The Mirror of Grammar L.G. Kelly, 2002-05-31 Much is known about the grammar of the modistae and about its eclipse this book sets out to trace its rise In the late eleventh century grammar became an analytical rather than an exegetical discipline under the impetus of the new theology Under the impetus of Arab learning the ancient sciences were reshaped according to the norms of Aristotle s Analytics and developed within a structure of speculative sciences beginning with grammar and culminating in theology Though the modistae acknowledge Aristotle Donatus Priscian and the Arab commentators their roots also lie in Augustine and Boethius and they took as much from their scholastic contemporaries as they gave them This book traces the genesis of a grammar which communicated freely with other speculative sciences shared their structures and methods and affirmed its own individuality by defining its object as the causes of language

The Metaphysical Basis of Ethics Consuelo Preti, 2021-12-09 This book remedies the absence in the history of analytic philosophy of a detailed examination of G E Moore s philosophical views as they developed between 1894 and 1902 This period saw the inauguration of analytic philosophy through the work of Moore and Bertrand Russell Moore s early views are examined in detail through unpublished archival material including surviving letters diaries notes of lectures attended papers for Cambridge societies and drafts of early work in order to revise the established view that the origin of analytic philosophy at Cambridge was an abrupt split from F H Bradley s Absolute Idealism Traditional accounts of this period have highlighted the anti psychologism of Frege s logic but have not explored the impact of this movement more broadly Anti psychologism was a key feature of the work of Moore s

teachers on the nature of the mind and its objects in their interpretation of Kant and in ethics Moore's teachers G F Stout and James Ward were significant contributors to the late 19th century debates in mental science and the developing new science of psychology Henry Sidgwick's criticisms of Kant and Bradley and his leading work in ethics were key influences on Moore Moore's Trinity Fellowship Dissertations are essential historical evidence of the development of Moore's new theory of judgment a theory whose defining role in the origins of analytic philosophy cannot be overstated Moore's study of Kant in his dissertations ultimately formed the groundwork for his *Principia Ethica* 1903 which evolved from ideas that manifested in Moore's earliest Apostles papers developed through his dissertations and were refined through his *Elements of Ethics* lectures 1898-99 This monumental work of early twentieth century ethics is thus shown to be the culmination of Moore's early philosophical development

Language, Action and Context Brigitte Nerlich, David D. Clarke, 1996-06-28 The roots of pragmatics reach back to Antiquity especially to rhetoric as one of the three liberal arts However until the end of the 18th century proto pragmatic insights tended to be consigned to the pragmatic that is rhetoric wastepaper basket and thus excluded from serious philosophical consideration It can be said that pragmatics was conceived between 1780 and 1830 in Britain but also in Germany and in France in post Lockian and post Kantian philosophies of language These early conceptions of pragmatics are described in the first part of the book The second part of the book looks at pragmatic insights made between 1830 and 1880 when they were once more relegated to the philosophical and linguistic underground The main stage was then occupied by a fact hunting historical comparative linguistics on the one hand and a newly spiritualised philosophy on the other In the last part the period between 1880 and 1930 is presented when pragmatic insights flourished and were sought after systematically This was due in part to a new upsurge in empiricism positivism and later behaviourism in philosophy linguistics and psychology Between 1780 and 1930 philosophers psychologists sociologists and linguists came to see that language could only be studied in the context of dialogue in the context of human life and finally as being a kind of human action itself

History of Linguistics 1999 Jocelyne Arpin, Sylvain Auroux, Elisabeth Lazcano, Jacqueline Léon, 2003 This volume represents a selection of 25 out of altogether 86 papers given at the Eighth International Conference for the History of the Language Sciences ICHoLS VIII which took place at the Ecole Normale Supérieure at Fontenay aux Roses near Paris in September 1999 This conference was marked by three new elements the integration of the study of Amerindian languages into Western linguistics a particular emphasis on the history of the teaching of foreign languages and new information on the history of linguistics in Eastern Europe during the Soviet era

From Whitney to Chomsky John Earl Joseph, 2002-01-01 What is American about American linguistics Is Jakobson who spent half his life in America part of it What became of Whitney's genuinely American conception of language as a democracy And how did developments in 20th century American linguistics relate to broader cultural trends This book brings together 15 years of research by John E Joseph including his discovery of the meeting between Whitney and Saussure his ground breaking work on the origins of the Sapir

