

## SOVIET PRESIDENT MIKHAIL GORBACHEV – SPEECH IN MURMANSK AT THE CEREMONIAL MEETING ON THE OCCASION OF THE PRESENTATION OF THE ORDER OF LENIN AND THE GOLD STAR TO THE CITY OF MURMANSK

Murmansk, 1 October 1987

*"The community and interrelationship of the interests of our entire world is felt in the northern part of the globe, in the Arctic, perhaps more than anywhere else. For the Arctic and the North Atlantic are not just the "weather kitchen", the point where cyclones and anticyclones are born to influence the climate in Europe, the USA and Canada, and even in South Asia and Africa.*

*I would like to invite, first of all, the countries of the region to a discussion on the burning security issues.*

*The potential of contemporary civilization could permit us to make the Arctic habitable for the benefit of the national economies and other human interests of the near-Arctic states, for Europe and the entire international community.*

*Let the North of the globe, the Arctic, become a zone of peace. Let the North Pole be a pole of peace."*

## Speech In Murmansk:

The Speech in Murmansk Mikhail Sergeevich Gorbachev,1987      The Arctic Großraum Christopher R Rossi,2025-09-04  
How should the Arctic be viewed in the 21st century In this book a leading commentator assesses the competing players for the Arctic looking at broad questions of governance and security The author challenges the view that the Arctic is a passive space which is the focus of competitive advances from superpowers arguing that it is more correctly understood as a dynamic pluriverse Drawing on international law international relations and diplomacy this is an important re assessment of the Arctic and its position in geo politics      **The Soviet Arctic** Pier Horensma,1991 The first book to consider Soviet policy in this area from an historian s point of view Horensma assesses the significance of historical precedents for polar sovereignty      **Encyclopedia of the Arctic** Mark Nuttall,2005-09-23 With detailed essays on the Arctic s environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment      *Reluctant Conquest* Kathryn C. Lavelle,2025-06-10 A comprehensive history of U S involvement in the Arctic from the American Revolution through the acquisition of Alaska to the present day What drives American foreign relations in the Arctic It is difficult to give a unified answer to this question because most histories of the region are divided between the Atlantic and Pacific coasts Asian and European strategic interests or federal government and Indigenous peoples concerns making it difficult to understand the connections among the environmental challenges scientific understandings strategic calculations and governance relationships Most Americans do not think of their country as an Arctic power yet it is a region where the United States has had important ties throughout its history In this sweeping study from the founding of the country through the acquisition of Alaska to the present Kathryn C Lavelle considers American relations across the circumpolar North incorporating discussions of economics national security and science that are conventionally separated Lavelle argues that it is impossible to understand U S policy without a knowledge of American political development and of how scientific understandings have grown alongside studies of climate and other environmental issues This history has important implications for future American policy regarding traditional national security and political economy in addition to climate change and environmental cooperation      **Lessons From The Arctic** Emily Tsui,Thomas S Axworthy,Sara French,2020-08-06 Lessons from the Arctic The Role of Regional Government in International Affairs is a collection of articles written by twenty six leading and emerging scholars from across the circumpolar region Each author assesses and explores the processes of regional governance in the Arctic from an interdisciplinary perspective The topics

include Indigenous internationalism paradiplomacy federalism global institution building and more *Iceland's Arctic Policies and Shifting Geopolitics* Valur Ingimundarson, 2024-11-26 This book examines the role of the Arctic in Iceland's foreign and security policies from the end of the Cold War to the present Based on extensive research and drawing on approaches from the fields of history and international relations it shows that Iceland's Arctic policies have gone through multiple phases during this period all of which have been heavily influenced by external geopolitical factors including its relationship with the United States the 2008 financial crisis the rise of China and the Ukrainian crisis It also demonstrates how Iceland's strategic position in the North Atlantic has important repercussions for the United States Russia and China With an emphasis on geopolitics nation branding and governance this book will appeal to scholars and students of Arctic policies geopolitics and international relations *Gorbachev's Murmansk Speech* David Scrivener, 1989 *The Polar Regions and the Development of International Law* Donald Rothwell, 1996-11-13 A review of international law in the polar regions and its importance to the environment and to international relations **From Northeast Passage to Northern Sea Route**, 2022-09-12 The notion of a waterway north of Eurasia conceived in the first half of the sixteenth century remained only a dream for centuries due to ice unmapped coastlines and a lack of geographical knowledge This volume is the first comprehensive scholarly account in English of the slow but steady exploration and commercial exploitation of the Siberian coastal waters and it proves that this was a truly international endeavour However in the end the Northern Sea Route as a through traverse route came to be used primarily by the Soviet Union for which it became a crucial vehicle for the geopolitical and economic integration of its vast territories As an international trade route the Northern Sea Route is only today about to win its way essentially as a result of global warming This being the case should we rejoice or despair

