## **Sociological Perspectives Volume 42 No2:**

Perspectives on Sociological Theories, Methodological Debates and Organizational Sociology Medani P.

Bhandari, 2023-04-13 This book stands as the full body of scholarly work on western theories of social sciences. The book contains three chapters. The first part gives the overall scenario of theories, the second part provides the pathway to research destination, the research method, and the third and final part is the destination of the substantive field of study and the roles of international organizations on social, political, economic, environmental, regimes, creation, as well as to other social and development functions of international organizations. Sociology examines the social actors' activities in society and social problems. Western Scholars have developed many social theories which address the underlying causes such as social conflicts and inequalities, and many formal and informal social organizations are involved to minimize the challenges of inequalities. The study of social organizations is a relatively new phenomenon in sociology. Broadly its historical root can be traced from Greek civilization, Plato, Aristotle, and it has mostly flourished since the Enlightenment Era. However, empirical studies show that the scientific study of organizations began only from the 19th and 20th century. Among the scholars of these centuries, the contributions of Karl Marx, Ferdinand Tönnies, Emile Durkheim, Ludwig Gumplowicz, Vilfredo Pareto, Max Weber, and Talcott Parsons are considered as pillars of sociology. This book intends to answer the broad and major questions of theories, methods, and the international organization studies in social sciences, particularly in sociology, and to provide the basic concepts of social theories, application of methods in research, qualitative and elaborate the factual reality, why study of international organization is also subject of sociological study. The book presents the perspectives of organizational sociology in a way that scholarly readers can see the linkages, political sciences, sociology, and slightly economic in addressing the roles and issues of the international organizations.

**CyberGenetics** Anna Harris, Susan Kelly, Sally Wyatt, 2016-04-28 Online genetic testing services are increasingly being offered to consumers who are becoming exposed to and knowledgeable about new kinds of genetic technologies. As the launch of a 23andme genetic testing product in the UK testifies, genetic research breakthroughs, cheek swabbing, forensic pathologists, and celebrities discovering their ancestral roots are littered throughout the North American, European, and Australasian media landscapes. Genetic testing is now capturing the attention and imagination of hundreds of thousands of people who can not only buy genetic tests online but can also go online to find relatives, share their results with strangers, sign up for personal DNA-based musical scores, and take part in research. This book critically examines this market of direct-to-consumer (DTC) genetic testing from a social science perspective, asking what happens when genetics goes online. With a focus on genetic testing for disease, the book is about the new social arrangements which emerge when a traditionally clinical practice, genetic testing, is taken into new spaces, the internet. It examines the intersections of new genetics and new media by drawing from three different fields: internet studies, the sociology of health and science, and technology studies. While there has been a surge of research activity concerning DTC genetic testing, particularly in sociology,

ethics and law this is the first scholarly monograph on the topic and the first book which brings together the social study of genetics and the social study of digital technologies This book thus not only offers a new overview of this field but also offers a unique contribution by attending to the digital and by drawing upon empirical examples from our own research of DTC genetic testing websites using online methods and in depth interviews in the United Kingdom with people using healthcare services
