Six Historic Homesteads:

Six Historic Homesteads Imogen B (Imogen Brashear) Oakley, 2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Six Historic Homesteads** Imogen B. Oakley, 1962 The histories personalities architectural and decorative features of six of early America s finest mansions the Moffatt Ladd House in Portsmouth New Hampshire the Quincy Mansion near Boston the Webb House in Wethersfield Connecticut Jumel House above New York Stenton in Philadelphia and Mount Clare outside Baltimore **Six Historic Homesteads** Imogen B. Oakley, 2016-11-11 Our colonial ancestors knew how to build houses as well as constitutions It may even be that they built the one as enduringly as the other for many of their mansions still stand firm in joist and beam having required in nearly two centuries no more serious repairs than shingles and paint As the Constitution did not spring a magic structure fresh from the minds of its builders but was a welding together of ideas as old as the Magna Carta so the style of architecture known as Colonial was not a new creation but an adaptation of the Georgian to new material and new social conditions While there were no architects among our early ancestors there were master builders who had served apprenticeship to the creators of the manor houses of Georgian England or of the small chateaux of France Accustomed to work lavishly in stone and brick these master builders adapted their methods to wood and unconsciously developed the style we know as Colonial They kept the type pure whether they applied it to the mansion of the East Indian merchants of New England or to the hospitable home of the owners of the plantations of Virginia and the Carolinas but in detail they yielded to climate and personality In this volume Imogen Oakley meticulously examines the historical climate and the personalities that influenced the construction of six examples of colonial architecture three in New England and one each in New York Pennsylvania and Maryland The Moffatt Ladd House Portsmouth New Hampshire The Quincy Mansion Quincy Massachusetts The Webb House Wethersfield Connecticut The Jumel House New York New York Stenton Philadelphia Pennsylvania Mount Clare Baltimore Maryland By relating the character of the homesteads as they stand today to the circumstances under which they were built and the personalities who built and occupied them the author illuminates these monuments of our American past and demonstrates the relationship of their design to their function In addition she traces the history of these homes and shows how it happened that they still stand today their interior decor completely preserved in every detail With the aid of over twenty photographs

the reader is able to gain an intimate view of many of the magnificent rooms that grace these famous old mansions This volume represents a valuable and entertaining contribution to American colonial history and the study of an architectural style that has withstood the vicissitudes of time and taste It will also prove of great interest to the antique enthusiast who will be able to see many of the finest examples of colonial interior design in their original setting and thus gain a picture of a style of living that reflects the unique personality of a hardy and practical society and which compares favorably with so much of what has grown up around and threatened to displace it **Six Historic Homesteads** Imogen Brashear Oakley,1935

Six Historic Homesteads, by Imogen B. Oakley... Imogen B. Oakley,1935 **Virginia's Historic Homes and Gardens** ,2009 Home to Jamestown the first permanent English settlement in the New World Virginia is in many ways the birthplace of America and the home of U S history It is also literally the birthplace of eight presidents and numerous Revolutionary and Civil War heroes Virginia was among the wealthiest southern states in the antebellum period resulting in a long tradition of stately homes on luxuriant plantations In addition to their elegant architecture and classic southern styling these homes feature some of the most extravagant and noteworthy gardens on the eastern seaboard From the James River Plantations to the Shenandoah foothills Virginia s Historic Homes and Gardens celebrates the legendary houses and landscapes of Old Dominion Virginia natives the authors travel throughout the state to highlight the best of the famous and lesser known homes Including such national landmarks as George Washington s Mount Vernon and Thomas Jefferson s Monticello the book brilliantly illustrates the homes exteriors and interiors as well as their gardens and landscaping Historical details accompany the exquisite color photographs along with useful information on each site s location

projections show that Britain can expect wetter winters drier summers and a higher likelihood of flash floods heat waves and droughts Yet adaptation to climate change has been given only a fraction of the attention that has gone into reducing greenhouse gases The Government must build awareness and support for the wide ranging and urgent programme of action that is needed to protect people property and prosperity and safeguard the natural environment Adapting infrastructure and homes will be expensive To maintain current levels of flood protection for homes real terms spending on flood defences will need to increase from its current level of around 600 million per annum to around 1 billion in 2035 Estimates in 2009 suggest that by the end of the century around 7 billion may be needed to improve the Thames flood barrier and tidal defences New homes being built now must be designed to cope with the inevitable changes in climate over the next 50 80 years The Government must make adaptation and mitigation more central to the planning system New developments should only be permitted if they are suited to future climates Existing homes will also need to be adapted so that they are comfortable during hotter summers and better protected against the risk of flooding The Government must help to kick start an integrated retro fitting programme that covers adaptation water efficiency and energy efficiency Green infrastructure such as water storage greater tree cover and more open green spaces must also be promoted **Old-House Journal** ,2006-05 Old House Journal is the original magazine devoted to restoring and preserving old houses For more than 35 years our mission has been to help old house owners repair restore update and decorate buildings of every age and architectural style Each issue explores hands on restoration techniques practical architectural guidelines historical overviews and homeowner stories all in a trusted authoritative voice **Catalog of Copyright Entries.
