*A Daoist Theory of Chinese Thought* Chad Hansen, 2000-08-17. This ambitious book presents a new interpretation of Chinese thought guided both by a philosopher's sense of mystery and by a sound philosophical theory of meaning. That dual goal Hansen argues requires a unified translation theory. It must provide a single coherent account of the issues that motivated both the recently untangled Chinese linguistic analysis and the familiar moral-political disputes. Hansen's unified approach uncovers a philosophical sophistication in Daoism that traditional accounts have overlooked.

*Ancient China and Its Enemies* Nicola Di Cosmo, 2002. Relations between Inner Asian nomads and Chinese are a continuous theme throughout Chinese history. By investigating the formation of nomadic cultures by analyzing the evolution of patterns of interaction along China's frontiers and by exploring how this interaction was recorded in historiography, this looks at the origins of the cultural and political tensions between these two civilizations through the first millennium BC. The main purpose of the book is to analyze ethnic-cultural and political frontiers between nomads and Chinese in the historical contexts that led to their formation and to look at cultural perceptions of others as a function of the same historical process. Based on both archaeological and textual sources, this 2002 book also introduces a new methodological approach to Chinese frontier history which combines extensive factual data with a careful scrutiny of the motives, methods, and general conception of history that informed the Chinese historian Ssu-ma Ch'ien.

**Military Thought in Early China** Christopher C. Rand, 2017-05-11. This study of the philosophy of war in early China examines the recurring debate from antiquity through the Western Han period (202 BCE–8 CE) about how to achieve a proper balance between martial *wu* force and civil *wen* governance in the pursuit of a peaceful state. Rather than focusing solely on Sunzi's *Art of War* and other military treatises from the Warring States era (ca. 475–221 BCE), Christopher C. Rand analyzes the evolution of this debate by examining a broad corpus of early Han and pre-Han texts, including works uncovered in archaeological excavations during recent decades. What emerges is a framework for understanding early China's military philosophy as an ongoing negotiation between three major alternatives: militarism, compartmentalism, and syncretism. *Military Thought in Early China* offers a look into China's historical experience with a perennial issue that is not only of continuing relevance to modern-day China but also pertinent to other world states seeking to sustain strong and harmonious societies.

*Religion in Human Evolution* Robert N. Bellah, 2011-09-15. Examines the history of religion from early ancestors by using biology, cognitive science, and evolutionary psychology and follows the expansion of religion.

*Effortless Action* Edward Slingerland, 2007-05-24. This book presents a systematic account of the role of the personal spiritual ideal of *wu wei* (literally "no doing" but better rendered as "effortless action") in early Chinese thought. Edward Slingerland's analysis shows that *wu wei* represents the most general of a set of conceptual metaphors having to do with a state of effortless ease and unself.

consciousness This concept of effortless action he contends serves as a common ideal for both Daoist and Confucian thinkers He also argues that this concept contains within itself a conceptual tension that motivates the development of early Chinese thought the so called paradox of wu wei or the question of how one can consciously try not to try Methodologically this book represents a preliminary attempt to apply the contemporary theory of conceptual metaphor to the study of early Chinese thought Although the focus is upon early China both the subject matter and methodology have wider implications The subject of wu wei is relevant to anyone interested in later East Asian religious thought or in the so called virtue ethics tradition in the West Moreover the technique of conceptual metaphor analysis along with the principle of embodied realism upon which it is based provides an exciting new theoretical framework and methodological tool for the study of comparative thought comparative religion intellectual history and even the humanities in general Part of the purpose of this work is thus to help introduce scholars in the humanities and social sciences to this methodology and provide an example of how it may be applied to a particular sub field
