Speak Not James Griffiths,2021-10-21 A New Yorker Best Book of 2022 A Globe Mail Book of the Year A stimulating work on the politics of language LA Review of Books As globalisation continues languages are disappearing faster than ever leaving our planet s linguistic diversity leaping towards extinction The science of how languages are acquired is becoming more advanced and the internet is bringing us new ways of teaching the next generation however it is increasingly challenging for minority languages to survive in the face of a handful of hegemonic super tongues In **Speak Not** James Griffiths reports from the frontlines of the battle to preserve minority languages from his native Wales Hawaii and indigenous American nations to southern China and Hong Kong He explores the revival of the Welsh language as a blueprint for how to ensure new generations are not robbed of their linguistic heritage outlines how loss of indigenous languages is the direct result of colonialism and globalisation and examines how technology is both hindering and aiding the fight to prevent linguistic extinction Introducing readers to compelling characters and examining how indigenous communities are fighting for their languages Griffiths ultimately explores how languages hang on what happens when they don t and how indigenous tongues can be preserved and brought back from the brink

Indigenous Language Acquisition, Maintenance, and Loss and Current Language Policies Okamura, Toru,Kai,

Masumi,2020-08-28 The world's linguistic map has changed in recent years due to the vast disappearance of indigenous languages. Many factors affect the alteration of languages in various areas of the world including governmental policies, education and colonization. As indigenous languages continue to be affected by modern influences, there is a need for research on the current state of native linguistics that remain across the globe. **Indigenous Language Acquisition, Maintenance and Loss and Current Language Policies** is a collection of innovative research on the diverse policies, influences and frameworks of indigenous languages in various regions of the world. It discusses the maintenance, attrition or loss of the indigenous languages, language status in the society, language policies and the grammatical characteristics of the indigenous language that people maintained and spoke. This book is ideally designed for anthropologists, language professionals, linguists, cultural researchers, geographers, educators, government officials, policymakers, academicians and students. **Mandarin Spread in Malaysia (UM Press)** Wang Xiaomei, This book is the first of its kind on Mandarin spread in Malaysia. The author investigated the language situation in the Chinese community in Johor and proposed a theoretical framework to analyze language spread. In her proposal, mass media in Mandarin and Chinese education play significant roles in Mandarin spread. Both top-down and bottom spread are found, which is different from the process of English spread elsewhere. With the spread of Mandarin, more and more Chinese abandon Chinese dialects and identify with the pan-Chinese identity. Mandarin spread is a dynamic process which is triggered by an internal force, i.e. sociolinguistic realignment of the community. In this book, the author compares Johor with Kuala Lumpur and Singapore in terms of their sociolinguistic realignment process. This is a book for sociolinguists, language planners, students of linguistics, school teachers and general readers. **Employment Relations and Ethnic Minority Enterprise** Xisi Li,2019-09-23 This book is the first piece of extensive research in studying employment relations in ethnic Chinese small businesses in Britain. It contributes to existing knowledge in three respects. Empirically, it examines the nature of employment relations in the ethnic Chinese restaurant sector in the UK context, a hitherto under-explored area. The study adds new knowledge to the study of employment relations in ethnic minority small firms. Theoretically, it draws out the concept of ethnic twist, which denotes how the conflict between different group members from the same ethnicity shapes patterns of shop-floor behaviours, revealing the heterogeneity of people from the same ethnic origins. Methodologically, the research demonstrates the continued importance of the ethnographic approach in studying workplace relations. Additionally, we see lots of literature discussing overseas Chinese businesses in terms of cultural resources, business development, level of integration and structural constraints. Surprisingly, little is published on interpretations of small-firm workplace relations. This book might illuminate future studies to explore management practices and employment relationships in ethnic Chinese small businesses in different national environments and industry sectors. It will be of interest to researchers, academics and students in the fields of employment relations, human resource management and organisational behavior. **Language Attitudes and Identities in Multilingual China** Sihua Liang,2014-12-04 These
