The Empire Strikes Back Rebecca Harrison,2020-10-29 The Empire Strikes Back 1980 the second film in the original Star Wars trilogy is often cited as the best and most popular Star Wars movie In her compelling study Rebecca Harrison draws on previously unpublished archival research to reveal a variety of original and often surprising perspectives on the film from the cast and crew who worked on its production through to the audiences who watched it in cinemas Harrison guides readers on a journey that begins with the film's production in 1979 and ends with a discussion about its contemporary status as an object of reverence and nostalgia She demonstrates how Empire's meaning and significance has continually shifted over the past 40 years not only within the franchise but also in broader conversations about film authorship genre and identity Offering new insights and original analysis of Empire via its cultural context production history textual analysis exhibition reception and post 1980 re evaluations of the film the book provides a timely and relevant reassessment of this enduringly popular film **On Kubrick** James Naremore,2019-07-25 On Kubrick provides an illuminating critical account of the films of Stanley Kubrick from his earliest feature *Fear and Desire* 1953 to the posthumously produced *A.I. Artificial Intelligence* Steven Spielberg 2001 The book offers provocative analysis of each of Kubrick's films together with new information about their production histories and cultural contexts Its ultimate aim is to provide a concise yet thorough discussion that will be useful as both an academic text and a trade publication James Naremore argues that in several respects Kubrick was one of the cinema's last modernists his taste and sensibility were shaped by the artistic culture of New

York in the 1950s he became a celebrated auteur who forged a distinctive style he used art cinema conventions in commercial productions he challenged censorship regulations and throughout his career he was preoccupied with one of the central themes of modernist art the conflict between rationality and its ever present shadow the unconscious War and science are key concerns in Kubrick's oeuvre and his work has a hyper masculine quality Yet no director has more relentlessly emphasized the absurdity of combat as in *Paths of Glory* 1957 and *Full Metal Jacket* 1987 the failure of scientific reasoning as in *2001* 1968 and the fascistic impulses in masculine sexuality as in *Dr Strangelove* 1964 and *Eyes Wide Shut* 1999 The book also argues that while Kubrick was a voracious intellectual and a life long autodidact the fascination of his work has less to do with the ideas it espouses than with the emotions it evokes Often described as cool or cold Kubrick is best understood as a skillful practitioner of what might be called the aesthetics of the grotesque he employs extreme forms of caricature and black comedy to create disgusting frightening yet also laughable images of the human body creating a sense of unease that leaves viewers unsure of how to react

Bakhtin and the Movies M. Flanagan, 2009-05-29 Martin Flanagan uses Bakhtin's notions of dialogism chronotope and polyphony to address fundamental questions about film form and reception focussing particularly on the way cinematic narrative utilises time and space in its very construction

Disney's Live-Action Movie Bombs, 1979-2019 Tyler Mattis, 2024-12-26 This book explores the history of Disney's biggest live action movie failures from the late 1970s to the late 2010s That stretch of time was a transformative period in which the company made many financial gains but gradually lost its identity which had largely been synonymous with founder Walt Disney The chapters explain why each movie was made the casting process production details and why each movie failed financially Covered here are cult classics like *Tron* and *Hocus Pocus* alongside more well known bombs like *John Carter* and *The Lone Ranger*

Alien Zone II Annette Kuhn, 1999-12-17 *Alien Zone II* presents some of the exciting new voices in the current debates It continues to pursue the critical and theoretical issues opened up in the earlier book and energetically explores fresh territory

The Dinosaur Films of Ray Harryhausen Roy P. Webber, 2004 Ray Harryhausen's animated creatures sparkled with predatory alertness and subtle quirks of behavior that stamped each with a distinct and memorable personality His use of stop motion animation a method of animating movable models and puppets brought dinosaurs and monsters to life on the silver screen Many animators and special effects wizards like Phil Tippett of *Jurassic Park* and Jim Aupperle of *Planet of the Dinosaurs* who are still working on prehistoric based films openly credit Ray Harryhausen as having influenced their careers His films are famous for being among the very best of the genre The first chapter of this book chronicles Harryhausen's formative years and work on numerous 16mm experiments beginning with his viewing of *King Kong* in 1933 The next four chapters cover his four feature length dinosaur films *The Beast from 20 000 Fathoms* *The Animal World* *One Million Years B C* and *The Valley of Gwangi* These chapters provide extensive information about all aspects of the staging of their stop motion content and many additional facets of the overall production process The paleontological

accuracy of his saurians from a modern perspective is also examined A chapter on his work and experiences in the 1970s and beyond discusses potential dinosaur projects as well as The Golden Voyage of Sinbad which is not a saurian film but does include the bat winged homunculus An appendix covers a number of dinosaur related films that Harryhausen had a hand in
