## **The Backyard Astronomer:**

**The Backyard Astronomer's Guide** Terence Dickinson, Alan Dyer, 1991 All astronomical photographs by amateur astronomers    *The Backyard Astronomer's Field Guide* David Dickinson, 2020-07-21 Discover Beautiful Nebulas Constellations Deep Sky Objects and More with Your Telescope David Dickinson co author of The Universe Today Ultimate Guide to Viewing the Cosmos has created the ultimate field guide for backyard astronomers Whether you want to impress viewers at a star party or learn what you can see with your new telescope David shows you how to find the most impressive views the night sky has to offer Broken down by month and by hemisphere to ensure you get the best possible view David shows you how to find objects like spiral galaxies stunning sights in the Milky Way and stars that bring the wow factor to astronomy With 44 sky charts and David's expertise it's like having a pro astronomer out in the field with you    **The Backyard Astronomer** Alan Edward Nourse, 1973    *The Backyard Astronomer* Dennis Mammana, 1996 An introduction to the basics of stargazing with explanations of celestial phenomena such as solar eclipses lunar phases comets and meteors Includes star charts and maps safety tips and techniques for observing the sun moon planets stars and deep sky objects and how to select and use equipment such as binoculars telescopes and filters    **Advanced Skywatching** Robert Burnham, 1997 Astronomy observers manual    *Right Ascensions* Lisa Baird, 2021-09 The night sky inspires everyone to look up in wonder at God's creation Daily entries in Right Ascensions relate a backyard astronomer's desire to know God the Creator by observing His masterwork the Heavens Each entry focuses on an astronomical object in order to show how God has given us a remarkable testament of His divine love Right Ascensions is a companion for the backyard astronomer who seeks the Creator    **Astronomy**, 2009    *A Guide to Advanced Skywatching*, 2002    **The Stargazing Year** Charles Laird Calia, Charles Laird Calin, 2005 Illustrated with 20 drawings this is an amateur astronomer's beautifully written account of a year spent observing the cosmos and building an observatory in his New England backyard    *Right Ascensions* Lisa Baird, 2021-02-25 Right Ascensions directs readers attention to the Heavens There written in starlight on a canvas of infinite depth is God's love letter to us Who but God could have stretched a canvas so fair and placed it in a position so obvious we could not fail to see His divine nature Right Ascensions has two meanings Backyard astronomers will recognize right ascension along with declination as coordinates on a sky map the means to pinpoint a celestial object For believers a right ascension can refer to prayers and praise ascending to the Father's throne in a true elevation of love When David wrote the heavens declare the glory of God he was looking into dark skies at objects like the Andromeda Galaxy and the Omega Centauri Cluster visible to the unaided eye He saw these objects because there was no light pollution in the ancient skies Thus the night sky constantly reminded the ancients of God's presence above them Today as our skies fill with the light of our worldliness as our eyes fill with the light of our own selves have we lost a sense of the sacred The daily inspiration of Right Ascensions rekindles awe at the grandeur of space at God's remarkable handiwork above and especially renews a sense of

the sacred These daily readings inspire praise and joy

**Night Sky Tracker** Leslie A. Horvitz, 2006-04-01 Amateur stargazers will value this combination logbook and astronomy fact book with sky maps included It also offers novice astronomers a primer that explains sky watching basics A clear night sky has limitless objects to study and the view changes constantly with passing hours and changing seasons Whether backyard astronomers study the heavens with binoculars a telescope or the naked eye they re likely to see objects they ll want to note down and remember The Night Sky Tracker s extensive logbook is set up to help users list date time their viewing location light conditions and weather conditions over a period of 100 evenings It also provides spaces to list observed constellations phases of the Moon visible planets meteors and special sightings such as comets or earth launched satellites This handy astronomers helper is specially designed for outdoor use at night featuring a rubberized PCV cover with wraparound flap and snap for protection against nighttime dew and a hidden spiral binding The cover has glow in the dark markings so it won t get lost in the night shadows Here s a great gift item for giving to amateur astronomers if they haven t already picked up a copy for themselves Printed in two colors with maps and illustrations

**Summer Stargazing** Terence Dickinson, 1996 An abundantly illustrated guide to the year s best stargazing season Summer brings with it fine stargazing weather it also happens to be the time of the year when our galaxy the Milky Way arches high across the sky Terence Dickinson The cool clear nights from May to October offer astronomers the best opportunities for stargazing Few sights in nature can compare with the splendor of a dazzling star filled sky Summer Stargazing captures the grandeur of the universe with down to earth simplicity All that is needed is a reasonably dark night sky a pair of binoculars or a simple telescope and this book The book features everything else the amateur astronomer needs including easy to use color star charts that cover the entire North American sky for one year and photographic quality charts for this main stargazing season With Summer Stargazing astronomers can delve into the majesty of the starry night to explore Planets of the Solar System Galaxies Remote star forming nebulae Glittering star dusters and more Helpful advice is given for safely viewing special phenomena such as eclipses and auroras Summer Stargazing is both a stargazing guide and a pictorial celebration of the summer night sky

