Speech and Language Norman J. Lass, 2014-06-28 Speech and Language Volume 2 Advances in Basic Research and Practice is a compendium of papers that discusses the processes and pathologies of speech and language such as functional articulation disorders lexical development and a group therapy for treating stuttering Some papers deal with vocal fold vibrations childhood homonymy framework for conversational speech behaviors and vibrotactile testing One paper cites studies of Hersen and Barlow 1976 that treatments warrant consideration only if these are powerful enough to effect obvious gains and of Gilbert McPeek and Mosteller 1977 that treatment research is more likely to give modest than substantial gains the degree of gains which can also be difficult to detect Another paper examines suggestions for teaching words to language disordered children that when knowledge of normal language processes is applied in training approaches effective and individualized programs will follow Used in the treatment of stuttering the Shaping Group which employs action and many other treatment models shows that its approach is effective Another paper notes that before a surgical correction of voice disorders is undertaken the importance of knowing the possible effects of various procedures on the voice should first be known The compendium is well suited for linguists ethnologists psychologists speech therapists and researchers whose works involve linguistics learning communications corrective surgery and syntax Phonological Development and **Disorders in Children** Zhu Hua, Barbara Dodd, 2006-01-01 This volume brings together a collection of empirical studies on phonological acquisition and disorder of monolingual children speaking different languages English German Putonghua Cantonese Maltese Telugu Colloquial Egyptian Arabic and Turkish and bilingual children speaking different language pairs Spanish English Cantonese English Mirpuri Punjabi Urdu English Welsch English Arabic English and Putonghua Cantonese The research findings provide much needed baseline information for clinical assessment and diagnosis as well as valuable evidence concerning theories of language acquisition and the role of the ambient language Phonological Development in Specific Contexts Zhu Hua, 2002-01-01 This is the first book length study of phonological development and impairment of Chinese speaking children It provides the first normative data on this population which will be of value to speech and language therapists and other professionals It also advances the notion of phonological saliency which explains the cross linguistic similarities and differences in children's phonological development **Reading Acquisition** Philip B. Gough, Linnea C. Ehri, Rebecca Treiman, 2017-11-27 Originally published in 1992 This book brings together the work of a number of distinguished international researchers engaged in basic research on beginning reading Individual chapters address various processes and problems in learning to read including how acquisition gets underway the contribution of story listening experiences what is involved in learning to read words and how readers represent information about written words in memory In addition the chapter contributors consider how phonological onset rime and syntactic awareness contribute to reading acquisition how learning to spell is involved how reading ability can be explained as a combination of

decoding skill plus listening comprehension skill and what causes reading difficulties and how to study these causes

Perspectives on the Coordination of Movement S.A. Wallace,1976-01-01 Is there a right way to study coordination What experimental paradigms are appropriate Are there laws and principles that the biological system uses to coordinate movement Do all biological systems human and otherwise share these same principles Is coordination inherited or acquired Is it a central nervous system muscular or mechanical problem Indeed what is coordination and how can it be quantified This volume attempts to help to answer some of these questions by bringing together a collection of conceptual approaches to and empirical investigations of the coordination of movement The authors of the chapters are well known and respected researchers from a variety of disciplines New theoretical developments such as in synergetics and dynamic pattern formation are presented together with extensive reviews and new experimental work on infant motor behavior and the coordination of prehension multi limb gait and speech movement The volume contains perspectives on the problem of movement coordination relevant to various disciplines such as psychology biology engineering and robotics physical education physical therapy kinesiology and physiology and so will be of interest to all students and scientists working in such fields

Investigating Second Language Acquisition Josine A. Lalleman, 1996 The book concerns theoretical interdisciplinary and methodological issues in L2 acquisition research It gives an accurate and up to date overview of high quality work currently in progress in research methodology processing principles and parameters theory phonology the bilingual lexicon input and instruction The volume will have the purpose of a handbook for teachers students and researchers in the area of second language acquisition The aim is to provide the reader with an acquisition perspective on processes of second and foreign language learning The Handbook of Pediatric Audiology Sanford E. Gerber, 2001 A handbook for professionals and advanced students in pediatrics and audiology After introductory chapters defining hearing loss in terms of pathology and epidemiology material covers otolaryngic assessment speech audiometry acoustic immittance testing otoacoustic emission in newborns infants toddlers and children cochlear implants counseling families of hearing impaired children and pediatric audiology service delivery models Annotation copyright by Book News Inc Portland OR Language Change Leiv E. Breivik, Ernst H. Jahr, 2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from

