The Art Of Simpling An Introduction To The Knowle:

The Art of Simpling William Coles,1656 **The Old English Herbals** Eleanour Sinclair Rohde,1922 *Catalogue of the Library [of Lord Rolle] at Stevenstone, North Devon* John ROLLE (Baron Rolle.),1850 **Poisonous Plants** Robert Bevan-Jones,2009-08-01 The botanical history of Britain and North West Europe has a dark and a light side Plants have been used as weapons to harm people taken deliberately as addictive drugs and also employed as tools in witchcraft and used as magical amulets Yet many of these same plants have been medicinally vital to numerous European communities as the author notes frequently the only difference between a benevolent medicine and a poison is dosage In this book which is richly illustrated with modern colour photographs and illustrations from herbals Robert Bevan Jones brings together a wealth of documentary and archaeo botanical sources to discuss the cultural social and anti social role of the fifty most significant species of poisonous plants and fungi found in Britain either as natives or as introductions An introductory essay puts into context the development of British society s knowledge of toxic plants the cultural botany applied in Britain today has evolved over thousands of years absorbing information from European texts and importing useful plants from Europe such as the mandrake The book s central A to Z section from aconite to yew then informs the reader about the history and uses of 43 species of poisonous plants especially those that have a documented history of medicinal usage Four important fungi species death cap liberty cap fly agaric and ergot also have separate essays As well as the plants histories and appearance their chemical constituents receive coverage these give them powerful and diverse properties which demand our admiration and respect The book aims to add to the knowledge offered by field identification guides and help reduce the risk associated with accidental ingestion Case histories are given in as much detail as possible and the information will hopefully help the reader understand the properties of plants they may encounter either in an archaeological botanical or horticultural context Most of these plants can yet be found growing in woodlands parks botanical gardens roadsides waterways churchyards and abbey sites This is an essential book not only for botanists and historical ecologists but also for anyone interested in the toxic plant traditions of Britain and Europe *A History of Gardening in England* Alicia Amherst,2012-11 Bei diesem Werk aus dem Jahr 1896 handelt es sich um ein Handbuch das den Leser auf eine Reise in die englischen G rten in die Zeit vom 13 bis 19 Jahrhundert mitnimmt Es handelt sich hierbei um eine englischsprachige Ausgabe **New Yearbook for Phenomenology and Phenomenological Philosophy** Burt Hopkins,John Drummond,2020-11-25 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl s groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer *Bibliography of Works on Gardening* Mrs. Evelyn Cecil,1897 **Collections and Notes, 1867-1876** William Carew Hazlitt,1876 **Reading Green in Early Modern England** Leah Knight,2016-04-08 Green in early modern England did not mean what it does today but what did it mean Unveiling various versions and interpretations of green this book offers

a cultural history of a color that illuminates the distinctive valences greenness possessed in early modern culture While treating green as a panacea for anything from sore eyes to sick minds early moderns also perceived verdure as responsive to their verse sympathetic to their sufferings and endowed with surprising powers of animation Author Leah Knight explores the physical and figurative potentials of green as they were understood in Renaissance England including some that foreshadow our paradoxical dependence on and sacrifice of the green world Ranging across contexts from early modern optics and olfaction to horticulture and herbal health care this study explores a host of human encounters with the green world both the impressions we make upon it and those it leaves with us The first two chapters consider the value placed on two ways of taking green into early modern bodies and minds by seeing it and breathing it in while the next two address the manipulation of greenery by Orphic poets and medicinal herbalists as well as grafters and graffiti artists A final chapter suggests that early modern modes of treating green wounds might point toward a new kind of intertextual ecology of reading and writing Reading Green in Early Modern England mines many pages from the period not literally but tropically metaphorically green that cultivate a variety of unexpected meanings of green and the atmosphere and powers it exuded in the early modern world *The Phytologist* ,1857 **Collections and Notes** William Carew Hazlitt,1876 *A Radical's Books* Michael Cyril William Hunter,1999 The library owned by Samuel Jeake of Rye nonconformist and local activist was one of the most remarkable of its time It is of particular importance in that relatively little information has hitherto been available about the ownership of books in the English provinces or the reading habits of intellectuals who like Jeake were outside London and university circles from which most surviving libraries have come down to us The collection of some 1500 volumes includes an extraordinary assemblage of radical pamphlets from the English Revolution alongside works of theology literature scholarship and science Other books reflect astrological and magical interests and the collection also includes a medical library Jeake s library catalogue published here gives much information about titles that are now lost about the penetration of foreign books into provincial England and about book prices The introduction places Jeake s collection in context and makes a significant contribution to the history of the book in the early modern period appendices list surviving volumes from the library and give a complete list of the Jeake manuscripts now in Rye Museum MICHAEL HUNTER is Professor of History at Birkbeck College University of London GILES MANDELBROTE is a Curator British Collections 1501 1800 at the British Library RICHARD OVENDEN is Deputy Head Rare Books Division of the National Library of Scotland NIGEL SMITH is Reader in English at the University of Oxford [The Forager's Cookbook](#) Julie Bruton-Seal,Matthew Seal,2023-02-07 More than a recipe book more than a foraging book more than a guide to herbal medicine Discover 90 exciting recipes showcasing weeds that are delicious nutritious medicinal too good to waste and free Why should we eat our weeds Because they are delicious adding a palate of new flavors in everyday cooking They are also nutritious and too good to waste Weeds are actually more nutritious than most of the vegetables we grow or buy They often have deep roots that loosen

Irish and Scottish Encounters with Indigenous Peoples Graeme Morton, David A. Wilson, 2013-05-01 The expansion of the British Empire during the eighteenth and nineteenth centuries created the greatest mass migration in human history in which the Irish and Scots played a central complex and controversial role The essays in this volume explore the diverse encounters Irish and Scottish migrants had with Indigenous peoples in North America and Australasia The Irish and Scots were among the most active and enthusiastic participants in what one contributor describes as the greatest single period of land theft cultural pillage and casual genocide in world history At the same time some settlers attempted to understand Indigenous society rather than destroy it while others incorporated a romanticized view of Natives into a radical critique of European society and others still empathized with Natives as fellow victims of imperialism These essays investigate the extent to which the condition of being Irish and Scottish affected settlers attitudes to Indigenous peoples and examine the political social religious cultural and economic dimensions of their interactions Presenting a variety of viewpoints the editors reach the provocative conclusion that the Scottish and Irish origins of settlers were less important in determining attitudes and behaviour than were the specific circumstances in which those settlers found themselves at different times and places in North America Australia and New Zealand Contributors include Donald Harman Akenson Queen s John Eastlake College Cork Marjory Harper Aberdeen Andrew Hinson Toronto Michele Holmgren Mount Royal Kevin Hutchings Northern British Columbia Anne Lederman Royal Conservatory of Music Patricia A McCormack Alberta Mark G McGowan Toronto Ann McGrath Australian National Cian T McMahon Nevada Graeme Morton Guelph Michael Newton Xavier P draig Siadhail Saint Mary s Brad Patterson Victoria University of Wellington Beverly Soloway Lakehead and David A Wilson Toronto
