groups have achieved iconic policy advocacy successes in the areas of environmental protection women s rights poverty alleviation and public health This book examines why some groups are successful in policy advocacy within the authoritarian context while others fail A mechanism of cultural resonance is introduced as an innovative theoretical framework to systematically compare interactions between Chinese civil society and the government in different movements It is argued that civil society advocacy results depend largely on whether advocates can achieve cultural resonance with policymakers and the mainstream public through their social performances The effective performance is the one in which advocates employ symbols embraced by the audience policymakers and the public in their actions and framings While many studies have tried to explain the phenomena of successful policy advocacy in China through institutional or organizational factors this book not only contains extensive empirical data based on field research but takes a cultural sociological turn to identify the meaning making process behind advocacy actions Civil Society in China will appeal to students and scholars of sociology political science social work and Chinese and Asian studies more broadly **The State and Society of China** Yong Gao, Ying Wu, 2017-10-27 This book places the topic of the state and society in the context of modern development in China over the past century investigating the dynamic relation and internal tension between the state s power enhancement and society s vitality activation instead of simply regarding the country and society as two separate entities Building a modern country and activating the people s vitality involves three closely linked and mutually supporting aspects establishing the identity recognition of the people to unite the nation adjusting the organizational system of the society to promote mobilization and institute a social incentive system and determining dominant strategies and means for the interaction between the country and society to address social governance issues This book carefully sheds light on the logic behind China s roundabout strategy for building a modern country and motivating the vitality of its people Understanding Chinese Society Xiaowei Zang, 2012-03-12 As China gains power economically politically and militarily and interaction between the Chinese and people outside China increases it becomes more and more important that we understand the social factors that influence the daily lives of China s population This new introductory textbook is suitable for all students taking a course on Chinese society It presents both historical and contemporary contexts and the latest available research findings With chapters covering many key aspects of life in China including religion social policy and welfare the history and impact of the Chinese Communist Party familial relationships ethnicity gender the media and the education system this textbook gives

Global Civil Society and China Anthony J. Spires,2024-04-18 This Element traces the history of and recent developments in the unstable relationship between global civil society GCS and China It analyses the normative impacts GCS has had on China including the Chinese state and domestic civil society and the possibilities created by Beijing s new going out policies for Chinese civil society groups It examines the rhetoric and reality of GCS as an emancipatory project and argues that universal values underpinned

by principles of human rights and democracy have gained currency in China despite official resistance from the government. It argues that while the Chinese party state is keen to benefit from GCS engagement, Beijing is also determined to minimize any impact outside groups might have on regime security. Society Building - A China Model of Social Development -English Version - Hardcover Xiangqun Chang, 2015-11-02. In China's future social development, there is likely to be an interest in society building with interactions between top-down and bottom-up approaches along with a deepened level of social reform and the construction of a harmonious or symbiotic society. This represents one of China's social development models and is reflected in the Communist Party of China (CPC) and state policy. The term 'society building' was proposed by Chinese thinkers nearly a century ago and was used by Chinese sociologists to study Chinese society since the 1930s. In the 21st century, society building has been used as an interdisciplinary concept by Chinese social scientists. The main concern of China for its future social development is to enhance its people's wellbeing and encourage them to build Chinese society in innovative and creative ways. This volume showcases the latest research of non-Chinese scholars relating to this indigenous concept and to China's social development in a global context. It tackles the following topics: the assessment of the social impact of infrastructure projects; China's reforms and its changing political system; whether or not the Singapore model is suitable for China to follow; soft power through education and boundaries; cosmopolitanisms and spaces in Chinese and international cities. The book will be of interest to academics, professionals, practitioners, university students and the general public seeking a comprehensive understanding of China. **Society Building: A China Model of Social Development** is the second volume in the *Understanding China and the World* series, edited by the late Chinese sociologist ZHENG Hangsheng (1936-2014) and British Chinese scholar Xiangqun Chang. Both the title of the volume and book series deliberately reflect a new perspective on China, putting China in the context of globalization and inspiring comparative studies that enable non-Chinese to understand China and the world. About the book series and background: This book was first published in 2014 by Cambridge Scholars Publishing (CSP). Five new pieces have been added to this new edition and many changes in other 3 pieces. It is published by the UK-based Global China Press (GCP) and New World Press (NWP). GCP is the first publisher specializing in dual-language publications that focus on

Chinese perspectives of the world and human knowledge and non Chinese perspectives of China in a global context NWP was founded in 1951 and is a member of the China International Publishing Group CIPG It publishes multilingual books on social sciences literature management and other disciplines that serve to introduce China to the world As early as the 1980s NWP published the China Study series in English covering China s economy politics ethnicity population history sociology and anthropology and including Fei Xiaotong s *Toward a People s Anthropology* 1981 *Chinese Village Close Up* 1982 and *Small Towns in China* 1986 NWP is republishing the China Study series jointly with GCP supplemented by new titles