different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing **Progression and Regression in Language** Kenneth Hyltenstam, Ake Viberg, 1993 First published in 1994 this crosslinguistic collection looks at changes and developments in language involving gain or loss in structural complexity or utility The dynamics of these processes of progression and regression are examined at the societal and the individual level and the two are compared In the former the focus is on the social and cultural forces that influence groups of speakers to create new languages or abandon old ones In the latter the acquisition and attrition of both first and second languages are considered Questions raised include Can parallel structural patterning be observed in whole languages and in the individual s version of a language Is there parallelism between progression and regression Can changes occurring in progression and regression be interpreted in a typological framework These are addressed from sociological neuropsychological and linguistic Textbook of Developmental Pediatrics Marvin I. Gottlieb, Janice E. Williams, 2013-11-11 Child adolescent perspectives development and behavior have been a traditional concern of primary health care providers However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medi cal knowledge During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of compre hensive health care for children The influence of public advocacy groups topic dedicated journals national professional specialty societies subject related continuing education programs and federal legislation PL94 142 has served to crystallize developmental behavioral pediatrics as a specialized field of study As a consequence during the past ten years significant modifications have restructured medical student and pediatric resi dent education providing an emphasis on developmental behavioral issues. The focus on neurodevelopmental educational and psychosocial issues reflects changing priorities in traditional health care for children The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology child psychiatry and general pediatrics As a result there has been some confusion in demarcating professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have been designed for prevention diagnosis and management **Linguistic Structure** and Change Thomas Berg, 1998 Thomas Berg challenges context free theories of linguistics he is concerned with the way the term explanation is typically used in the discipline He argues that real explanations cannot emerge from a view which asserts the autonomy of language but only from an approach which seeks to establish a connection between language and

the contexts in which it is embedded The author examines the psychological context in detail He uses an interactive activation model of language processing to derive predictions about synchronic linguistic patterns the course of linguistic change and

the structure of poetic rhymes The majority of these predictions are borne out leading the author to conclude that the structure of language is shaped by the properties of the mechanism which puts it to use and that psycholinguistics thus qualifies as one likely approach from which to derive an explanation of linguistic structure

**Language** Frederick J. Newmeyer, 1988 Linguistics The Cambridge Survey is a comprehensive introduction to current research in all branches of the field of linguistics from syntactic theory to ethnography of speaking from signed language to the mental lexicon from language acquisition to discourse analysis Each chapter has been written by a specialist particularly distinguished in his or her field who has accepted the challenge of reviewing the current issues and future prospects in sufficient depth for the scholar and with sufficient clarity for the student Each volume can be read independently and has a particular focus Volume I covers the internal structure of the language faculty itself while Volume II considers the evidence for and the implications of a generativist approach to language Psycholinguistics and neurolinguistics are covered in Volume III and Volume IV concentrates on sociolinguistics and the allied fields of anthropological linguistics and discourse and conversation analysis Several of the chapters in the work concentrate on the interface between different aspects of linguistic theory or the boundaries between linguistic theory and other disciplines. Thus in both its scope and in its approach the Survey is a unique and fundamental reference work It undoubtedly fulfills the editor's aims of providing a wealth of information insight and ideas that will excite and challenge all readers with an interest in linguistics The Genesis of Language Marge E. Landsberg, 2011-06-01 No detailed description available for The Genesis of Language Second Language Pronunciation Ubiratã Kickhöfel Alves, Jeniffer Imaregna Alcantara de Albuquerque, 2022-12-19 In the field of second language L2 acquisition the number of studies focusing on L2 pronunciation instruction and perceptual production training has increased as new classroom methodologies have been proposed and new goals for L2 pronunciation have been set This book brings together different approaches to L2 pronunciation research in the classroom or in the language laboratory 13 chapters written by well known researchers focusing on a variety of first and target languages are divided into four parts Pronunciation development and intelligibility implications for teaching and training studies L2 pronunciation teaching L2 pronunciation training implications for the classroom and Pronunciation in the laboratory High Variability Phonetic Training Intended for researchers in the fields of second language acquisition phonetics phonology psycholinquistics speech therapies speech technology as well as second language teaching this book not only summarizes the current research questions on L2 pronunciation teaching and training but also predicts future scenarios for both researchers and practitioners in the field

**Comprehending Oral and Written Language** Rosalind Horowitz, S. Jay Samuels, 2023-10-16 Written for researchers and graduate students this book a collection of essays by cognitive scientists socio and psycholinguists and English reading and language arts educators explores theoretical and research questions associated with the relationships among oral and

