# The Atomic Establishment

**Ernst von Meyer**

## **The Atomic Establishment:**

**The Atomic Establishment** H. Peter Metzger, 1972      The Nuclear-power Rebellion Richard S. Lewis, 1972      **The Establishment of the Commission for Conventional Armaments** James Minor Ludlow, 1947      **The Atomic West** Bruce William Hevly, John M Findlay, 1998

The Manhattan Project transformed the entire country in myriad ways but it did not affect each region in the same way Atomic West tells the story of how the U S government acting on an enduring perception of the American West as an empty place located a disproportionate number of nuclear facilities in the western states especially the ones most likely to spread pollution Maps      *Legislative History of the Atomic Energy Act of 1954 (Public Law 703, 83rd Congress)*. U.S. Atomic Energy Commission, 1955      **The Atomic Energy Commission and the History of Nuclear Energy: Official Histories from the Department of Energy - from the Discovery of Fission to Nuclear Power; Production of Early Nuclear Arsenal** Atomic Energy Commission, U. S. Department of Energy, U. S. Government, 2017-12-10

The AEC Almost a year after World War II ended Congress established the United States Atomic Energy Commission to foster and control the peacetime development of atomic science and technology Reflecting America's postwar optimism Congress declared that atomic energy should be employed not only in the Nation's defense but also to promote world peace improve the public welfare and strengthen free competition in private enterprise After long months of intensive debate among politicians military planners and atomic scientists President Harry S Truman confirmed the civilian control of atomic energy by signing the Atomic Energy Act on August 1 1946 The provisions of the new Act bore the imprint of the American plan for international control presented to the United Nations Atomic Energy Commission two months earlier by U S Representative Bernard Baruch Although the Baruch proposal for a multinational corporation to develop the peaceful uses of atomic energy failed to win the necessary Soviet support the concept of combining development production and control in one agency found acceptance in the domestic legislation creating the United States Atomic Energy Commission Congress gave the new civilian Commission extraordinary power and independence to carry out its awesome responsibilities Five Commissioners appointed by the President would exercise authority for the operation of the Commission while a general manager also appointed by the President would serve as chief executive officer To provide the Commission exceptional freedom in hiring scientists and professionals Commission employees would be exempt from the Civil Service system Because of the need for great security all production facilities and nuclear reactors would be government owned while all technical information and research results would be under Commission control and thereby excluded from the normal application of the patent system

**History of Nuclear Energy** The concept of the atom has existed for many centuries But we only recently began to understand the enormous power contained in the tiny mass In the years just before and during World War II nuclear research focused mainly on the development of defense weapons Later scientists concentrated on peaceful applications of nuclear technology An important use of nuclear energy is the generation of electricity After years of

research scientists have successfully applied nuclear technology to many other scientific medical and industrial purposes This document traces the history of our discoveries about atoms We begin with the ideas of the Greek philosophers Then we follow the path to the early scientists who discovered radioactivity Finally we reach modern day use of atoms as a valuable source of energy This document also includes a detailed chronology of the history of nuclear energy and a glossary We hope the glossary will explain terms that may be new to some readers and that studying the chronology will encourage readers to explore the resources listed in the bibliography By doing so you can discover first hand our nation s efforts to develop and control this powerful technology

The Discovery of Fission The First Self Sustaining Chain Reaction The Development of Nuclear Energy for Peaceful Applications Chronology of Nuclear Research and Development 1942 1994 Selected References Glossary

**Nuclear Fear** Spencer R. WEART, 1988 Our thinking is inhabited by images images of sometimes curious and overwhelming power The mushroom cloud weird rays that can transform the flesh the twilight world following a nuclear war the white city of the future the brilliant but mad scientist who plots to destroy the world all these images and more relate to nuclear energy but that is not their only common bond Decades before the first atom bomb exploded a web of symbols with surprising linkages was fully formed in the public mind The strange kinship of these symbols can be traced back not only to medieval symbolism but still deeper into experiences common to all of us This is a disturbing book it shows that much of what we believe about nuclear energy is not based on facts but on a complex tangle of imagery suffused with emotions and rooted in the distant past Nuclear Fear is the first work to explore all the symbolism attached to nuclear bombs and to civilian nuclear energy as well employing the powerful tools of history as well as findings from psychology sociology and even anthropology The story runs from the turn of the century to the present day following the scientists and journalists the filmmakers and novelists the officials and politicians of many nations who shaped the way people think about nuclear devices The author a historian who also holds a Ph D in physics has been able to separate genuine scientific knowledge about nuclear energy and radiation from the luxuriant mythology that obscures them In revealing the history of nuclear imagery Weart conveys the hopeful message that once we understand how this imagery has secretly influenced history and our own thinking we can move on to a clearer view of the choices that confront our civilization