Whorf Hypothesis and of American sociolinguistics and his seminal examination of Bloomfield and Chomsky as readers of Saussure Among the original findings and arguments contained herein why American structuralism does not end with Chomsky but begins with him how Bloomfield managed to read Saussure as a behaviourist avant la lettre why in the long run Skinner has emerged victorious over Chomsky how Whorf was directly influenced by the mystical writings of Madame Blavatsky how the Whitney Max Müller debates in the 19th century connect to the intellectual disparity between Chomsky's linguistic and political writings

The Emergence of Semantics in Four Linguistic Traditions Wout Jac. van Bekkum, Jan Houben, Ineke Sluiter, Kees Versteegh, 1997-04-03 The aim of this study is a comparative analysis of the role of semantics in the linguistic theory of four grammatical traditions Sanskrit Hebrew Greek Arabic If one compares the organization of linguistic theory in various grammatical traditions it soon turns out that there are marked differences in the way they define the place of semantics within the theory In some traditions semantics is formally excluded from linguistic theory and linguists do not express any opinion as to the relationship between syntactic and semantic analysis In other traditions the whole basis of linguistic theory is semantically orientated and syntactic features are always analysed as correlates of a semantic structure However even in those traditions in which semantics falls explicitly or implicitly outside the scope of linguistics there may be factors forcing linguists to occupy themselves with the semantic dimension of language One important factor seems to be the presence of a corpus of revealed sacred texts the necessity to formulate hermeneutic rules for the interpretation of this corpus brings semantics in through the back door

And He Knew Our Language Marcus Tomalin, 2011 This ambitious and ground breaking book examines the linguistic studies produced by missionaries based on the Pacific Northwest Coast of North America and particularly Haida Gwaii during the late nineteenth and early twentieth centuries Making extensive use of unpublished archival materials the author demonstrates that the missionaries were responsible for introducing many innovative and insightful grammatical analyses Rather than merely adopting Graeco Roman models they drew extensively upon studies of non European languages and a careful exploration of their scripture translations reveal the origins of the Haida sociolect that emerged as a result of the missionary activity The complex interactions between the missionaries and anthropologists are also discussed and it is shown that the former sometimes anticipated linguistic analyses that are now incorrectly attributed to the latter Since this book draws upon recent work in theoretical linguistics religious history translation studies and anthropology it emphasises the unavoidably interdisciplinary nature of Missionary Linguistics research

200 Years of Syntax Giorgio Graffi, 2001 This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s Relying on the detailed analysis of a large amount of original sources it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century Moreover it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion and deeply influenced current research

programs The wealth of research undertaken over the last two centuries is presented here in a systematic way taking as its starting point the relationship of syntax with psychology throughout this period The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools

History of Linguistics 2008 Gerda Hassler, Gesina Volkmann, 2011 This volume contains a selection of papers presented at the 11th International Conference on the History of the Language Sciences Potsdam 2008 which are especially representative of the concerns of the conference and its thematic range The reflection about language and the individual languages has characterized cultures since ancient times and has brought forth different traditions of the language sciences The contributions cover the period from antiquity to contemporary history In addition to terminological and social history approaches they also include research results based on corpora or which reconstruct theoretical approaches More than other scholars linguists are turning to the history of their science for answers to current questions This underscores the value of the history of language sciences for understanding the present state of linguistics and its development Interdisciplinarity necessary for the research of many issues and manifestations of language makes historical reflections on the disciplines indispensable

Limiting the Arbitrary John Earl Joseph, 2000 The idea that some aspects of language are natural while others are arbitrary artificial or derived runs all through modern linguistics from Chomsky's GB theory and Minimalist program and his concept of E and I language to Greenberg's search for linguistic universals Pinker's views on regular and irregular morphology and the brain and the markedness based constraints of Optimality Theory This book traces the heritage of this linguistic naturalism back to its locus classicus Plato's dialogue Cratylus The first half of the book is a detailed examination of the linguistic arguments in the Cratylus The second half follows three of the dialogue's naturalistic themes through subsequent linguistic history natural grammar and conventional words from Aristotle to Pinker natural dialect and artificial language from Varro to Chomsky and invisible hierarchies from Jakobson to Optimality Theory in search of a way forward beyond these seductive yet spurious and limiting dichotomies

