Theosophy, 1922

Theosophical Astrology Helen Valborg, William Q. Judge, Helena P. Blavatsky, 2018-01-25 Astrology includes many things has many forms and serves multiple purposes Taking just three common examples typical astrological charts show the positions and relations of the planets at the moment and location of birth Progressed astrology maps the return of planets to their birth positions as well as the times and ways they cross and relate to those original positions and to one another And horary astrology looks at the positions of the planets in the zodiac at a given moment when some decision is to be made e g when to lay the foundation stone of a temple And then there is the astrology once commonly found in newspapers where planets were taken in conjunction with the signs of the zodiac to give general indications of what to expect for the day given one's birth sign This latter was never taken seriously by knowledgeable astrologers being rather like the sentiments found in fortune cookies ending meals in Chinese restaurants People admire your attitude for example can apply to anyone's self image and so it works But such messages are random and the newspaper's astrological messages each have to be general enough to cover about 1/12 the population because there are 12 signs in the zodiac There is much more to any system of astrology than the mechanisms for casting a chart or giving naive interpretations as for example Mars means conflict Jupiter wealth or generosity Mercury intelligence and so on Like all sciences astrology is a complex of symbols and principles of interrelationships And like all science astrology is also based on experience and observation In some ways astrology is more like medical science than physics since its variables are often multivalent and context dependent And like all sciences astrology is based on assumptions about the nature of reality and the universe It shares with all sciences the assumption that there are discoverable laws of nature that are invariant at least over long periods of time It shares the assumption that nature and the universe is intelligible to a reasoning observing consciousness

Religion in the Modern West Nicholas Campion,2016-04-15 This book explores an area of contemporary religion spirituality and popular culture which has not so far been investigated in depth the phenomenon of astrology in the modern west Locating modern astrology historically and sociologically in its religious New Age and millenarian contexts Nicholas Campion considers astrology s relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of New Age ideology This book challenges the notion that astrology is either marginal or a feature of postmodernism Concluding that astrology is more

popular than the usual figures suggest Campion argues that modern astrology is largely shaped by New Age thought influenced by the European Millenarian tradition that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west The Elements of Astrology Luke Dennis Broughton,1906 **The Occult Review** ,1919 **The Best Books** William Swan Sonnenschein,1895 *A Reader's Guide to Contemporary Literature* William Swan Sonnenschein,1896
