**Europe's Role in Nation-building** James Dobbins,2008 The European Union and its member nations have proven adept at mounting small scale nation building operations and should be ready to handle more substantial missions Building on prior RAND work this volume presents six case studies of recent European led nation building missions in Albania Sierra Leone Macedonia Cote d'Ivoire the Congo and Bosnia as well as a review of the Australian

mission to the Solomon Islands      Overcoming Obstacles to Peace James Dobbins, Laurel E. Miller, 2013 This volume analyzes the impediments that local conditions pose to successful outcomes of nation building interventions in conflict affected areas Previous RAND studies of nation building focused on external interveners activities This volume shifts the focus to internal circumstances first identifying the conditions that gave rise to conflicts or threatened to perpetuate them and then determining how external and local actors were able to modify or work around them to promote enduring peace It examines in depth six varied societies Cambodia El Salvador Bosnia and Herzegovina East Timor Sierra Leone and the Democratic Republic of the Congo It then analyzes a larger set of 20 major post Cold War nation building interventions The authors assess the risk of renewed conflict at the onset of the interventions and subsequent progress along five dimensions security democratization government effectiveness economic growth and human development They find that transformation of many of the specific conditions that gave rise to or fueled conflict often is not feasible in the time frame of nation building operations but that such transformation has not proven essential to achieving the primary goal of nation building establishing peace Most interventions in the past 25 years have led to enduring peace as well as some degree of improvement in the other dimensions assessed The findings suggest the importance of setting realistic expectations neither expecting nation building operations to quickly lift countries out of poverty and create liberal democracies nor being swayed by a negative stereotype of nation building that does not recognize its signal achievements in the great majority of cases Page 4 of cover      Mexico Is Not Colombia Christopher Paul, Colin P. Clarke, Chad C. Serena, 2014-05-05 Despite the scope of the threat they pose to Mexico's security violent drug trafficking organizations are not well understood and optimal strategies to combat them have not been identified While there is no perfectly analogous case to Mexico's current security situation historical case studies may offer lessons for policymakers as they cope with challenges related to violence and corruption in that country
