research on the role of the female hormonal system in basal states of self and mood she shows that the biochemistry of the endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning but it is also continually modulated and influenced by the subject s experience of his or her world In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind Thomas Fuchs MD PhD Karl Jaspers Professor of Philosophy and Psychiatry University of Heidelberg DE