Kant's Prolegomena Peter Thielke, 2021-10-21 Explores the distinctive features of the Prolegomena and casts Kant's critical philosophy in a new light

Essays in the History of Linguistic Anthropology Dell H. Hymes, 1983 Anthropology and linguistics as historically developing disciplines have had partly separate roots and traditions In particular settings and in general the two disciplines have partly shared partly differed in the nature of their materials their favorite types of problem the personalities of their dominant figures their relations with other disciplines and intellectual current The two disciplines have also varied in their interrelation with each other and the society about them Institutional arrangements have reflected the varying degrees of kinship kithship and separation Such relationships themselves form a topic that is central to a history of linguistic anthropology yet marginal to a self contained history of linguistics or anthropology as either would be conceived by most authors There exists not only a subject matter for a history of linguistic anthropology but also a definite need

Missionary Linguistics IV / Lingüística misionera IV Otto Zwartjes, Ramón Arzápalo Marín, Thomas C.

Smith-Stark, 2009-05-05 This fourth volume on Missionary Linguistics focuses on lexicography It contains a selection of papers derived from the Fifth International Conference on Missionary Linguistics held in Mérida Yucatán Mexico 14th-17th March 2007 As with the previous three volumes 2004 on general issues 2005 on orthography and phonology and 2007 on morphology and syntax this volume looks at the lexicographical production of missionaries in general the influence of European sources such as Ambrogio Calepino and Antonio de Nebrija translation theories attitudes toward non Western cultures trans and interculturality semantics morphological analysis and organizational principles of the dictionaries such as styles and structure of the entries citation forms etc It presents research into languages such as Maya Nahuatl Tarasco Purpecha Lushootseed Equatorian Quechua Tupinambá Ilocan Tamil and Southern Min Chinese dialects Toward a Historiography of Linguistics E.F.K. Koerner, 1978-01-01 The papers brought together in the present volume represent the essence of the author's reflections on issues concerning linguistic historiography and of particular investigations in 19th and 20th century linguistic thought The papers are clustered in three sections I Towards a Historiography of Linguistics II Appraisals of Individual Scholars and III Trends and Traditions in Linguistics **Etymology and Grammatical Discourse in Late Antiquity and the Early Middle Ages** Mark E. Amsler, 1989-01-01 This study focuses on the uses of the grammatical concept of etymologia in primarily Latin writings from the early Middle Ages Etymologia is a fundamental procedure and discursive strategy in the philosophy and analysis of language in early medieval Latin grammar as well as in Biblical exegesis encyclopedic writing theology and philosophy Read through the frame of poststructuralist analysis of discourse and the philosophy of science the procedure of the ars grammatica are interpreted as overlapping genres commentary glossary encyclopedia exegesis which use different verbal or extraverbal criteria to explain the origins and significations of words and which establish different epistemological frames within which an etymological account of language is situated The study also includes many translations of heretofore untranslated passages from Latin grammatical and exegetical writings **Declinatio** Daniel J. Taylor, 1974-01-01 Marcus Terentius Varro 116-27 B.C. was one of the most prolific writers in antiquity However of his De Lingua Latina only six of 25 books have survived and these are neither complete nor free of textual corruption This study is an attempt to provide an adequate consistent and comprehensive account of the linguistic theory with which Varro operated insofar as it can be recovered from the remains of De Lingua Latina *The History of Linguistics in Spain* Antonio Quilis Morales, Hans-Josef Niederehe, 1986-01-01 This selection of papers is concerned with the history of linguistics in Spain dealing with the evolution of linguistic ideas from the Middle Ages and the European context of the linguistic debates in Spain to the 20th century concluding with Malkiel's appraisal of Ramón Menéndez Pidal 1869-1968 The volume includes papers on Antonio Nebrija and Sanctius probably the best known

grammarians of the Iberian peninsula but as the other papers suggest there is much more to be known about the Spanish linguistic traditions The papers in this volume were previously published in *Historiographia Linguistica* XI 1 2 1984
