Examinations of the culture artistic material musical of English monasteries in the six centuries between the Conquest and the Dissolution The cultural remains of England's abbeys and priories have always attracted scholarly attention but too often they have been studied in isolation appreciated only for their artistic codicological or intellectual features and not for the insights they offer into the patterns of life and thought the underlying norms values and mentalities of the communities of men and women which made them Indeed the distinguished monastic historian David Knowles doubted there would ever be sufficient evidence to recover the mentality of the ordinary cloister monk These twelve essays challenge this view They exploit newly catalogued and newly discovered evidence manuscript books wall paintings and even the traces of original monastic music to recover the cultural dynamics of a cross section of male and female communities It is often claimed that over time the cultural traditions of the monasteries were suffocated by secular trends but here it is suggested that many houses remained a major cultural force even on the verge of the Reformation James G Clark is Professor of History at the University of Exeter Contributors DAVID BELL ROGER BOWERS JAMES CLARK BARRIE COLLETT MARY ERLER G R EVANS MIRIAM GILL JOAN GREATREX JULIAN HASELDINE J D NORTH ALAN PIPER AND R M THOMSON **A**

Art and the German Bourgeoisie Carolyn Helen Kay,2002-01-01 In this new study of art in fin de si cle Hamburg Carolyn Kay examines the career of the city s art gallery director Alfred Lichtwark one of Imperial Germany s most influential museum directors and a renowned cultural critic A champion of modern art Lichtwark stirred controversy among the city s bourgeoisie by commissioning contemporary German paintings for the Kunsthalle by secession artists and supporting the formation of an independent art movement in Hamburg influenced by French impressionism Drawing on an extensive amount of archival research and combining both historical and art historical approaches Kay examines Lichtwark s cultural politics their effect on the Hamburg bourgeoisie and the subsequent changes to the cultural scene in Hamburg Kay focuses her study on two modern art scandals in Hamburg and shows that Lichtwark faced strong public resistance in the 1890s winning significant support from the city s bourgeoisie only after 1900 Lichtwark s struggle to gain acceptance for impressionism highlights conflicts within the city s middle class as to what constituted acceptable styles and subjects of German art with opposition groups demanding a traditional and pure German culture The author also considers who within the Hamburg bourgeoisie supported Lichtwark and why Kay s local study of the debate over cultural modernism in Imperial Germany makes a significant contribution both to the study of modernism and to the history of German culture

Provincial Modernity Jennifer Jenkins,2018-09-05 A history of the making of public culture in Imperial Germany Provincial Modernity challenges traditional accounts of the rise and fall of German liberalism and the meaning given to the cultural work of the German middle classes With an interdisciplinary approach that ranges from political history to modernist art and architecture Jennifer Jenkins explores the role that local tradition memory history culture and environment played in nineteenth century conceptions of citizenship and community in Hamburg Eighteen black and white illustrations and one color illustration enhance her portrait of the city in question Drawing on a wide range of sources Jenkins focuses on the city s cultural institutions particularly the Hamburg Art Museum and its director Alfred Lichtwark who inspired a citywide movement of political and cultural reform Lichtwark who became one of Imperial Germany s most important cultural

politicians worked with the city's elites and its civic associations both middle and working class. Together they promoted aesthetic education in the interest of forging a liberal society. Lichtwark and the movement he inspired saw the educated middle classes as the custodians of national culture, believed education and civic morality to be vehicles for the creation of modern citizens and argued that vital regional identities were essential to the making of a liberal national community. In so doing they defined and promoted a distinctive northern German form of modernist culture in art and architecture.

The National Frame Banu Karaca, 2021-02-02 Based on long term ethnographic research in the art worlds of Istanbul and Berlin, *The National Frame* rethinks the politics of art by focusing on the role of art in state governance. It argues that artistic practices, arts patronage and sponsorship, collecting and curating art, and the modalities of censorship continue to be refracted through the conceptual lens of the nation state despite the globalization of the arts. By examining discussions of the civilizing function of art in Turkey and Germany and particularly moments in which art is seen to cede this function, *The National Frame* reveals the histories of violence on which the production, circulation, and very understanding of art are predicated. Karaca examines this darker side of art in two cities in which art and its institutions have been intertwined with symbolic and material dispossession. The particularities of German and Turkish contexts, both marked by attempts to claim modern nationhood through the arts, illuminate how art is staked to memory and erasure, resistance and restoration, and why art has been at once vital and unwieldy for national projects. As art continues to be called upon to engage the past and imagine different futures, *The National Frame* explores how to reclaim art's emancipatory potential.

Max Klinger and Wilhelmine Culture Marsha Morton, 2017-07-05 The Wilhelmine Empire's opening decades, 1870s-1880s, were crucial transitional years in the development of German modernism, both politically and culturally. Here Marsha Morton argues that no artist represented the shift from tradition to unsettling innovation more compellingly than Max Klinger. The author examines Klinger's early prints and drawings within the context of intellectual and material transformations in Wilhelmine society through an interdisciplinary approach that encompasses Darwinism, ethnography, dreams and hypnosis, the literary, Romantic grotesque, criminology, and the urban experience. His work in advance of Expressionism revealed the psychological and biological underpinnings of modern rational man, whose drives and passions undermined bourgeois constructions of material progress, social stability, and class status at a time when Germans were engaged in defining themselves following unification. This book is the first full-length study of Klinger in English and the first to consistently address his art using methodologies adopted from cultural history. With an emphasis on the popular illustrated media, Morton draws upon information from reviews and early books on the artist, writings by Klinger and his colleagues, and unpublished archival sources. The book is intended for an academic readership interested in European art history, social science literature, and cultural studies.
