And to get us there they created a new way of ordering and transforming nature built on grand designs and the mass mobilization of the resources of the British Empire With their expert culture of accuracy and precision they created telegraphs and telephones electric trams and railways built machines that could think and devised engines that could reach for the skies When Cyrus Field s audacious plan to lay a telegraph cable across the Atlantic finally succeeded in 1866 it showed how science properly disciplined could make new worlds As crowds flocked to the Great Exhibition of 1851 and the exhibitions its success inaugurated they came to see the future made fact to see the future being built before their eyes In this rich and absorbing book a distinguished historian of science tells the story of how this future was made From Charles Babbage s dream of mechanizing mathematics to Isambard Kingdom Brunel s tunnel beneath the Thames to George s Cayley s fantasies of powered flight and Nikola Tesla s visions of an electrical world it is a story of towering personalities clashing ambitions furious rivalries and conflicting cultures a rich tapestry of remarkable lives that transformed the world beyond recognition and ultimately took mankind to the Moon
