## **Situated Language And Learning:**

**Situated Language and Learning** James Paul Gee, 2004 Why do poor and minority students under perform in school Do computer games help or hinder learning What can new research in psychology teach our educational policy makers In this major new book Gee tackles the big ideas about language literacy and learning putting forward an integrated theory that crosses disciplinary boundaries and applying it to some of the very real problems that face educationalists today Situated Language and Learning looks at the specialist academic varieties of language that are used in disciplines such as mathematics and the sciences It argues that the language acquisition process needed to learn these forms of language is not given enough attention by schools and that this places unfair demands on poor and minority students The book compares this with learning as a process outside the classroom applying this idea to computer and video games and exploring the particular processes of learning which take place as a child interacts with others and technology to learn and play In doing so Gee examines what video games can teach us about how to improve learning in schools and engages with current debates on subjects such as communities of practice and digital literacies Bringing together the latest research from a number of disciplines Situated Language and Learning is a bold and controversial book by a leading figure in the field and is essential reading for anyone interested in education and language

**The Ecology of Games** Katie Salen Tekinbas, 2007-11-30 An exploration of games as systems in which young people participate as gamers producers and learners In the many studies of games and young people's use of them little has been written about an overall ecology of gaming game design and play mapping the ways that all the various elements from coding to social practices to aesthetics coexist in the game world This volume looks at games as systems in which young users participate as gamers producers and learners The Ecology of Games edited by Rules of Play author Katie Salen aims to expand upon and add nuance to the debate over the value of games which so far has been vociferous but overly polemical and surprisingly shallow Game play is credited with fostering new forms of social organization and new ways of thinking and interacting the contributors work to situate this within a dynamic media ecology that has the participatory nature of gaming at its core They look at the ways in which youth are empowered through their participation in the creation uptake and revision of games emergent gaming literacies including modding world building and learning how to navigate a complex system and how games act as points of departure for other forms of knowledge literacy and social organization Contributors Ian Bogost Anna Everett James Paul Gee Mizuko Ito Barry Joseph Laurie McCarthy Jane McGonigal Cory Ondrejka Amit Pitaru Tom Satwicz Kurt Squire Reed Stevens S Craig Watkins **L2**

**Writing in Secondary Classrooms** Luciana C. De Oliveira, Tony Silva, 2013 Second language writers and the teaching of writing at the secondary level have received little attention compared with other skills such as reading Addressing this gap this volume uniquely looks at both adolescent L2 writing and the preparation of secondary teachers to work with this population of students Part I on adolescent L2 writers includes case studies looking at their literacy identities their