**International Governance of the Arctic Marine Environment** Lilly Weidemann, 2014-04-09 The Arctic is particularly affected by climate change over the past few decades temperatures in this area have risen twice as fast as the mean global rate The most prominent effect of global climate change in the region is the melting sea ice in the Arctic Ocean which enables a multitude of ocean uses to be initiated and extended such as shipping fishing and oil and gas extraction Unlike in the Antarctic there is currently no single comprehensive legal regime for governance of the Arctic Instead the region is regulated by a patchwork of international treaties above all the United Nations Convention on the Law of the Sea UNCLOS various regional and sub regional agreements national laws and soft law agreements This treatise provides an evaluation of the governance regime that regulates the use of the Arctic marine environment and its readiness to protect these fragile ecosystems in light of the consequences of climate change **Developments in Europe**, 1986 **Maritime Claims in the Arctic** Erik Franckx, 2023-12-28 With the fundamental changes which occurred in the political structure of Europe and improved East West relations in general the Arctic has increasingly become the focal point of international attention during the last few years Scientific research and environmental protection are areas which have already witnessed some form of

international cooperation in the area With this particular evolution in mind a new look at the legal regime of navigation in the Arctic seems to be justified While several other countries border on the Arctic Canada and Russia have the most extensive shorelines and have shown keen interest in ensuring that their proper share of this area is not encroached by other countries This book is thus generally restricted to an examination of the maritime boundaries that these states are claiming and the extent to which other states have recognized them It also explores the need for greater international cooperation in this area not only between the two main contenders but also with other countries that have shown a special interest in Arctic navigation and in the exploitation of resources of this area *Governing Complexity in the Arctic Region* Mathieu Landriault, Andrew Chater, Elana Wilson Rowe, P. Whitney Lackenbauer, 2019-10-28 This book examines emerging forms of governance in the Arctic region exploring how different types of state and non state actors promote and support rules and standards The authors argue that confining our understandings of Arctic governance to Arctic states and a focus on the Arctic Council as the primary site of circumpolar governance provides an incomplete picture Instead they embrace the complexity of governance in the Arctic by systematically analyzing and comparing the position interventions and influence of different actor groups seeking to shape Arctic political and economic outcomes in multiple sites of Arctic politics both formal and informal This book assesses the potential that sub national governments corporations civil society organizations Indigenous peoples and non Arctic states possess to develop norms and standards to ensure a stable rule based Arctic region It will be of interest to all scholars and students working in the fields of Arctic Sovereignty Security Studies Global Governance and International Political Economy **The Current Digest of the Soviet Press**, 1989-08 *Peripheral Visions* Ted Hopf, 1994 Thus the United States became involved militarily in various Third World conflicts more to deter the Soviet Union than to protect any specific U S interest *Peripheral Visions* argues that this policy was unnecessary and counterproductive The Politics of Global Ocean Regions Christian Bueger, Elizabeth Mendenhall, Rebecca Strating, 2025-07-08 The oceans are not just vast expanses of blue but dynamic political spaces shaped by complex regional dynamics In this fascinating study the authors advance a novel analytical framework for the study of the politics of global ocean regions They shed new light on the complex interactions in ocean spaces such as the Arctic Indo Pacific or Indian Ocean Written by leading experts in different ocean regions the book demonstrates how important yet diverse and complex regional maritime politics are Its emphasis on the emergence organization and effects of global ocean regions provides a useful framework for guiding future research The book will be essential reading for students and analysts interested in regionalism the oceans and the governance of global commons Society, Environment and Human Security in the Arctic Barents Region Kamrul Hossain, Dorothée Cambou, 2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments The threats arising out of these pressures result in human security challenges This book analyses the formation and promotion of societal

security within the context of the Arctic Barents Region It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today The study explores human security dimensions such as environmental security economic security health food water energy communities political security and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future In doing so the book develops a comprehensive analysis of vulnerabilities challenges and needs in the Barents Region and provides recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities This book will be a valuable tool for academics policy makers and students interested in environmental and human security sustainable development environmental studies and the Arctic and Barents Region in particular
