X. George Wei, 1997-08-07 The economic relationship between the U S and China during the 1940s has long been neglected with few scholarly works focusing on the period This era was overshadowed by the political and diplomatic changes during and after the failure of the Nationalists in 1949 Without a close and insightful look into the reconstruction of China with American involvement during the late 1940s one cannot identify the problems which led to the Nationalists failure nor can one answer the questions dealing with the impact of American economic policy toward China during that time **China Exchange News** , 1988 **Technology Transfer in the People's Republic of China: Law and Practice** Richard J. Goossen, 2024-12-09 **US-China Relations** , 1981 Radiating Impact of WTO on Its Members' Legal System: The Chinese Perspective Guiguo Wang, 2011-12-15 The World Trade Organization WTO resulted from globalization through which national law provisions are internationalized and international norms are domesticated The WTO does not permit reservation by its members who are obliged to ensure the compliance of their laws policies and other measures Once a member is found to have violated its obligations it must rectify the non compliance measures to avoid retaliation The quasi automatic approval procedure of the WTO Dispute Settlement Body has proved to be effective in ensuring the compliance by members and consistency of interpretation of the WTO Agreement As the multilateral trade institution covers a wide range of sectors from trade in goods and services and intellectual property to investment and the

measures of the members include laws and regulations administrative decisions and judicial rulings the impacts of the WTO on the members legal systems are hugely profound and long lasting In some cases for the purpose of joining the WTO the legal systems of the members concerned have been through significant changes Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954, 2002 The Political Economy of Sino-American Relations Y.Y. Kueh, 1997-10-01 In the post Cold War world the United States and China together forms one of the most significant relationships in the Asian Pacific region However this relationship cannot be considered in isolation from the dynamic economic integration of China with Hong Kong and Taiwan into what is now called Greater China This volume draws on a wide range of international expertise to examine the nature of the US economic interaction with Greater China Set against the historical and political background of Sino American relations the contributors discuss in detail trade and investment flows between Greater China and the United States as well as China s entry into the World Trade Organization The impact on regional trading partners and global trading organizations is also evaluated The Expanding Roles of Chinese Americans in U.S.-China Relations Peter Koehn, Xiao-Huang Yin, Xiao-huang Yin, 2015-02-12 This book addresses the historical and contemporary involvement of Chinese Americans from diverse walks of life in U S China relations The contributors present new evidence and fresh perspectives on familiar and unfamiliar national and transnational networks including families businesspersons community newspapers students lobbyists philanthropists and scientists and consider the likely future impact of such contacts on the most important bilateral relationship at the start of the new millennium The volume makes a multidisciplinary contribution to understanding the extensive and vital roles and promise of Chinese Americans at this critical juncture in U S China relations and to revealing the importance of migrants as actors in contemporary global politics The assessments shared by the contributors suggest that the nature and scope of the Chinese American involvement particularly in global civil society networks increasingly will determine the outcome of state to state relations between the United States and the PRC **U.S.- China Educational Exchange** Hongshan Li, 2007-12-01 U S China relations became increasingly important and complex in the twentieth century While economic political and military interactions all grew over time the most dramatic expansion took place in educational exchange turning it into the strongest tie between the two nations By the end of the 1940s tens of thousands of Chinese and American students and scholars had crisscrossed the Pacific leaving indelible marks on both societies Although all exchange programs were terminated during the cold war the two nations reemerged as top partners within a decade after the reestablishment of diplomatic relations Approaching U S China relations from a unique and usually overlooked perspective Hongshan Li reveals that both the drastic expansion and complete termination of educational ties between the two nations in the first half of the twentieth century were largely the results of direct and deep intervention from the American and Chinese governments Benefiting from government support and collaboration educational exchange succeeded in diffusing knowledge and improving mutual

understanding between the two peoples across the divide of civilizations However the visible hand of government also proved to be most destructive to the development of healthy intercultural relations when educational interactions were treated merely as an instrument for crisis management

Image, Perception, and the Making of U.S.-China Relations

Hongshan Li,1998-06-25 Image Perception and the Making of U S China Relations examines major events in the history of the relationship between the U S and China to show the development and effects of national images and perceptions These essays expose the effects of ideology as represented through foreign policy and the actions of leaders as well as the role of the media and governments in shaping public opinion and attitudes They show the evolution of the influential forces from the nineteenth century through the twentieth century In each country a small group of people has always controlled these forces by manipulating the power of the media and governments The nature of this situation changed national perceptions as power often moved from one small group to another As a result of manipulating the images and perceptions of each country these biased and untrue views have inevitably led to conflict between the two countries

Understanding China's Economy Gregory C. Chow, 1994 In the early 1990 s the world began to recognize China as a rising economic power to reckon with China s economy is dynamic her human and natural resources are plentiful and her economic growth has been well sustained over the last 16 years In fact some have predicted that by the year 2020 China s economic output will be close to half that of the US It is undeniable that China will be an economic giant if she is not already one today In this book the author has traced China s economic development over the last 16 years The steps and characteristics of China s economic reform are detailed The prospects for China s economic growth are studied The author also attempts to analyze topical issues pertaining to China s economic relations with the US and her integration with the other Asian economies This book provides the interested reader with a bird s eye view of the Chinese economy over the last 16 years Most chapters are written for the general reader while a few are for professional economists For the questions it answers or for those that it raises this is an important book to read

Exchange Rate, Credit Constraints and China's International Trade Miaojie Yu, 2021-01-05 This book by one of China s leading economists explores the past and present of the RMB the people s currency as it is poised to compete with the dollar as the international reserve currency Exchange rate movement and its pass through to changes in domestic prices have been topics of wide concern among economists However relatively few studies have empirically investigated the relationship between exchange rate movements

and China's international trade. This book fills this gap using the general equilibrium theory of the western economic science norm systems, integrating the leading heterogeneous firm theory of international trade, attempting to set up a theoretical structural model for further prediction, and applying the data from sample cases to examine the structural model.