*Astronomy for Older Eyes* James L. Chen, 2017-03-15 This book is for the aging amateur astronomy population including newcomers to astronomy in their retirement and hobbyists who loved peering through a telescope as a child Whether a novice or an experienced observer the practice of astronomy differs over the years This guide will extend the enjoyment of astronomy well into the Golden Years by addressing topics such as eye and overall health issues recommendations on telescope equipment and astronomy related social activities especially suited for seniors Many Baby Boomers reaching retirement age are seeking new activities and amateur astronomy is a perfect fit as a leisure time activity Established backyard astronomers who began their love of astronomy in their youth meanwhile may face many physical and mental challenges in continuing their lifelong hobby as they age beyond their 55th birthdays That perfect telescope purchased when

they were thirty years old now suddenly at sixty years old feels like an immovable object in the living room The 20 20 eyesight has given way to reading glasses or bifocals Treasured eyepieces feel all wrong Growing old is a natural process of life but astronomy is timeless With a little knowledge and some lifestyle adjustments older astronomers can still enjoy backyard observing well into their seventies eighties and even into their nineties *The Amateur Astronomer's Introduction to the Celestial Sphere* William Millar, William Charles Millar, 2006-06-08 Introduction to the night sky and the principles of naked eye astronomy using only elementary mathematics **Backyard Astronomy** Fog City Press, Robert Burnham, 2003 Colorful illustrations enhance this introduction to astronomical observations **Comet Hale-Bopp** Robert Burnham, 1997-01-28 How to find view and photograph the comet of the century [The Urban Astronomer's Guide](#) Rod Mollise, 2006-12-22 Most amateur astronomers yearn to observe more frequently Many of them however live in urban and highly developed suburban areas that are heavily light polluted Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season This book covers the why how and what of astronomy under light polluted skies The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and moderns techniques and what to observe About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs **Star Watch** Philip S. Harrington, 2008-04-21 Your Passport to the Universe The night sky is alive with many wonders distant planets vast star clusters glowing nebulae and expansive galaxies all waiting to be explored Let respected astronomy writer Philip Harrington introduce you to the universe in Star Watch a complete beginner's guide to locating observing and understanding these celestial objects You'll start by identifying the surface features of the Moon the banded cloud tops of Jupiter the stunning rings of Saturn and other members of our solar system Then you'll venture out beyond our solar system where you'll learn tips and tricks for finding outstanding deep sky objects from stars to galaxies including the entire Messier catalog a primary goal of every serious beginner Star Watch features a detailed physical description of each target including size distance and structure as well as concise directions for locating the objects handy finder charts hints on the best times to view each object and descriptions of what you'll really see through a small telescope or binoculars and with the naked eye Star Watch will transport you to the farthest depths of space and return you as a well traveled experienced stargazer *Remote Observatories for Amateur Astronomers* Gerald R. Hubbell, Richard J. Williams, Linda M. Billard, 2015-10-23 Amateur astronomers who want to enhance their capabilities to contribute to science need look no farther than this guide to using remote observatories The contributors cover how to build your own remote observatory as well as the existing infrastructure of commercial networks of remote observatories that are available to the amateur They provide

specific advice on which programs to use based on your project objectives and offer practical project suggestions. Remotely controlled observatories have many advantages, the most obvious that the observer does not have to be physically present to carry out observations. Such an observatory can also be used more fully because its time can be scheduled and usefully shared among several astronomers working on different observing projects. More and more professional level observatories are open to use by amateurs in this way via the Internet and more advanced amateur astronomers can even build their own remote observatories for sharing among members of a society or interest group.

**Endorsements:** *Remote Observatories for Amateur Astronomers Using High Powered Telescopes from Home* by Jerry Hubbell, Rich Williams and Linda Billard is a unique contribution centering on computer controlled private observatories owned by amateur astronomers and commercialized professional amateur observatories where observing time to collect data can be purchased. Before this book, trying to piece together all of the necessary elements and processes that make up a remotely operated observatory was daunting. The authors and contributors have provided in this single publication a wealth of information gained from years of experience that will save you considerable money and countless hours in trying to develop such an observatory. If you follow the methods and processes laid out in this book and choose to build your own remotely operated observatory or decide to become a regular user of one of the commercial networks, you will not only join an elite group of advanced astronomers who make regular submissions to science but you will become a member of an ancient fraternity.

Your high technology observatory will contain a high powered telescope no matter how large it is and from the comfort of home you can actively contribute to the work that started in pre history to help uncover the secrets of the cosmos.

**Scott Roberts, Founder and President, Explore Scientific LLC:** In the past three and a half decades since I first became involved with remote observatories, the use of remote unmanned telescopes at fully automated observatories has advanced from a very rare approach for making astronomical observations to an increasingly dominant mode for observation among both professional and amateur astronomers. I am very pleased to see this timely book being published on the topic. I highly recommend this book to readers because it not only covers the knowledge needed to become an informed user of existing remote observatories but also describes what you need to know to develop your own remote observatory. It draws on more than two decades of remote observatory operation and networking by coauthor Rich Williams as he developed the Sierra Stars Observatory Network (SSON) into the world class network it is today. This book is the ideal follow on to coauthor Jerry Hubbell's book *Scientific Astrophotography* (Springer 2012). Remote observatories have a bright future opening up astronomy to a new and much larger generation of professional, amateur and student observers. Machines and humans can and do work well together. I hope you enjoy reading this book as much as I have and will take advantage of the developments over the past several decades by the many pioneers of remote observatories.

**Russ Genet, PhD, California Polytechnic State University:** Observing Saturn for the first time is a memory that stays with us for the rest of our lives and for many it is the start of an odyssey, an odyssey into

observational astronomy Remote Observatories for Amateur Astronomers is a book written for observers beginners and old hands alike providing detailed advice to those wishing to improve their observing skills Many will want to build and operate a remotely controlled observatory and for those Part I of this book is an invaluable source of information If like me you choose to avoid the capital outlay of owning your own facility Part II describes how you can use one of the many professionally run large scopes where for a few dollars you can capture spectacular color images of nebulae galaxies and comets My own scientific interest in short period eclipsing binaries has been made possible through the availability of remote telescopes such as those operated by the Sierra Stars Observatory Network SSON Whichever route you take this book is essential reading for all who aspire to serious observing David Pulley The Local Group UK
