The Art Of Rice Spirit And Sustenance In Asia:

The Art of Rice Roy W. Hamilton, 2003 **The Art of Rice** Roy W. Hamilton, 2003 The term Asia is a problematic and highly artificial construct because hardly anything not language religion politics or even geography unites this huge area Within the context of this study however which focuses on parts of South Southeast and East Asia home to the vast majority of the population there exists a unifying factor of paramount significance rice Not only is rice the staple food in these regions it is the focal point of a pervasive set of interrelated beliefs and practices For those who consume it this foodstuff is considered divinely given and is felt to sustain them in a special way one that may be understood as constitutional and even spiritual This volume explores beliefs and practices relating to rice as they are made manifest in the unique arts and material cultures of the various peoples considered Incorporating essays by twenty seven authorities representing a wide variety of cultures and writing from diverse perspectives the book is astounding in its polyphony The thirty five lavishly illustrated essays describe rice related rituals and beliefs in parts of Thailand Nepal India Indonesia the Philippines Vietnam Japan China and Korea Throughout the juxtaposition of magnificent photographs of works of art paintings prints ceramics textiles lacquerware and sculpture with objects of a more humble nature agricultural implements rice straw ornaments cooking utensils baskets puppets votive plaques and more serves to indicate the striking pervasiveness of rice in all aspects and all walks of life Wedding ceremonies parades festivals celebrations of birth rites held to honor the rice goddess and those performed to ensure success at every step in the rice growing cycle are vividly described and illustrated with striking field photographs The whole gives the reader the rare opportunity to compare similarities and differences in how a rich array of Asian cultures views the food that nourishes them *The Oxford Handbook of the Archaeology of Diet* Julia Lee-Thorp, M. Anne Katzenberg, 2024-06-24 Humans are unique among animals for the wide diversity of foods and food preparation techniques that are intertwined with regional cultural distinctions around the world The Oxford Handbook of the Archaeology of Diet explores evidence for human diet from our earliest ancestors through the dispersal of our species across the globe As populations expanded people encountered new plants and animals and learned how to exploit them for food and other resources Today globalization aside the results manifest in a wide array of traditional cuisines based on locally available indigenous and domesticated plants and animals How did this complexity emerge When did early hominins actively incorporate animal foods into their diets and later exploit marine and freshwater resources What were the effects of reliance on domesticated grains such as maize and rice on past populations and the health of individuals How did a domesticated plant like maize move from its place of origin to the northernmost regions where it can be grown Importantly how do we discover this information and what can be deduced about human health biology and cultural practices in the past and present Such questions are explored in thirty three chapters written by leading researchers in the study of human dietary adaptations The approaches encompass everything from information gleaned from comparisons with our nearest primate

relatives tools used in procuring and preparing foods skeletal remains chemical or genetic indicators of diet and genetic variation and modern or historical ethnographic observations Examples are drawn from across the globe and information on the research methods used is embedded within each chapter The Handbook provides a comprehensive reference work for advanced undergraduate and graduate students and for professionals seeking authoritative essays on specific topics about diet in the human past The Oxford Handbook of Early Southeast Asia Charles Higham,Nam C. Kim,2022 This handbook collects expert surveys of the prehistory of Southeast Asia a two millennial span that began with the arrival of now extinct humans and ended with the great civilization of Angkor 9th to 15th century Nature and Culture Sarah Pilgrim,Jules N. Pretty,2010-09-23 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity Culture and Customs of Indonesia Jill Forshee,2006-09-30 Indonesia comprises more than 17 000 islands stretching on either side of the equator for nearly 4 000 miles and hundreds of ethnic groups with almost 300 languages spoken This book reveals the remarkable social religious and geographical differences that exist from island to island Because of such variety Indonesia defies simple categorizations Europeans have produced most of the written histories of this region although Indonesians have contributed much Culture and Customs of Indonesia reveals something of local people s ideas of their identities and pasts as well Indonesian cultures covered include those of forest dwelling hunters rice growers fisherfolk village artisans urban office and factory workers intellectuals artists wealthy industrialists street vendors and homeless people Readers will learn about the amazing range of belief systems material culture and arts that enliven Indonesia Forshee describes the majestic temples complex poetry and literature lavish theatrical performances and splendid visual arts and more that have distinguished Indonesia for centuries and continue into the present Indonesians are shown to be constantly reinterpreting and refining their cultures in the modern world Capital and Ecology Rakhee Bhattacharya,G. Amarjit Sharma,2023-08-28 This volume studies the intersection of capital and ecology primarily in one of the most sensitive geographies of the world the Eastern Himalayan region It looks at how the region has become a melting ground of neoliberal developmentalism and ecological subjectivities with the penetrating forces of global and state capitalism economic projects and complex power relations The essays in the volume argue that specific focus on energy infrastructure and energy production has pushed technology and capital towards asset building which has had an

