The Art of Politics James Brown, Philip M. Seib, 1976 **Electoral Strategies and Political Marketing** Shaun Bowler, David M. Farrell, 2016-07-27 Despite the central importance of elections to representative democracy there is no systematic study available of how exactly the parties wage their election campaigns Examining recent elections in nine countries across three continents these case studies all following a common framework are written by national experts and are based on detailed interviewing and research of the parties The book includes a lengthy introduction a comparative study on campaign effects and a detailed conclusion **The Electoral Challenge** Stephen C. Craig, David B. Hill, 2010-07-27 What decides elections Is it the national economic condition voters partisan attachments or the campaigns that candidates run How much do campaigns matter Scholars and political consultants will give you different answers Stephen C Craig and David B Hill bring together the voices of both in this engaging volume now updated to include the volatile and groundbreaking 2008 campaigns and elections Each chapter features an essay from a top scholar in the field followed by a response from political consultants Contributors bring to bear the best literature and empirical evidence to determine what we know about the factors that drive election outcomes all while inviting students to join in the conversation **Campaigns and Elections American Style** James A Thurber, 2018-04-19 Dramatic changes in political institutions and behavior over the past three decades have underscored the dynamic nature of American politics confronting political scientists with a new and pressing intellectual agenda The pioneering work of early postwar scholars while laying a firm empirical foundation for contemporary scholarship failed to consider how American politics might change or recognize the forces that would make fundamental change inevitable In reassessing the static interpretations fostered by these classic studies political scientists are now examining the underlying dynamics that generate transformational change Transforming American Politics is a series that brings together texts addressing four closely related aspects of change A first concern is documenting and explaining recent changes in American politics in institutions processes behavior and policymaking A second is reinterpreting classic studies and theories to provide a more accurate perspective on postwar politics The series looks at historical change to identify recurring patterns of political transformation within and across the distinctive eras of American politics Last and perhaps most important the series presents new theories and interpretations that explain the dynamic processes at work and thus clarify the direction of contemporary politics All of the books focus on the central theme of transformation transformation in both the conduct of American politics and in the way we study and understand its many aspects

Idea of Political Marketing Nicholas O. O'Shaughnessy, Stephan C.M. Henneberg, 2002-06-30 O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics. Particular attention was paid to the theory of political marketing with conceptual definitions developed to better facilitate communication between marketing professionals and political science researchers. Political marketing is about the making and unmaking of governments in a democracy. Despite its growing importance, the marketing academic profession has shown very little interest in the political ramifications of their discipline while political scientists often come to political marketing with the view that it is cosmetic if not trivial. O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics. As they show, elections are a persuasion task writ large, most especially with the demise of inherited class loyalties. Following elections, governments can employ marketing techniques to build support for their actions while opposition parties can press the government and its supporters through similar marketing approaches. Of particular interest to scholars, researchers, and policy makers involved with politics: political communication and the making of public policy.
