Empires of Print Patrick Scott Belk, 2017-05-08 At the turn of the twentieth century the publishing industries in Britain and the United States underwent dramatic expansions and reorganization that brought about an increased traffic in books and periodicals around the world Focusing on adventure fiction published from 1899 to 1919 Patrick Scott Belk looks at authors such as Joseph Conrad H G Wells Conan Doyle and John Buchan to explore how writers of popular fiction engaged with foreign markets and readers through periodical publishing Belk argues that popular fiction particularly the adventure genre developed in ways that directly correlate with authors experiences and shows that popular genres of the late nineteenth and early twentieth centuries emerged as one way of marketing their literary works to expanding audiences of readers worldwide Despite an over determined print space altered by the rise of new kinds of consumers and transformations of accepted habits of reading publishing and writing the changes in British and American publishing at the turn of the twentieth century inspired an exciting new period of literary invention and experimentation in the adventure genre and the greater part of that invention and experimentation was happening in the magazines

Fossil Insects David Penney, James E Jepson, 2014-07-31 Palaeoentomology represents the interface between two huge scientific disciplines palaeontology the study of fossils and entomology the study of insects However fossils rarely feature extensively in books on insects and likewise insects rarely feature in books about fossils Similarly college or university palaeontology courses rarely have an entomological component and entomology courses do not usually consider the fossil record of insects in any detail This is not due to a lack of insect fossils The fossil record of insects is incredibly diverse in terms of taxonomic scope age range Devonian to Recent mode of preservation amber and rock and geographical distribution fossil insects have been recorded from all continents including Antarctica In this book the authors aim to help bridge the palaeontology entomology gap by providing a broadly accessible

introduction to some of the best preserved fossil insects from a wide range of deposits from around the globe many of which are beautifully illustrated by colour photographs Also covered are insect behaviour and ecology in the fossil record sub fossil insects trace fossils and insect species longevity Just as insects are useful as ecological indicators today the same can be expected to be true of the past Such applications of the insect fossil record are briefly discussed It is hoped that this book will encourage a few future researchers to enter the fascinating realm of palaeoentomology and to this end there is a section on how to become a palaeoentomologist However it is aimed at a much broader audience those with an interest in fossils and or insects in general who will no doubt marvel at the diversity and excellent preservation of the fossils illustrated
