Speaking Relating And Learning A Study Of Hawaiian Children At Home And At School:

Speaking, Relating, and Learning Stephen T. Boggs, 1986 Quoting actual dialogue the volume describes modes of speaking in three contemporary Hawaiian communities as children relate to parents siblings and peers It demonstrates in detail the link to educational practice and to point to positive consequences in the handling of cultural differences in language use Educating Everybody's Children Robert W. Cole, 2008 This revised and expanded 2nd edition of *Educating Everybody's Children* provides educators with research proven instructional strategies to meet the varying needs of students from economically ethnically culturally and linguistically diverse backgrounds **Studying Children in Context** M. Elizabeth Graue, Daniel J. Walsh, 1998-02-19 What is the world like for today's children How do they construct meaning in it Answering these key questions *Studying Children in Context* explains the art and science of doing qualitative research involving children Authors M Elizabeth Graue and Daniel J Walsh carefully discuss the research process dealing succinctly with generic research issues yet emphasizing where work with children presents its own particular challenges They look across the research enterprise in the first part of the book conceptualizing it as a holistic activity They next focus on fieldwork and in the final section examine the interpreting and reporting aspects of qualitative research In addition to presenting their own considerable experiences in fieldwork with children Graue and Walsh also present the contributions of numerous researchers with their own insights on key issues *Studying Children in Context* will be an invaluable addition to the libraries of teachers and researchers interested in qualitative research methods in general and in doing fieldwork with children in particular **Doctor-Patient Interaction** Walburga von Raffler-Engel, 1989-01-01 This volume covers many of the ways of speaking that create problems between doctor and patient The questions under consideration in the present book are the following How is the doctor patient interaction structured in a particular culture What takes place during the process What causes misunderstandings lack of cooperation and even total non compliance What is the outcome of the interaction and how does the patient benefit from it Finally and this is the ultimate purpose of this book How can the interaction be improved so that an optimum outcome is assured for the patient with maximum satisfaction to the physician Electronic Literacies Mark Warschauer, 1998-11-01 *Electronic Literacies* is an insightful study of the challenges and contradictions that arise as culturally and linguistically diverse learners engage in new language and literacy practices in online environments The role of the Internet in changing literacy and education has been a topic of much speculation but very little concrete research This book is one of the first attempts to document the role of the Internet and other new digital technologies in the development of language and literacy Warschauer looks at how the nature of reading and writing is changing and how those changes are being addressed in the classroom His focus is on the experiences of culturally and linguistically diverse learners who are at special risk of being marginalized from the information society Based on a two year ethnographic study of the uses of the Internet in four language and writing classrooms in the state of Hawaii i a Hawaiian language class of Native

Hawaiian students seeking to revitalize their language and culture an ESL class of students from Pacific Island and Latin American countries an ESL class of students from Asian countries and an English composition class of working class students from diverse ethnic backgrounds the book includes data from interviews with students and teachers classroom observations and analysis of student texts This rich ethnographic data is combined with theories from a broad range of disciplines to develop conclusions about the relationship of technology to language literacy education and culture Central to Warschauer's discussion and conclusions is how contradictions of language culture and class affect the impact of Internet based education While Hawaii is a special place the issues confronted here are similar in many ways to those that exist throughout the United States and many other countries How to provide culturally and linguistically diverse students traditionally on the educational and technological margins with the literacies they need to fully participate in public community and economic life in the 21st century The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Transforming the Culture of Schools Jerry Lipka, With Gerald V. Mohatt, Esther Ilutsik, 2014-01-21 This book speaks directly to issues of equity and school transformation and shows how one indigenous minority teachers group engaged in a process of transforming schooling in their community Documented in one small locale far removed from mainstream America the personal narratives by Yup'ik Eskimo teachers address the very heart of school reform The teachers' struggles portray the first in a series of steps through which a group of Yup'ik teachers and university colleagues began a slow process of reconciling cultural differences and conflict between the culture of the school and the culture of the community The story told in this book goes well beyond documenting individual narratives by providing examples and insights for others who are involved in creating culturally responsive education that fundamentally changes the role and relationship of teachers and community to schooling

Corson, 2013-11-01 Oral Discourse and Education examines spoken language as a field of study looking at the various ways in which we can both theorise the place of talk in education and examine the way talk is actually done in educational settings Given the centrality of literacy based practices in schools a book focusing on talk brings quite different and important perspectives to the study of education Talk is something that has all too often been devalued and taken for granted What becomes evident throughout the papers included in this

volume is that talk is of central importance in establishing identities and the cultures in which those identities are located. However, because we are unused to reflexively examining the way we talk, there is a serious disjuncture between what we believe talk should achieve and what can be seen to be achieved in actual talk in educational settings. Anyone interested in teaching should read this book. Becoming more aware of the centrality of talk and what it achieves is important both for enabling us to find ways to bring our ideals more in line with our practices and for being able to recognise and reflect on the ways our talk can be achieving things quite other than what we intend. This book is relevant to teachers at primary, secondary and tertiary levels and for researchers interested in spoken language in educational contexts. **Kids Talk** Susan M.

Hoyle, Carolyn Temple Adger, 1998-09-10 Between early childhood and adulthood, language acquisition is succeeded by a bloom of repertoire for managing interaction, a growing sensitivity to the relation of language and society, an expanding ability to wield power through the strategic use of language and an increasing sophistication in framing speech activities. This book examines a wide range of language practices among school-age children and teenagers using data from naturally occurring recorded talk and from careful observation of interaction in peer groups. The contributors analyze talk at play, at school and at work, documenting the growing communicative skills of young people while always focusing on what young speakers themselves do with and through language. Theoretical constructs to which the contributors appeal include Goffman's notion of footing and Hymes' communicative competence as well as multiple characterizations of discourse structure. The chapters show older children as strategic language users, dynamic actors who are often concerned with defining themselves as a distinctive group, different from adults yet who just as often display proficiency at sophisticated discourse activities that presage those of adulthood. **Dialects, Englishes, Creoles, and Education** Shondel J. Nero, 2012-11-12 This volume

brings together a multiplicity of voices, both theoretical and practical, on the complex politics, challenges and strategies of educating students in North America and worldwide who are speakers of diverse or nonstandard varieties of English, creoles and hybrid varieties of English such as African American Vernacular English, Caribbean Creole English, Tex Mex, West African Pidgin English and Indian English, among others. The number of such students is increasing as a result of the spread of English, internal and global migration and increased educational access. *Dialects, Englishes, Creoles and Education* offers a sociohistorical perspective on language spread and variation, analysis of related issues such as language attitudes, identities and prescribed versus actual language use, and practical suggestions for pedagogy. Pedagogical features: Key points at the beginning of each chapter help focus the reader and provide a framework for reading, writing, reflection and discussion; chapter-end questions for discussion and reflective writing engage and challenge the ideas presented and encourage a range of approaches in dealing with language diversity. Collectively, the chapters in this volume invite educators, researchers and students across the fields of TESOL, applied linguistics, sociolinguistics, English literacy and language education to begin to consider and adopt context-specific policies and practices that will improve the language development and academic

performance of linguistically diverse students **Handbook of Classroom Management** Carolyn M. Evertson,Carol S. Weinstein,2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management Encyclopedia of Language and Education Nancy H.