Table of Contents Preface Part One Years of Fantasy 1902 1938 1 Radioactive Hopes White Cities of the Future Missionaries for Science The Meaning of Transmutation 2 Radioactive Fears Scientific Doomsdays The Dangerous Scientist Scientists and Weapons Debating the Scientist s Role 3 Radium Elixir or Poison The Elixir of Life Rays of Life Death Rays Radium as Medicine and Poison 4 The Secret the Master and the Monster Smashing Atoms The Fearful Master Monsters and Victims Real Scientists The Situation before Fission Part Two Confronting Reality 1939 1952 5 Where Earth and Heaven Meet Imaginary Bomb Reactors Real Reactors and Safety Questions Planned Massacres The Second Coming 6 The News from Hiroshima Clich Experts Hiroshima Itself Security through Control by Scientists Security through Control over Scientists 7 National Defenses Civil Defenses Bombs as a

Psychological Weapon The Airmen Part Three New Hopes and Horrors 1953 1963 8 Atoms for Peace A Positive Alternative Atomic Propaganda Abroad Atomic Propaganda at Home 9 Good and Bad Atoms Magical Atoms Real Reactors The Core of Mistrust Tainted Authorities 10 The New Blasphemy Bombs as a Violation of Nature Radioactive Monsters Blaming Authorities 11 Death Dust Crusaders against Contamination A Few Facts Clean or Filthy Bombs 12 The Imagination of Survival Visions of the End Survivors as Savages The Victory of the Victim The Great Thermonuclear Strategy Debate The World as Hiroshima 13 The Politics of Survival The Movement Attacking the Warriors Running for Shelter Cuban Catharsis Reasons for Silence Part Four Suspect Technology 1956 1986 14 Fail Safe Unwanted Explosions Bombs Unwanted Explosions Reactors Advertising the Maximum Accident 15 Reactor Poisons and Promises Pollution from Reactors The Public Loses Interest The Nuplex versus the China Syndrome 16 The Debate Explodes The Fight against Antimissiles Sounding the Radiation Alarm Reactors A Surrogate for Bombs Environmentalists Step In 17 Energy Choices Alternative Energy Sources Real Reactor Risks It s Political The Reactor Wars 18 Civilization or Liberation The Logic of Authority and Its Enemies Nature versus Culture Modes of Expression The Public s Image of Nuclear Power 19 The War Fear Revival An Unfinished Chapter Part Five The Search for Renewal 20 The Modern Arcanum Despair and Denial Help from Heaven Objects in the Skies Mushroom and Mandala 21 Artistic Transmutations The Interior Holocaust Rebirth from Despair Toward the Four Gated City Conclusion A Personal Note Sources and Methodology Notes Index Reviews of this book Nuclear Fear is a rich layered journey back through our atomic history to the primal memories of monstrous mutants and mad scientists It is a deeply serious book but written in an accessible style that reveals the culture in which this fear emerges only to be suppressed and emerge again Ellen Goodman Boston Globe Reviews of this book A historical portrait of the quintessential modern nightmare Weart shows in meticulous and fascinating detail how the ancient images of alchemy fire sexuality Armageddon gold eternity and all the rest immediately clustered around the new science of atomic physics There is no question that the image of nuclear power reflects a complex and deeply disturbing portrait of what it means to be human Stephan Salisbury Philadelphia Inquirer Reviews of this book A detailed probing study of American hopes dreams and insecurities in the twentieth century Weart has a poet s acumen for sensing human feelings Nuclear Fear remains captivating as history and original as an anthropological study of how nuclear power like alchemy in medieval times offers a convenient symbol for deeply rooted human feelings Los Angeles Times Reviews of this book Weart s tale boldly sweeps from the futuristic White City of the 1893 Chicago World s Fair and the discovery of radioactivity in 1896 through Hiroshima and Star Wars An admirable call for synthesis of art and science in a true transmutation that takes us beyond nuclear fear H Bruce Franklin Science
