with fourteen other essays both published and previously unpublished in which he explores further some of the themes of his seminal book. With the revival of interest among philosophers and others in the relationships between art and morality, the publication of this material is especially timely. Beardsmore's original contribution first introduced the principal terminology in which discussions have been expressed, and many of the later essays showed the influence of Wittgenstein. The publication of this anthology of his writings on these themes has been welcomed by others writing on the same or related themes.

The Art of Status Jelena Subotic, Professor of Political Science Jelena Subotic, 2025-10-09 An illuminating exploration of the relationship between the restitution of looted art, global status, and the international construction of national cultural heritage. Why is art restitution a matter of politics? How does the artwork displayed in national museums reflect the international status of the state that owns it? Why do some states agree to return looted art and others resist? National art collections have long been a way for states to compete with each other for status, prestige, and cultural worth in international society. In many former imperial nations, however, these collections include art looted during imperial expansions and colonial occupations. While this was once a sign of high international standing, the markers of such status, particularly in the context of art, have since significantly changed. A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s. Since then, there have been national and global social movements demanding the return of looted art. This shift has established not only that looting is wrong, but more importantly, that restitution is morally right. As a result of this reframing of what it means to own art, an artifact's historical provenance has become a core element of its value, and the search for provenance and demands for restitution a direct threat to state status. The same objects that granted states high international status now threaten to provoke status decline. In *The Art of Status*, Jelena Subotic examines this relationship between the restitution of looted art and international status, with a focus on the Parthenon Elgin Marbles, the Benin Bronzes, and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum. Subotic tells the story of these artworks: how they were looted, how they ended up on display in national museums, and how the art restitution disputes have unfolded. While these cases are different in terms of their historical context of looting and ownership claims, the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states' desire for international status and prestige. An in-depth and nuanced account of art restitution disputes. *The Art of Status* illuminates the shifting political significance of art on the international stage, from ownership to restitution.

The Art of Deliberating Giovanni Boniolo, 2012-08-18 How many citizens take part in moral and political

decisions concerning the results obtained by the contemporary life sciences Should they blindly follow skilled demagogues or false and deceptive leaders Should they adhere to the voice of the majority or should they take a different decisional path Deliberative democracy answers these questions but what is deliberative democracy Can we really deliberate if we are completely ignorant of the relevant issue What about ethical or political expertise is it strictly necessary Finally and most significantly can a deliberative process take place if we ignore the techniques governing it that is the techniques required to be minimally skilled in rational argumentation Giovanni Boniolo goes back to the historical and theoretical foundations of deliberation showing us with some irony that deliberation is a matter of competence and not just a matter of a right to decide His conclusion might not delight everyone anyone who is not sufficiently acquainted with the subject matter or lacks the sufficient deliberative competence ought not be admitted to deliberative discussions This restriction makes both good deliberation and a proper deliberative democracy possible otherwise debate degenerates into demagoguery and hypocrisy

Can't We Make Moral Judgements? NA NA, 2016-04-30 In this book Mary Midgely turns a spotlight on the fashionable view that we no longer need or use moral judgements She shows how the question of whether or not we can make moral judgements must inevitably affect our attitudes to the law and its institutions but also to events that occur in our daily lives

