audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs **Networks, Trust and Social Capital** Sokratis M. Konioridos, 2017-03-02 The concepts of social networks social capital and trust play an increasingly central role in the social sciences They have become indispensable conceptual tools for the analysis of post industrial late modern societies which are characterized by such features as the relative decline of formal hierarchies the development of flexible social arrangements in the sphere of production and the extreme mobility of capital This is the first book to study the interrelationships between these important concepts both theoretically and empirically Drawing on empirical investigations from a range of diverse European social contexts the contributors develop an economic sociology that builds on and extends established theoretical perspectives The book opens with an introduction to the theoretical ideas relating social capital to reciprocity trust and social networks in line with current debates The authors go on to discuss the concept of social embeddedness addressing the economic effects of social capital by examining the network and trust foundations of labour markets and investigating the structural limits of trusting networks They conclude with an exploration of the impact of networking and the functioning of trust and social capital on the economic arrangements and performance of nascent capitalist economies in post Communist Europe This thematically unified collection by a team of distinguished contributors from across Europe provides an innovative and distinctive contribution to an expanding area of research **Culture and Learning** Mark Olssen, 2006-11-01

Sociological Theory and the Environment Riley E. Dunlap, 2002 Sociological Theory and the Environment is a comprehensive survey and assessment of sociological theories of the relations between societies and their natural biophysical environment This book touches on and addresses virtually all of the major perspectives focal points and debates in environmental sociology today classical and twentieth century social theories macro micro linkage issues globalization and development reflexive modernization ecological modernization vs limits viewpoints modernity and post modernity risk society constructionalism realism environmental movements identities consumption and environment cultural sociologies of the environment and so on At the same time the book aims to go beyond an inventory of environmental sociological theory Sociological Theory and the Environment stresses how new ground can be broken in the articulation of environmental sociology with major classical and contemporary sociological theories **Against Orthodoxy** Trevor W. Harrison, Slobodan Drakulic, 2011-08-31 During the Cold War nationalism fell from favour among theorists as an explanatory factor in history as Marxists and liberals looked to class and individualism as the driving forces of change The resurgence of nationalism after the collapse of the Soviet Union however called for a reconsideration of the paradigm Against Orthodoxy uses case studies from around the world to critically evaluate decades of new scholarship The authors argue that theories of nationalism have ossified into a new set of orthodoxies These overlook nationalism's role as a generative force one that reflects complex historical political and cultural arrangements that defy simplistic explanations **How to Stay Smart in a Smart World**

Gerd Gigerenzer, 2022-08-02 STAYING IN CHARGE How do we navigate a world populated by algorithms that beat us in chess find us romantic partners and tell us to turn right in 500 yards Anyone worried about the age of AI will sleep better after reading this intelligent account about the limits and dangers of technology Publishers Weekly Doomsday prophets of technology predict that robots will take over the world leaving humans behind in the dust Tech industry boosters think replacing people with software might make the world a better place while tech industry critics warn darkly about surveillance capitalism Despite their differing views of the future they all seem to agree machines will soon do everything better than humans In How to Stay Smart in a Smart World Gerd Gigerenzer shows why that's not true and tells us how we can stay in charge in a world populated by algorithms Machines powered by artificial intelligence are good at some things playing chess but not others life and death decisions or anything involving uncertainty Gigerenzer explains why algorithms often fail at finding us romantic partners love is not chess why self-driving cars fall prey to the Russian Tank Fallacy and how judges and police rely increasingly on nontransparent black box algorithms to predict whether a criminal defendant will reoffend or show up in court He invokes Black Mirror considers the privacy paradox people want privacy but give their data away and explains that social media get us hooked by programming intermittent reinforcement in the form of the like button We shouldn't trust smart technology unconditionally Gigerenzer tells us but we shouldn't fear it unthinkingly either **A Historiography of the Modern Social Sciences** Roger E. Backhouse, Philippe Fontaine, 2014-09-22 A Historiography of the Modern Social Sciences exposes parallels and contrasts in the way the histories of the social sciences are written