written language listening and reading and speaking and writing The four parts of the book are designed to highlight critical contrasts The Language of Spoken and Written Discourse Processing Strategies Rhetorical Social Situational and Contextual Constraints Processing Strategies Perceptual and Cognitive Demands in Listening and Reading and The Acquisition of Literacy and Schooling The thirteen chapters consist of 1 Comprehending Oral and Written Language Critical Contrasts for Literacy and Schooling Rosalind Horowitz and S Jay Samuels 2 Spoken and Written Modes of Meaning M A K Halliday 3 Properties of Spoken and Written Language Wallace Chafe and Jane Danielewicz 4 Rhetorical Structure in Discourse Processing Rosalind Horowitz 5 Episodic Models in Discourse Processing Teun A van Dijk 6 The Role of Context in Written Communication Martin Nystrand 7 Listening and Reading Processes in College and Middle School Age Readers David J Townsend Caroline Carrithers and Thomas G Bever 8 Prosody and Structure in Children's Syntactic Processing Peter A Schreiber 9 Processing Strategies for Reading and Listening Joseph H Danks and Laurel J End 10 Factors That Influence Listening and Reading Comprehension S Jay Samuels 11 From Meaning to Definition A Literate Bias on the Structure of Word Meaning Rita Watson and David R Olson 12 Language Speech and Print Some Asymmetries in the Acquisition of Literacy Charles A Perfetti and 13 A Comparison of the Two Theories about Development in Written Language Implications for Pedagogy and Research Sandra Stotsky MM Distributed Language Stephen J. Cowley, 2011 The volume presents language as fully integrated with human existence On this view language is not essentially symbolic not represented inside minds or brains and most certainly not determined by micro social rules and norms Rather language is part of our ecology It emerges when bodies co ordinate vocal and visible gesture to integrate events with different histories Enacting feeling expression and wordings language permeates the collective individual and affective life of living beings It is a profoundly distributed multi centric activity that binds people together as they go about their lives Distributed Language pursues this perspective both theoretically and in relation to empirical work Empirically it reports studies on the anticipatory dynamics of reading its socio cognitive consequences Shakespearean theatre what images evoke in brain and word and solving insight problems Theoretically the volume challenges linguistic autonomy from overlapping theoretical positions First it is argued that language exploits a species specific form of semiotic cognition Second it is suggested that the central function of language lies in realizing values that derive from our ecosystemic existence Third this is ascribed to how cultural and biological symbols co regulate the dynamics that shape human activity Fourth it is argued that language far from being organism centred gives us an extended ecology in which our co ordination is saturated by values and norms that are derived from our sociocultural environment The contributions to this volume expand on those originally published in Pragmatics Cognition 17 3 2009 Critical Essays on Language Use and Psychology ,2012-12-06 Ragnar Rommetveit University of Oslo Let me start this introduction to Professor O Connell's Critical essays on language use and psychology with some reflections on psychologists and crabs It so happens that the first professor of psychology in Norway had the middle name

Krabbe Crab His full name was Harald Krabbe Schjelderup Hence the crab became our symbol for the psychologist For many years a crab feast was held every autumn in Oslo in order to celebrate the material union of crabs and psychologists and ponder symbolically and metaphorically their shared fate A comparison between the predicament of the crab and that of the modern psychologist may indeed be illuminating once we make certain assumptions about their unique epistemic missions and systematically explore the severe constraints on their heroic search for knowledge The crab is ordained to unravel the mysteries of the ocean yet doomed to crawl sidewise on the is most of the time mollusks and bottom His catch alas cadavers of sea creatures and he cannot help envying the fish swimming freely above him The psychologist s mission is to unravel the mysteries of His obligation to seek insight into essential the human soul Connectionist Approaches to Natural Language Processing R G Reilly, Noel Sharkey, 2016-07-22 Originally published in 1992 when connectionist natural language processing CNLP was a new and burgeoning research area this book represented a timely assessment of the state of the art in the field It includes contributions from some of the best known researchers in CNLP and covers a wide range of topics The book comprises four main sections dealing with connectionist approaches to semantics syntax the debate on representational adequacy and connectionist models of psycholinquistic processes. The semantics and syntax sections deal with a variety of approaches to issues in these traditional linguistic domains covering the spectrum from pure connectionist approaches to hybrid models employing a mixture of connectionist and classical AI techniques The debate on the fundamental suitability of connectionist architectures for dealing with natural language processing is the focus of the section on representational adequacy The chapters in this section represent a range of positions on the issue from the view that connectionist models are intrinsically unsuitable for all but the associationistic aspects of natural language to the other extreme which holds that the classical conception of representation can be dispensed with altogether The final section of the book focuses on the application of connectionist models to the study of psycholinguistic processes. This section is perhaps the most varied covering topics from speech perception and speech production to attentional deficits in reading An introduction is provided at the beginning of each section which highlights the main issues relating to the section topic and puts the constituent Handbook of Child Language Disorders Richard G. Schwartz, 2010-10-18 The Handbook chapters into a wider context of Child Language Disorders provides an in depth comprehensive and state of the art review of current research concerning the nature assessment and remediation of language disorders in children The book includes chapters focusing on specific groups of childhood disorders SLI autism genetic syndromes dyslexia hearing impairment the linguistic perceptual genetic neurobiological and cognitive bases of these disorders and the context of language disorders bilingual across dialects and across languages To examine the nature of deficits their assessment and remediation across populations chapters address the main components of language morphology syntax semantics and pragmatics and related areas processing memory attention executive function such as reading and writing Finally even though there is extensive information regarding

research and clinical methods in each chapter there are individual chapters that focus directly on research methods This Handbook is a comprehensive reference source for clinicians and researchers and can be used as a textbook for undergraduate masters and doctoral students in speech language pathology developmental psychology special education disabilities studies neuropsychology and in other fields interested in children's language disorders
