The Art of Information War Andrew H. Nelson,2013-03-14 The first edition of this book was published in 1995 At that time a very limited number were printed with a very closed and exclusive distribution of those prints in order to communicate and share first principles as we developed our capabilities There are eternal principles of war that endure through time technology concepts of operation and organizational change This is a book of first principles It is for the reader to judge if these principles of war still ring true For those of us with the first copy of the book I salute you for your quiet dedication to the service of your country We are well prepared now thanks to you for the wars we are fighting now in this domain For our enemies read this and learn It will help you improve definitely but it should give you pause We were light years ahead of where you are now in 1995 and weve had all this time to improve Be warned

The Art of the Admiral Capt. Russell Grenfell,2016-10-27 This is a book about naval strategy It is therefore of a semi technical nature which may seem at first sight to limit its appeal to the technical reader I make no apology however for addressing myself to the layman as well as to the professional officer It used to be thought at one time that war was the affair of the fighting forces only and that fighting men were the only ones who were competent to express an opinion on matters of strategy The late war showed the fallacy of those ideas It showed that modern war is an affair of whole nations and not merely of armies and navies It also made it clear that the final responsibility for strategy lay with the civilian government Indeed as the war progressed the War Cabinet found itself taking a more and more searching interest in the determination of strategy Under these conditions where the civilian representatives of the public play an active part in the framing of strategy it is most desirable that the public itself should have a working knowledge of strategical principles Though the Government may often be forced by the exigencies of the case to come to vital decisions concerning the conduct of the war without previously taking the public into its confidence there can be no doubt that it will be greatly strengthened in making those decisions if it can feel that it has behind it an instructed public opinion on strategical matters a public opinion which is capable of forming a just and reliable estimate of the soundness or otherwise of the strategy adopted as it is seen to develop In a world therefore where warfare is not only a possibility but seems at the moment a matter of increasing probability it appears to be the duty of every citizen to acquaint himself with the main outlines of strategy
