**Subcontracting System** Low Sui Pheng, Sim Jia Zheng, 2018-08-14 This book focuses on current subcontracting practices in the construction industry and their effects on Singapore's construction productivity. It offers readers a better understanding of how the fragmentation of large and small firms in Singapore impacts construction productivity when operating under the commonly adopted multilayer subcontracting system MLSS which extends globally to the construction industries in other countries that have adopted the MLSS The book also assesses the effectiveness of subcontracting practices in helping local contractors improve their construction productivity and thereby improve the industry's overall productivity. In closing it provides recommendations on how the problems associated with the MLSS can best be addressed and how its benefits can be capitalized on through organizational learning Industrial Development and Manufacturers Record, 1920 Beginning in 1956 each vol includes as a regular number the Blue book of southern progress and the Southern industrial directory formerly issued separately Effects of Motivation on Construction Workers' Performance in Nigeria Umar Auwal, 2022-10-11 Master's Thesis from the year 2017 in the subject Leadership and Human Resources Employee Motivation Employee Satisfaction grade 4 45 Abubakar Tafawa Balewa University language English abstract This paper is about the effects of motivation on construction worker's performance in Nigeria The construction industry has been recognised as the locomotive for development of any economy However the continuing decline in the performance of the industry and the increasing challenges facing the industry militate against the industry as the engine of growth Lack of workers motivation has been identified and this partly contributes to the steady decline in performance Against this backdrop the research was tailored to develop ways of improving productivity through appropriate motivational strategies. The study adopted the use of quantitative approach Data were collected through questionnaire survey from 102 construction workers randomly selected from the accessible population in Bauchi metropolis The questionnaire sought to elicit response from various workers in the construction industry Subsequently the collected data was subjected to descriptive statistical analysis with relative importance index to examine the degree of agreement and significance of the various motivational strategies to the construction site work
