English Journal, 1977 **Themes in the One-act Play** R. David Cox, Shirley S. Cox, 1971 **Cajun Literature and Cajun Collective Memory** Mathilde Köstler, 2022-12-19 How does Cajun literature emerging in the 1980s represent the dynamic processes of remembering in Cajun culture Known for its hybrid constitution and deeply ingrained oral traditions Cajun culture provides an ideal testing ground for investigating the collective memory of a group In particular francophone and anglophone Cajun texts by such writers as Jean Arceneaux Tim Gautreaux Jeanne Castille Zachary Richard Ron Thibodeaux Darrell Bourque and Kirby Jambon reveal not only a shift from an oral to a written tradition They also show hybrid perspectives on the Cajun collective memory Based on recurring references to place the texts also reflect on the Acadian past and reveal the innate ability of the Cajuns to adapt through repeated intertextual references The Cajun collective memory is thus defined by a transnational outlook a transversality cutting across various ethnic heritages to establish and legitimize a collective identity both amid the linguistic and cultural diversity in Louisiana and in the face of American mainstream culture Cajun Literature and Cajun Collective Memory represents the first analysis of the mnemonic strategies Cajun writers use to explore and sustain the Cajun identity and collective memory The Supernatural in Fiction Leo P. range of different genres and it enjoyed widespread diffusion during the second half of the fifteenth century when the development of this literary production was connected with the affirmation of centralized political thought and princely ideology in Italian states. The centrality of conspiracies also emerges in the sixteenth century in Machiavelli's work where the topic is closely interlaced with problems of building political consensus and management of power. This volume presents case studies of the most significant humanist texts representative of different states, literary genres and of prominent authors: Alberti, Poliziano, Pontano and minor yet important literati, and it also investigates Machiavelli's political and historical works. Through interdisciplinary analysis, this study traces the evolution of literature on plots in early Renaissance Italy. It points out the key function of the classical tradition and the recurring narrative approaches, the historiographical techniques and the ideological angles that characterize the literary transfiguration of the topic. This volume also offers a reconsideration of the complex facets of humanist political literature that played a crucial role in the development of a new theory of statecraft.

Consciousness, Theatre, Literature and the Arts 2015 Daniel Meyer-Dinkgräfe, 2016-12-14. This book brings together essays based on papers presented at the 6th International Conference on Consciousness, Theatre, Literature and the Arts (CTLA) held from June 10 to 12, 2015, at St Francis College, Brooklyn Heights, New York. The conference was attended by seventy delegates from twenty countries across the world; the twenty-three essays collected here come from delegates from twelve of those countries. The range of contributions reflects the variety of material presented and discussed at the conference across the fields of philosophy, literature, fine arts, music, dance, performance and theatre. The book, the sixth in the series, will appeal to the growing international community of researchers active and interested in the study of literature, theatre and the arts from a consciousness studies perspective.

Routledge Library Editions: Historiography Various, 2021-06-23. The greatest problem in historical scholarship, theoretically and practically, is the relation between historians and their subject matter. The past is gone and historians can only study its remnants. On what basis do scholars select certain facts from the mass of data left from the past? How do they explain the interrelationship of the facts they select? What criteria do they use to evaluate their subject? The 35 volumes in this set, originally published between 1926 and 1990, discuss and answer these essential questions faced by historians. The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture. Both historiography and historical thinking advanced as never before. The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought. One consequence was extensive organisation and

professionalization of research which the volumes in this set reflect
