Technology and the Making of Experimental Film Culture John Powers, 2023 The Bolex camera 16mm reversal film stocks commercial film laboratories and low budget optical printers were the small gauge media technologies that provided the infrastructure for experimental filmmaking at the height of its cultural impact Technology and the Making of Experimental Film Culture examines how the avant garde embraced these material resources and invested them with meanings and values adjacent to those of semiprofessional film culture By reasserting the physicality of the body in making time lapse and kinesthetic sequences with the Bolex filmmakers conversed with other art forms and integrated broader spheres of humanistic and scientific inquiry into their artistic process Drawing from the photographic qualities of stocks such as Tri X and Kodachrome they discovered pliant metaphors that allowed them to connect their artistic practice to metaphysics spiritualism and Hollywood excess By framing film labs as mystical or adversarial they cultivated an oppositionality that valorized control over the artistic process And by using the optical printer as a tool for excavating latent meaning out of found footage they posited the reworking of images as fundamental to the exploration of personal and cultural identity Providing a wealth of new detail about the making of canonized avant garde classics by such luminaries as Carolee Schneemann Jack Smith and Stan Brakhage as well as rediscovering works from overlooked artists such as Chick Strand Amy Halpern and Gunvor Nelson Technology and the

Making of Experimental Film Culture uses technology as a lens for examining the process of making where ideas come from how they are put into practice and how arguments about those ideas foster cultural and artistic commitments and communities

**Special Effects on the Screen** Martin Lefebvre, Marc Furstenau, 2025-10-01 Since the very first days of cinema audiences have marveled at the special effects imagery presented on movie screens While long relegated to the margins of film studies special effects have recently become the object of a burgeoning field of scholarship With the emergence of a digital cinema and the development of computerized visual effects film theorists and historians have been reconsidering the traditional accounts of cinematic representation recognising the important role of special effects Understood as a constituent part of the cinema special effects are a major technical but also aesthetic component of filmmaking and an important part of the experience for the audience In this volume new directions are charted for the exploration of this indispensable aspect of the cinematic experience Each of the essays in this collection offers new insight into the theoretical and historical study of special effects The contributors address the many aspects of special effects from a variety of perspectives considering them as a conceptual problem recounting the history of specific special effects techniques and analysing notable effects films
