Translating Maya Hieroglyphs Scott A.J. Johnson,2013-06-24 Maya hieroglyphic writing may seem impossibly opaque to beginning students but scholar Scott A J Johnson presents it as a regular and comprehensible system in this engaging easy to follow textbook The only comprehensive introduction designed specifically for those new to the study Translating Maya Hieroglyphs uses a hands on approach to teach learners the current state of Maya epigraphy Johnson shows readers step by step how to translate ancient Maya glyphs He begins by describing how to break down a Mayan text into individual glyphs in the correct reading order and then explains the different types of glyphs and how they function in the script Finally he shows how to systematically convert a Mayan inscription into modern English Not simply a reference volume Translating Maya Hieroglyphs is pedagogically arranged so that it functions as an introductory foreign language textbook Chapters cover key topics including spelling dates and numbers basic grammar and verbs Formal linguistic information is accessibly explained while worksheets and exercises complement and reinforce the material covered in the text Glyph blocks and phrases drawn from actual monuments illustrate the variety and scribal virtuosity of Maya writing The Maya writing system has not been fully deciphered Throughout the text Johnson outlines and explains the outstanding disputes among Mayanists At the end of each chapter he offers sources for further reading Helpful appendices provide quick reference to vocabulary glyph meanings and calendrical data for students undertaking a translation The study of Maya glyphs has long been an arcane subject known only to a few specialists This book will change that Taking advantage of the great strides scholars have made in deciphering hieroglyphs in the past four decades Translating Maya Hieroglyphs brings this knowledge to a broader audience including archaeologists and budding epigraphers

Trees of Paradise and Pillars of the World Elizabeth A. Newsome,2010-07-05 Assemblies of rectangular stone pillars or stelae fill the plazas and courts of ancient Maya cities throughout the lowlands of southern Mexico Guatemala Belize and western Honduras Mute testimony to state rituals that linked the king s power to rule with the rhythms and

renewal of time the stelae document the ritual acts of rulers who sacrificed danced and experienced visionary ecstasy in connection with celebrations marking the end of major calendrical cycles The kings portraits are carved in relief on the main surfaces of the stones deifying them as incarnations of the mythical trees of life Based on a thorough analysis of the imagery and inscriptions of seven stelae erected in the Great Plaza at Copan Honduras by the Classic Period ruler 18 Rabbit God K this ambitious study argues that stelae were erected not only to support a ruler s temporal claims to power but more importantly to express the fundamental connection in Maya worldview between rulership and the cosmology inherent in their vision of cyclical time After an overview of the archaeology and history of Copan and the reign and monuments of 18 Rabbit God K Elizabeth Newsome interprets the iconography and inscriptions on the stelae illustrating the way they fulfilled a coordinated vision of the king s ceremonial role in Copan s period ending rites She also links their imagery to key Maya concepts about the origin of the universe expressed in the cosmologies and mythic lore of ancient and living Maya peoples
