**The Atom Bomb and the Future of Man** Karl Jaspers, 1963-01-01      *The Future of Man* Teilhard de Chardin, 2004-04-20

The Future of Man is a magnificent introduction to the thoughts and writings of Pierre Teilhard de Chardin one of the few figures in the history of the Catholic Church to achieve renown as both a scientist and a theologian. Trained as a paleontologist and ordained as a Jesuit priest, Teilhard de Chardin devoted himself to establishing the intimate interdependent connection between science, particularly the theory of evolution, and the basic tenets of the Christian faith. At the center of his philosophy was the belief that the human species is evolving spiritually, progressing from a simple faith to higher and higher forms of consciousness, including a consciousness of God and culminating in the ultimate understanding of humankind's place and purpose in the universe. The Church, which would not condone his philosophical writings, refused to allow their publication during his lifetime. Written over a period of thirty years and presented here in chronological order, the essays cover the wide-ranging interests and inquiries that engaged Teilhard de Chardin throughout his life: intellectual and social evolution, the coming of ultra-humanity, the integral place of faith in God in the advancement of science, and the impact of scientific discoveries on traditional religious dogma. Less formal than *The Phenomenon of Man* and *The Divine Milieu*, Teilhard de Chardin's most renowned works, *The Future of Man* offers a complete, fully accessible look at the genesis of ideas that continue to reverberate in both the scientific and the religious communities.

*The Future of Man* Aldo Gelso, 2010-03-11

Be in a dark room meditating, touch yourself and think: what are you touching? If what you are touching is real, then what is it and what is it for? Are persons, roads, automobiles, valleys, mountains, and anything that you see real? And what about the things that think about—are they real? How do you see and why do you see what you see and for what reason? Is your being, seeing, and thinking an illusion? I believe that in reality nothing exists other than your thinking. But what is your thinking? Who is thinking? Is it you or whom? If it is you, who are you and from where do you and all those thoughts and things around you come from? I do not know about everyone else, but those thoughts have puzzled me ever since I can remember. Philosophers, scientists, and theologians have different ways of interpreting what is commonly known as life and Man. Why does man exist, who created him, and why? In my opinion, Man is the association of Mind and Body in search of happiness. Almost everyone on planet Earth believes that the answer to any unexplainable question is that God knows. I am not God, and not just me, but others wish to know what God knows. If not all men, then almost every man is in pursuit of eternal happiness that he wishes to find on the course of his life. In this book, my mind is rationally traveling and searching for The Future of Man in Search of Happiness. PS: I read a lot of publications in any and all subjects other than fiction. What I learned in my school days are over half a century old. I can't always remember correctly what I studied and read. No one is perfect; everyone makes mistakes. Please forgive me if in this book I report something incorrectly. Also by the author Aldo Gelso: Xlibris publisher read *Mafia Capitalism and Democracy* followed by the attached introduction to learn about mafia events in Sicily.

**Philosophical Faith and the Future of Humanity** Helmut Wautischer, Alan M. Olson, Gregory J. Walters, 2012-01-02

Karl Jaspers who died in 1969 had a profound impact on 20th century theology and philosophy. His central thesis called for among other things a de centering of philosophy from its Eurocentric roots and a renewal of its dialogue with other traditions especially Asian ones. This collection of essays includes unpublished work by Jaspers himself as well as testimonies to his life and career by colleagues, associates and translators some of who knew Jaspers personally. Readers will also find commentary and interpretation by researchers who have explored Jaspers work for decades and a biographical account of Jaspers student Leonard Ehrlich who handled much of Jaspers English translation. The book interrogates Jaspers conceptions of philosophical faith, his philosophy of communication and the prospects for world philosophy in the future. Focusing on philosophical faith it assesses Jaspers interpretations of key philosophers such as Kant, Hegel, Schelling, Kierkegaard, Nietzsche and Rosenzweig as well as examining his personal relationships with Bultmann and Heidegger. Contributors also look at Jaspers philosophies of religion and history, his hypothesis of the axial age, *Achsenzeit* and his contributions to metaphysics, *periechontology* and economics. Finally chapters cover Jaspers philosophy of communication and world history. The latter are informed by a burgeoning interest in Kantian *Freiheitphilosophie* that influenced Jaspers as well as concerns over the future of humanity. These concerns in part account for Jaspers growing popularity in the Middle East, Eastern Europe, Central South America and Asia. Also included are lucid clarifications of the difference between religious and philosophical faith and the relevance of certainty, trust and communication for a future of mankind. Trained as a psychiatrist, Jaspers practiced this profession before becoming a philosopher and thus had a keen insight into the workings of the human mind even as he challenged the philosophical establishment of his time. It is perhaps this depth to his background that adds to the contemporary relevance of his work.

**The Future as Catastrophe** Eva Horn, 2018-09-18 Why do we have the constant feeling that disaster is looming? Beyond the images of atomic apocalypse that have haunted us for decades, we are dazzled now by an array of possible catastrophe scenarios: climate change, financial crises, environmental disasters, technological meltdowns, perennial subjects of literature, film, popular culture and political debate. Is this preoccupation with catastrophe questionable alarmism or complacent passivity? Or are there certain truths that can be revealed only in apocalypse? In *The Future as Catastrophe* Eva Horn offers a novel critique of the modern fascination with disaster which she treats as a symptom of our relationship to the future. Analyzing the catastrophic imaginary from its cultural and historical roots in Romanticism and the figure of the Last Man through the narratives of climatic cataclysm and

the Cold War's apocalyptic sublime to the contemporary popularity of disaster fiction and end of the world blockbusters Horn argues that apocalypse always haunts the modern idea of a future that can be anticipated and planned Considering works by Lord Byron J G Ballard and Cormac McCarthy and films such as 12 Monkeys and Minority Report alongside scientific scenarios and political metaphors she analyzes catastrophic thought experiments and the question of survival the choices legitimized by imagined states of exception and the contradictions inherent in preventative measures taken in the name of technical safety or political security What makes today's obsession different from previous epochs is the sense of a catastrophe without event a stealthily creeping process of disintegration Ultimately Horn argues imagined catastrophes offer us intellectual tools that can render a future shadowed with apocalyptic possibilities affectively epistemologically and politically accessible
