The Authority:

Biblical Inspiration and the Authority of Scripture Carlos R. Bovell, 2015-07-24 It has been some time since Catholic and liberal Protestant theologians stopped writing seriously on bibliology Meanwhile conservative evangelical theologians guard against the introduction of new ideas In an effort to make headway through this gridlock Carlos Bovell has commissioned a roundtable discussion on the prospect of whether the inspiration of Scripture might extend beyond authors and texts and if so what this might entail for the authority of Scripture Taken together the essays in this volume make an invaluable contribution to contemporary literature on the inspiration and authority of the Bible

The Authority of Virtue Tristan J. Rogers, 2020-11-09 This book provides a unified account of the connection between justice and the good life It argues that the virtues of character require institutions while good institutions enable persons to live together virtuously Although virtue ethics and political philosophy are rich and sophisticated philosophical traditions there has been an unfortunate divergence in theory and practice between the virtues of character and the virtues of institutions This book has two primary purposes First it reorients political philosophy around the concept of the good life To do so the author addresses the problem of political authority from a virtue ethics perspective He also considers whether a political theory oriented around the good life is compatible with Rawls's notion of reasonable pluralism Second the book explains the relationship between the virtues of institutions and the virtues of character The author shows how institutions support the development and exercise of the virtues of character while examining specific other regarding virtues such as justice and friendship The Authority of Virtue will appeal to scholars and advanced students working in virtue ethics social and political philosophy ancient philosophy and political theory

The Authority of International Law Ba^Dsak Çal^Di, 2015-10-08 The question of the authority of international law over domestic authorities and the duties of state officials to international law are fundamental concerns in international legal theory and practice The Authority of International Law Obedience Respect and Rebuttal addresses these concerns by reframing the present accounts of authority in international law construing its authority as imposing three different layers of duties on domestic officials the duty to obey the duty to respect and the duty to rebut The book provides an original interpretation of this authority one that is not tied to prior state consent or domestic constitutional frameworks It offers a nuanced account arguing that whether or not international law is obeyed within any given situation depends on the type of duty it imposes on the state and that duty's normative force There is no strict framework in which international law always trumps domestic law or vice versa Instead it presents a realistic account of when international law has absolute authority and when it can afford a margin of appreciation

to states The Authority of International Law contributes to existing debates by considering the gap between consent based jurisprudential theories of authority and self interest and identity based theories of compliance and by considering monism dualism and normative pluralism as theories for addressing authority competition between domestic legal orders and international law
