L2 Dynamic Assessment Research in China Matthew E. Poehner, James P. Lantolf, 2025-06-24 Dynamic Assessment is an innovative approach to revealing the full range of learner abilities that has rapidly gained attention from language educators and researchers While much of the research to date has examined Dynamic Assessment in Western countries the

research in this book further extends the framework by documenting its uses by Chinese scholars in meeting context specific challenges Dynamic Assessment or DA originated in the writings of Russian psychologist L S Vygotsky concerning the concept of the Zone of Proximal Development While many assessment approaches call for closer integration with teaching DA embeds an instructional component referred to as mediation as part of the assessment procedure Following Vygotsky the picture of a person's abilities is incomplete if focus is restricted to past development as diagnosed by what the person can achieve independently and without considering those abilities that are emerging as revealed through responsiveness to mediation In this way DA offers insights into learner abilities not easily obtained through other assessments Widely employed in special education and general abilities testing the second language field has witnessed a rapid growth of interest in using DA to better understand the full range of learner language abilities and to determine how instruction can optimally promote the development of all learners This book brings together a collection of original studies conducted by scholars in China that build upon methods and principles from previous DA research and that leverage them to meet local demands In so doing this research collectively illustrates the extension of DA into new cultural contexts while simultaneously yielding findings that are sure to resonate with language educators assessors and researchers around the world This book was originally published as a special issue of *Language Assessment Quarterly* *The Routledge Handbook of Applied Linguistics* James

Simpson, 2011-03-15 The Routledge Handbook of Applied Linguistics serves as an introduction and reference point to key areas in the field of applied linguistics The five sections of the volume encompass a wide range of topics from a variety of perspectives applied linguistics in action language learning language education language culture and identity perspectives on language in use descriptions of language for applied linguistics The forty seven chapters connect knowledge about language to decision making in the real world The volume as a whole highlights the role of applied linguistics which is to make insights drawn from language study relevant to such decision making The chapters are written by specialists from around the world Each one provides an overview of the history of the topic the main current issues and possible future trajectory Where appropriate authors discuss the impact and use of new technology in the area Suggestions for further reading are provided with every chapter The Routledge Handbook of Applied Linguistics is an essential purchase for postgraduate students of applied linguistics Editorial board Ronald Carter Guy Cook Diane Larsen Freeman and Amy Tsui