adverse effect on the environment labour relations indigenous knowledge systems and traditional livelihood practices in the area They look at assets like mega dams electricity transmission networks natural gas grids infrastructural and developmental projects and other alternative ventures which require interventions in the natural world and its resource deposits Interdisciplinary in approach the volume adopts a variety of lenses developmentalism state strategy indigenous voices geopolitics and environmentalism to provide a unique and alternative narrative on the various dimensions of the ecological risks and livelihood threats It will be of great interest to scholars and researchers of politics development studies indigenous studies and Asian studies

Protectors and Predators Bernard Faure, 2015-12-31 Written by one of the leading scholars of Japanese religion Protectors and Predators is the second installment of a multivolume project that promises to be a milestone in our understanding of the mythico ritual system of esoteric Buddhism specifically the nature and roles of deities in the religious world of medieval Japan and beyond Bernard Faure introduces readers to medieval Japanese religiosity and shows the centrality of the gods in religious discourse and ritual Throughout he engages theoretical insights drawn from structuralism post structuralism and Actor Network Theory to retrieve the implicit pantheon as opposed to the explicit orthodox pantheon of esoteric Japanese Buddhism Mikkyo His work is particularly significant given its focus on the deities multiple and shifting representations overlappings and modes of actions rather than on individual characters and functions In Protectors and Predators Faure argues that the wild gods of Japan were at the center of the medieval religious landscape and came together in complex webs of association not divisible into the categories of Buddhist indigenous or Shinto Furthermore among the most important medieval gods certain ones had roots in Hinduism others in Daoism and Yin Yang thought He displays vast knowledge of his subject and presents his research much of it in largely unstudied material with theoretical sophistication His arguments and analyses assume the centrality of the iconographic record as a complement to the textual record and so he has brought together a rich and rare collection of more than 170 color and black and white images This emphasis on iconography and the ways in which it complements supplements or deconstructs textual orthodoxy is critical to a fuller comprehension of a set of medieval Japanese beliefs and practices and offers a corrective to the traditional division of the field into religious studies which typically ignores the images and art history which oftentimes overlooks their ritual and religious meaning Protectors and Predators and its companion volumes should persuade readers that the gods constituted a central part of medieval Japanese religion and that the latter cannot be reduced to a simplistic confrontation parallelism or complementarity between some monolithic teachings known as Buddhism and Shinto Once these reductionist labels and categories are discarded a new and fascinating religious landscape begins to unfold

Food and World Culture Linda S. Watts, Keltie Clark-Mahoney, 2022-08-23 This book uses food as a lens through which to explore important matters of society and culture In exploring why and how people eat around the globe the text focuses on issues of health conflict struggle contest inequality and power Whether because of its necessity pleasure or ubiquity the world of food

and its lore proves endlessly fascinating to most people The story of food is a narrative filled with both human striving and human suffering However many of today s diners are only dimly aware of the human price exacted for that comforting distance from the lived world realities of food justice struggles With attention to food issues ranging from local farming practices to global supply chains this book examines how food s history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization such as colonization conquest enslavement and oppression The main text is structured alphabetically around a set of 70 ingredients from almonds to yeast Each ingredient s story is accompanied by recipes Along with the food profiles the encyclopedia features sidebars These are short discussions of topics of interest related to food including automats diners victory gardens and food at world s fairs This project also brings a social justice perspective to its content weighing debates concerning food access equity insecurity and politics

Encompassing a Fractal World Gil Daryn, 2006-01-01 Encompassing a Fractal World presents a groundbreaking innovative paradigm which opens up new perspectives for understanding and analyzing Hindu life and culture In particular it has crucial implications for the understanding of Hindu cosmology ritual architecture kinship social

relationships and agriculture as well as modern anthropological theories of ritual action and agency Gil Daryn's main thrust is not that the fractal concept may neatly bring together much of what has been written about Hindu culture but instead it argues the case for an additional and gendered fractal dimension Encompassing a Fractal World is exceptional in scope drawing from an extensive set of comparative materials ranging from Vedic cosmogonies and sacrifice through Puranic mythology to contemporary ethnographic accounts from Nepal and India This book is an interdisciplinary comparative work which attempts to connect the dots moving beyond isolated local village based studies in order to bridge the gulf between anthropology and Hindu studies

