Speculative Notes And Notes On Speculation Ideal And Real Reprints Of Economic Classics:

Victorian Literature and Finance Francis O'Gorman, 2007-03-22 This book analyses relationships between writing and the financial structures of the 19th century What emerges is a remarkable set of imaginative connections between literature and Victorian finance including women and the culture of investment the profits of a media age and the uncomfortable relationship between literary and financial capital **Economics Selections** ,1970 日本経済選集(Japan),1972

the center of American literary history to consider the important intersections between economics and literature By studying
Hamilton as an economic and imaginative writer it argues that we can recast the conflict with the Jeffersonians as a literary
debate about the best way to explain and describe modern capitalism and explores how various other literary forms allow us
to comprehend the complexities of a modern global economy in entirely new ways Speculative Fictions identifies two
overlooked literary genres of the late eighteenth century as exemplary of this narrative mode It asks that we read periodical
essays and Black Atlantic captivity narratives with an eye not towards bourgeois subject formation but as descriptive
analyses of economic systems In doing so we discover how these two literary genres offer very different portraits of a global
economy than that rendered by the novel the imaginative genre we are most likely to associate with modern capitalism
Developing an aesthetic appreciation for the speculative digressive and unsystematic plotlines of these earlier narratives has
the capacity to generate new imaginative projects with which to make sense of our increasingly difficult economic world
