Data Robert Herian,2021-03-31 This book explores the phenomenon of data big and small in the contemporary digital informatic and legal bureaucratic context Challenging the way in which legal interest in data has focused on rights and privacy concerns this book examines the contestable multivocal and multifaceted figure of the contemporary data subject The book analyses data and personal data as contemporary phenomena addressing the data realms such as stores institutions systems and networks out of which they emerge It interrogates the role of law regulation and governance in structuring both formal and informal definitions of the data subject and disciplining data subjects through compliance with normative standards of conduct Focusing on the personal in and of data the book pursues a re evaluation of the nature role and place of the data subject qua legal subject in on and offline societies one that does not begin and end with the inviolability of individual rights but returns to more fundamental legal principles suited to considerations of personhood such as stewardship trust property and contract The book s concern with the production use abuse and alienation of personal data within the context of contemporary communicative capitalism will appeal to scholars and students of law science and technology studies and sociology as well as those with broader political interests in this area

Healthcare Information Management Systems Marion J. Ball,Charlotte Weaver,Joan Kiel,Donald W. Simborg,Judith V. Douglas,James W. Albright,2013-04-17 Addressed to health care professionals this book looks beyond traditional information systems and suggests how to bring a competitive advantage to hospitals and other health care providers Speaking practitioner to practitioner the authors explain how they use information technology to manage their health care institutions and to support the delivery of clinical care The second edition

incorporates the far reaching advances of the last several years which has moved the field of health informatics from the realm of theory into practice Major new themes in the field such as a national information infrastructure and community networks guidelines for case management and community education and resource centers added Topics such as clinical and blood banking have been thoroughly updated

Intelligence Agencies, Technology and Knowledge Production

Rüdiger Bergien, Debora Gerstenberger, Constantin Goschler, 2022-02-17 This volume examines intelligence services since 1945 in their role as knowledge producers Intelligence agencies are producers and providers of arcane information However little is known about the social cultural and material dimensions of their knowledge production processing and distribution This volume starts from the assumption that during the Cold War these core activities of information services underwent decisive changes of which scientization and computerisation are essential With a focus on the emerging alliances between intelligence agencies science and computer technology the chapters empirically explore these transformations and are characterised by innovative combinations of intelligence history with theoretical considerations from the history of science and technology and the history of knowledge At the same time the book challenges the bipolarity of Cold War history in general and of intelligence history in particular in favour of comparative and transnational perspectives The focus is not only the Soviet Union and the United States but also Poland Turkey the two German states and Brazil This approach reveals surprising commonalities across systems time and again the expansion and use of intelligence knowledge came up against the limits that resulted from intelligence culture itself The book enriches our global understanding of knowledge of the state and contributes to a historical framework for the past decade of debates about the societal consequences of intelligence data processing This book will be of much interest to students of intelligence studies science and technology studies security studies and International Relations

Personal Data in Competition, Consumer Protection and Intellectual Property

Law Mor Bakhoun, Beatriz Conde Gallego, Mark-Oliver Mackenrodt, Gintarė Surblytė-Namavičienė, 2018-11-02 This book analyses the legal approach to personal data taken by different fields of law An increasing number of business models in the digital economy rely on personal data as a key input In exchange for sharing their data online users benefit from personalized and innovative services But companies collection and use of personal data raise questions about privacy and fundamental rights Moreover given the substantial commercial and strategic value of personal data their accumulation control and use may raise competition concerns and negatively affect consumers To establish a legal framework that ensures an adequate level of protection of personal data while at the same time providing an open and level playing field for businesses to develop innovative data based services is a challenging task With this objective in mind and against the background of the uniform rules set by the EU General Data Protection Regulation the contributions to this book examine the significance and legal treatment of personal data in competition law consumer protection law general civil law and intellectual property law Instead of providing an isolated analysis of the different areas of law the book focuses on both synergies and tensions between the

different legal fields exploring potential ways to develop an integrated legal approach to personal data *Consent in European Data Protection Law* Eleni Kosta, 2013-03-21 Today consent is a fundamental concept in the European legal framework on data protection The analysis of the historical and theoretical context carried out in this book reveals that consent was not an intrinsic notion in the birth of data protection The concept of consent was included in data protection legislation in order to enhance the role of the data subject in the data protection arena and to allow the data subject to have more control over the collection and processing of his/her personal information This book examines the concept of consent and its requirements in the Data Protection Directive taking into account contemporary considerations on bioethics and medical ethics as well as recent developments in the framework of the review of the Directive It further studies issues of consent in electronic communications carrying out an analysis of the consent related provisions of the ePrivacy Directive
