The Awakening Steven S. Sadleir, 1992 *The Awakening Earth* Peter Russell, 2019-06-07 Originally published in 1982 *The Awakening Earth* explores the idea of the Earth as a collective self-regulatory living organism and considers in this context the function of the human race The book provides an exploration of humanity's potential and explores the possibility of mankind's evolutionary future Drawing on the work of physicists psychologists philosophers and mystics the book argues that humanity is on the verge of another evolutionary leap and explores evolution in the context of spiritual growth arguing that widespread inner awakenings could lead to a more analogous society functioning as a single social super organism much in the way cells in a body function as a biological organism [The Evolutionary Leap to Flourishing Individuals and Organizations](#) Center for Evolutionary Learning, 2017-09-19 The last thing the world needs is yet another book delineating business-induced dangers and damages such as environmental disasters social inequalities and unethical conduct And yet success in achieving sustainable growth whether for the individual organization or the social community has mostly eluded us Just as a compass needle moves to magnetic north our deeply seated behaviours push us back to practices that are familiar and comfortable even when we have sought to make a change to act in ways that are more sustainable How can we generate this deep and durable change in our values and beliefs and thus both in our individual and collective decisions and behaviour at work How can we unveil the best of our human qualities by learning to raise our consciousness to a more profound perception of ourselves and our relationship with the whole And what if such a change could lead to an evolutionary leap to a lasting flourishing state for us and for our organizations This book describes how this shift in mindset and consciousness level can and has indeed taken place in organizations using meditative practice not only

for individual wellbeing which is now well understood but also for deep transformational change Through this shift we can move past a definition of sustainability as mere resource efficiency and long term survival to one of sustainability as flourishing This book challenges many pre conceived ideas about what a sustainably successful organization is and how it should be run Based on a growing body of evidence from neuroscience to business research it maps out a path to empower all who wish to undertake this journey towards the realization of the highest potential in ourselves our organizations and our social and natural world

Conscious Evolution Barbara Marx Hubbard, 2010-10-14 Outlining the new worldview of conscious evolution futurist Barbara Marx Hubbard has written a call to action for our current generation to fulfill its creative potential She defines conscious evolution as the awareness that humans have gained the power to affect our own evolution and she asserts that we must quickly become capable of wise and ethical guidance of evolution itself if life on earth is to survive Only in the last fifty years have we gained the scientific and technological power to destroy or enhance the planet's life support system Our generation has the ability to abuse or conserve these powers to act in a way as co creator Conscious Evolution reveals the path of the co creator born out of these powers and society's new spirituality and discusses the tools and opportunities that each of us has to fully participate in this exciting stage in history

Secrets of the Holy Lance Jerry E. Smith, George Piccard, 2005 Neither debunking nor worshipping Smith pierces the veil of myth and mystery around the Holy Lance the spear that pierced the side of Jesus Christ on the cross Illustrations

Awakening the Planetary Mind Barbara Hand Clow, 2011-09-21 Completing our conscious evolution by releasing our collective fear of catastrophes Explains how we are on the cusp of an era of incredible creative growth Shows how we are about to overcome the collective fear caused by ancient catastrophes as we awaken to the memories of our lost prehistory Examines legendary cataclysms and scientific evidence of a highly advanced global culture that disappeared 11 500 years ago In this completely revised and expanded edition of Catastrophobia bestselling author Barbara Hand Clow explains how we are on the cusp of an age of incredible creative growth made possible by restoring our lost prehistory Examining legendary cataclysms such as the fall of Atlantis and the biblical Flood and the mounting geological and archaeological evidence that many of these mythic catastrophes were actual events she reveals the existence of a highly advanced global maritime culture that disappeared amid great earth changes and rising seas 14 000 to 11 500 years ago nearly causing our species extinction and leaving humanity's collective psyche deeply scarred Tracing humanity's reemergence after these prehistoric catastrophes Clow explains how these events in the deep past influence our consciousness today Guided by Carl Johan Calleman's analysis of the Mayan Calendar she reveals that as the Earth's 26 000 year precessional cycle shifts our evolution is accelerating to prepare us for a new age of harmony and peace She explains how we are beginning a collective healing as ancient memories of prehistory awaken in our minds and release our unprocessed fear Passed from generation to generation this fear has been responsible for our constant expectations of apocalypse She shows that by remembering and moving beyond the trauma of

our long lost past we bring the era of cataclysms to an end and cross the threshold into a time of extraordinary creative activity

The Living Universe Duane Elgin,2009-04-01 By the bestselling author of Voluntary Simplicity over 150 000 sold Brings together cutting edge science and ancient spiritual wisdom to demonstrate that the universe is a living sentient system and that we are an integral part of it Explores the power of this new paradigm to move humanity toward a sustainable and promising future Science has traditionally regarded the universe as mostly made up mostly of inert matter and empty space At one time this point of view was liberating part of the Enlightenment born rationalism that helped humanity free itself from superstition and fear and achieve extraordinary intellectual and technological breakthroughs But this paradigm has outlived its usefulness It has led to rampant materialism and environmental degradation if the universe is essentially dead and we are alive then the inanimate stuff of the universe should be ours to exploit But we now know that not only is the view of a dead universe destructive it is also inaccurate and misleading In The Living Universe Duane Elgin brings together evidence from cosmology biology physics and even his participation in NASA sponsored psychic experiments to show that the universe is permeated by a living field and that we are always in communion with that field of aliveness whether we are conscious of it or not This is a world view that as Elgin explains is shared by virtually every spiritual tradition and the implications of it are vast and deep In a living system each part is integral to the whole so each of us is intimately connected to the entire universe Elgin eloquently demonstrates how our identity manifests itself on a whole series of levels from subatomic to galactic We are he writes far more than biological beings we are beings of cosmic connection and participation To confront our ongoing planetary crisis of dwindling resources and escalating conflict we need to move past an ideology of separation competition and exploitation Duane Elgin asks us to see humanity sharing in the same field of aliveness to discover how to live

sustainably and harmoniously within the living universe **Radical Awakening** Amoda Maa Jeevan,2016-03-15 Revised New Edition of How to Find God in Everything published in 2008 We are all looking for meaning among the chaos that is modern life When we look around it is all too easy to see a world that is spiralling out of control but if we can make changes to our own perceptions changing our own reality we can start to make a genuine difference to the world around us We can turn suffering to joy and terror to peace by opening ourselves up to the concept of fulfilling our own potential To do this we must see that everyone and everything is a manifestation of God or Awakeness Presence or Being that everyone and everything is one with the divine and at every moment we can make the choice of what we let ourselves feel If we can learn to use this control in every area of our lives from how we eat move breathe think and feel to how we relate to one another our work our finances and our creativity we can change not just our own lives but also the world we live in Written in a lively engaging and very accessible style that sparkles with clarity and grace Amodaexplains her use of the word God in this