The Hungry Season Lisa M. Hamilton, 2023-09-26 A New York Times Book Review Editors Choice A Kirkus Reviews Best Nonfiction Book of the Year Finalist for the 2024 Biographers International Plutarch Award Longlisted for the 2023 California Book Awards Shortlisted for the William Saroyan International Prize Longlisted for the 2023 Northern California Book Awards In the tradition of Katherine Boo and Tracy Kidder *The Hungry Season* is a lyrical narrative with real suspense New York Times a nonfiction drama that reads like the best of fiction Mark Arax tracing one woman's journey from the mist covered mountains of Laos to the sunbaked flatlands of Fresno California as she struggles to overcome the wounds inflicted by war and family alike As combat rages across the highlands of Vietnam and Laos a child is born Ia Moua enters the world at the bottom of the social order both because she is part of the Hmong minority and because she is a daughter not a son When at thirteen she is promised in marriage to a man three times her age it appears that Ia's future has been decided for her But after brutal communist rule upends her life this intrepid girl resolves to chart her own defiant path With ceaseless ambition and an indestructible spirit Ia builds a new existence for herself and before long for her children first in the refugee camps of Thailand and then in the industrial heartland of California's San Joaquin Valley At the root of her success is a simple act growing Hmong rice just as her ancestors did and selling it to those who hunger for the Laos of their memories While the booming business brings her newfound power it also forces her to face her own past In order to endure the present Ia must confront all that she left behind and somehow find a place in her heart for those who chose to leave her Meticulously reported over seven years and written with the intimacy of a novel *The Hungry Season* is the story of one radiant woman's quest for survival and for the nourishment that matters most

Humanities ,2002-11 Cuisine, Colonialism and Cold War Katarzyna J. Cwiertka,2013-06-01 When you consider the size of Korea s population and the breadth of its territory it s easy to see that this small region has played a disproportionately large role in twentieth century history The peninsula has experienced colonial submission at the hands of Japan occupation by the United States and the Soviet Union war and a national division that continues today Cuisine Colonialism and Cold War traces these developments as they played out in an unusual sphere Korea s national cuisine which is savored for its diversity of ingredients and flavor Katarzyna J Cwiertka shows that many foods and dietary practices identified as Korean have been created or influenced by its colonial encounters and she uncovers how the military and the Cold War had an impact on diet in both the North and South Surveying the manufacture and consumption of rice and soy sauce the rise of restaurants wartime food and the 1990s famine that still affects North Korea Cwiertka illuminates the persistent legacy of Japanese rule and the consequences of armed conflicts and the Cold War Bringing us closer to the Korean people and their daily lives this book shines new light on critical issues in the social history of this peninsula

Moral Foods Angela Ki Che Leung,Melissa L. Caldwell,2020-02-29 Moral Foods The Construction of Nutrition and Health in Modern Asia investigates how foods came to be established as moral entities how moral food regimes reveal emerging systems of knowledge and enforcement and how these developments have contributed to new Asian nutritional knowledge regimes The collection s focus on cross cultural and transhistorical comparisons across Asia brings into view a broad spectrum of modern Asia that extends from East Asia Southeast Asia to South Asia as well as into global communities of Western knowledge practice and power outside Asia The first section Good Foods focuses on how food norms and rules have been established in modern Asia Ideas about good foods and good bodies shift at different moments in some cases privileging local foods and knowledge systems and in other cases privileging foreign foods and knowledge systems The second section

Bad Foods focuses on what makes foods bad and even dangerous. Bad foods are not simply unpleasant or undesirable for aesthetic or sensory reasons but they can hinder the stability and development of persons and societies. Bad foods are symbolically polluting as in the case of foreign foods that threaten not only traditional foods but also the stability and strength of the nation and its people. The third section, Moral Foods, focuses on how themes of good versus bad are embedded in projects to make modern persons subjects and states with specific attention to the ambiguities and malleability of foods and health. The malleability of moral foods provides unique opportunities for understanding Asian societies' dynamic position within larger global flows, connections and disconnections. Collectively, the chapters raise intriguing questions about how foods and the bodies that consume them have been valued politically, economically, culturally and morally, and about how those values originated and evolved. Consumers in modern Asia are not simply eating to satisfy personal desires or physiological needs but they are also conscripted into national and global statemaking projects through acts of ingestion. Eating then has become about fortifying both the person and the nation.