Munro and the Art of Time Laura K. Davis, 2025-08-25 Alice Munro and the Art of Time reveals how one of the world s greatest writers of short stories challenged and reconfigured traditional assumptions about time In chapters that analyze selected stories and collections from across Munro s career Laura K Davis examines the formal and conceptual function of temporality in Munro s oeuvre considering the relationship between the past and the present material experiences of being story structure memory and memoir Clear and compelling interpretations of Munro s stories offer insights into her writing process her representations of character and setting and the complexities of her narrative techniques which often evade linearity and chronology emphasizing instead revision repetition and the body By highlighting the connections between time and various tropes in Munro s stories including identity ephemerality and environmental change this study provides new exciting avenues for engaging with Munro s work The Art of Art History Donald Preziosi, 1998 What is art history Why how and where did it originate and how have its aims and methods changed over time The history of art has been written and rewritten since classical antiquity Since the foundation of the modern discipline of art history in Germany in the late eighteenth century debates about art and its histories have intensified Historians philosophers psychologists and anthropologists among others have changed our notions of what art history has been is and might be This anthology is a guide to understanding art history through a critical reading of the field s most innovative and influential texts over the past two centuries Each section focuses on a key issue aesthetics style history as an art iconography and semiology gender modernity and postmodernity deconstruction and museology More than thirty readings from writers as diverse as Winckelmann Kant Gombrich Warburg Panofsky Heidegger Lisa Tickner Meyer Schapiro Jacques Derrida Mary Kelly Michel Foucault Rosalind Krauss Louis Marin Margaret Iversen and Nestor Canclini are brought together and Donald Preziosi s introductions to each topic provide background information bibliographies and critical elucidations of the issues at stake His own concluding essay is an important and original contribution to scholarship in the field From the pre publication reviews Until now anthologies about the history of art have tended to be worthy yet inert plotting a linear evolution from the great precursors Vasari Winckelmann to the founding fathers of the modern discipline Wofflin Riegl Panofsky to the achievements and refinements of today s scholarship The texts that Donald Preziosi has brought together provide something far more challenging the juxtapositions and alignments between individual essays point the reader towards unresolved problems ongoing debates and paths not taken or not taken yet In place of the consoling tale of intellectual progress the collection defamiliarizes the whole field and opens up a space for radical reflection on its basic procedures and assumptions Definitely

the best introduction to art history currently available Professor Norman Bryson Harvard University Donald Preziosi has prepared an anthology from the Greek a collection of flowers of art history His bouquet contains representatives from the discipline's two hundred year history arranged in standard and innovative methodological categories Within each the readings selected provide stimulating congruencies and contradictions that will inspire productive debate and contemplation But what makes this anthology more than an arresting assemblage is the author's critical stance toward what he has wrought His introduction and concluding chapter write around and under the subjects presented emphasizing the art of art history its kinship with modernity's post Enlightenment project and its collaboration with the rise of nationalism Thus the discipline's past is probed and questioned and made relevant for its present and future The whole thereby addresses without healing or concealing the disciplinary ruptures of modernism The book might also have explored further nature of art history's history within the emergent discourse of post colonialism and the globalization of culture Yet the many new perspectives it does offer help to re present the discipline for its readers students teachers and curators for other areas of humanistic inquiry which are being subject to similar critiques and for artists and the larger art community for whom history narrative and an accounting of art's past have once again become vital issues Professor Robert S Nelson Professor of Art History and Chair Committee for the History of Culture University of Chicago Rather than focusing on its Vasarian moment or on the later academic institutionalization of art history in the 19th and 20th centuries Donald Preziosi in *The Art of Art History* constructs a reading of this hegemonic and reductive practice of making the visible legible as one that is inextricably tied to the museographic paradigm of late 18th and early 19th centuries This shift he sees as equivalent in importance to the brought by the invention of perspective But the author goes further than to underline the implication of art history with the premises of modernity he makes a strong case in a vivid and inspiring prose for a tighter equation between art history and modernity an equation grounded in his insightful considerations and meteoric formulations of the epistemological setting rhetorical operations political colonialist aims and schizophrenic yet all invasive aestheticization of knowledge that in the last two centuries have fashioned what we will no longer dare to call the discipline of art history The result is a flamboyant book that offers anything but a celebratory reading of art history It does not constitute an articulation of canonical texts or an up to date menu of art historical currents methods or trends Yet it manages to avoid none of these dimensions Art history is not envisaged as the learned discourse of modernity on a specific class of objects nor is it reduced to a genealogy of outstanding artist subjects and their volatile constellations of contemporary subjects readers It becomes a practice wherein objects and subjects relate and relations often crystallize under the unrecognized aegis of the fetish this Other of art since Preziosi concisely defines art as the anti fetish fetish Far from the fantastic neutrality that is traditionally found in the format of such an historiographic endeavour Preziosi frames his selection of text and threads through them with an array of different strategic voices superimposed to stress a spatial figure he is keen to discern in order to elaborate a strong polemic position

that situates art history as an enduring and well disguised fictional genre In the process the author courageously takes on the paradox that is at the core of his project to introduce students to the coming out of art history as art one that is not necessarily meant to be our coming out of it but that certainly well establishes our motives to continue to shake its grounds and its multi storied apparatus Professor Johanne Lamoureux University of Montreal
