Greek Americans Peter C. Moskos, 2017-07-05 This is an engrossing account of Greek Americans their history strengths conflicts aspirations and contributions Blending sociological insight with historical detail Peter C and Charles C Moskos trace the Greek American experience from the wave of mass immigration in the early

1900s to today This is the story of immigrants most of whom worked hard to secure middle class status It is also the story of their children and grandchildren many of whom maintain an attachment to Greek ethnic identity even as they have become one of America s most successful ethnic groups As the authors rightly note the true measure of Greek Americans is the immigrants themselves who came to America without knowing the language and without education They raised solid families in the new country and shouldered responsibilities for those in the old They laid the basis for an enduring Greek American community Included in this completely revised edition is an introduction by Michael Dukakis and chapters relating to the early struggles of Greeks in America the Greek Orthodox Church success in America and the survival and expansion of Greek identity despite intermarriage This work will be of value to scholars of ethnic studies those interested in Greek culture and communities and sociologists and historians

**Ancient Greek Purism** Olga Tribulato, Federico Favi, Lucia Prauscello, 2024-12-30 This volume is the first of four devoted to Atticism a form of linguistic purism that sought to preserve the rules of the 5th century Attic dialect against the evolution of Postclassical Greek The series elucidates the origins and development of Atticist thought as well as its impact transmission and legacy from the Byzantine Middle Ages to the Renaissance Although Atticism flourished in the Imperial age its roots are steeped in the previous centuries This volume investigates the broad historical cultural and linguistic factors leading to the emergence of Attic as a prestige variety among the classical Greek dialects the way Attic exclusivity was construed in Athenian literary sources and how Hellenistic scholarship contributed to monumentalising Attic supremacy Atticism can be regarded as the first example of an intellectual movement seeking to promote an extinct variety to the status of linguistic standard reflecting an ideological and nostalgic view of identity This volume traces the roots of this linguistic phenomenon back to factors at work in the construction of Hellenicity in the archaic and classical periods

**The English Grammar Schools to 1660** Foster Watson,1908      **The Beginnings of Jewishness** Shaye J. D.

Cohen,1999-02-01 In modern times various Jewish groups have argued whether Jewishness is a function of ethnicity of nationality of religion or of all three These fundamental conceptions were already in place in antiquity The peculiar combination of ethnicity nationality and religion that would characterize Jewishness through the centuries first took shape in the second century B C E This brilliantly argued accessible book unravels one of the most complex issues of late antiquity by showing how these elements were understood and applied in the construction of Jewish identity by Jews by gentiles and by the state Beginning with the intriguing case of Herod the Great s Jewishness Cohen moves on to discuss what made or did not make Jewish identity during the period the question of conversion the prohibition of intermarriage matrilineal descent and the place of the convert in the Jewish and non Jewish worlds His superb study is unique in that it draws on a wide range of sources Jewish literature written in Greek classical sources and rabbinic texts both ancient and medieval It also features a detailed discussion of many of the central rabbinic texts dealing with conversion to Judaism      *Literature's Refuge* William Stroebel,2025-03-18 Stories silenced or sequestered by a century of mass displacement between Europe and the Middle East recovered and retold at last In 1923 the Greco Turkish Population Exchange uprooted and swapped nearly two million Christians and Muslims pacifying the so called Near East through ethnic partition and refugeehood This imposition of borders not only uprooted peoples from their place in the world it also displaced many of their stories from a place in world literature In *Literature's Refuge* William Stroebel recovers and weaves together work by fugitive writers oral storytellers readers copyists editors and translators dispersed by this massive unmixing of populations and the broader border logic that it set in motion Stroebel argues that two complementary forces emerged as a template for the Eastern Mediterranean s cultural landscape the modern border which reshuffled people through a system of filters and checkpoints and modern philology which similarly reshuffled their words and works Philologists and publishers defined modern literature by picking apart extracting reformatting or dispossessing refugee and diasporic texts across a racialized borderscape a gray zone of semi inclusion and semi exclusion semimobility and immobility Stroebel reaches into the chinks and crannies of this borderscape to reconstitute the rich textual geography between Greek Orthodoxy and Sunni Islam between Greek script Arabic script and Latin script literary traditions at the edges of Europe and the Middle East Doing so he offers a new methodological toolkit for rewriting the modern borderscapes of world literature      **The Rise of Eurocentrism** Vassilis Lambropoulos,2019-10-08 In the controversy over political correctness the canon and the curriculum the role of Western tradition in a post modern world is often debated To clarify what is at stake Vassilis Lambropoulos traces the ideology of

European culture from the Reformation focusing on a key element of Western tradition the act of interpretation as a distinct practice of understanding and a civil right Championed by Protestants insisting on independent interpretation of scripture this ideal of autonomy ushered in the era of modernity with its essentialist philosophy of universal man and his aesthetic understanding of the world After explaining the dominance of European culture through the combined archetypes of Hebraism reason and morality and Hellenism spirit and art Lambropoulos shows how the rule of autonomy has been transformed into the aesthetic disinterested contemplation of things in themselves Arguing that it is time to restore the socio political dimension to the movement of autonomy he proposes that a genealogy of the Hebraic Hellenic archetypes can help us evaluate more recent models like the Afrocentric one and redefine the controversy surrounding education Eurocentrism and cultural politics
