Handbook of Community Movements and Local Organizations Ram A. Cnaan,Carl Milofsky,2007-12-18 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life The ^AOxford Handbook of Cultural Sociology Jeffrey C. Invisible Crisis of Contemporary Society Bernard S Phillips,Louis C. Johnston,2015-12-03 Is there a growing gap in today's world between cultural aspirations and their fulfillment a gap that is increasing social problems of all

kinds If so what forces are producing that gap How can these forces be changed To answer these questions Phillips and Johnston employ a very broad approach to the scientific method drawing evidence from a wide variety of data and sources including sociologists psychologists political scientists historians philosophers educators psychiatrists and novelists They find substantial evidence for a widening gap suggesting an invisible crisis throughout contemporary society They also find substantial evidence that a simplistic and static metaphysical stance or worldview is largely responsible for that gap and that an alternative worldview can work to close that gap

Democracy in Our America Paul W. Kahn, 2023-01-31 One of America's most distinguished political theorists examines what happens when national politics enters a small New England town After the election of 2016 and even more urgently after the election of 2020 many citizens looked at the economic and cultural divisions that were causing deep disruptions in American politics and asked What is happening to us Paul W Kahn explores these fundamental changes as they show themselves in a small New England town his home of twenty five years Killingworth Connecticut His inquiry grounds a democratic theory that puts volunteering not voting at its center Absent active participation citizens lose the capacity for judgment that comes from working with others to solve real problems Volunteering however is under existential threat today Changes in civil society commerce employment and public opinion formation have

isolated families from each other and from their communities Even middle class families live under financial stress uncertain of their children s future and without the support of civil society Local media has disappeared Residents do not have the time information or interest to volunteer Under these conditions national polarization enters local politics which becomes yet another site for national conflict To save our democracy Kahn concludes we need to find ways of matching opportunities for participation to the ways we live our lives today

Selling Science Stephen E. Mawdsley,2016-08-01 Today when many parents seem reluctant to have their children vaccinated even with long proven medications the Salk vaccine trial which enrolled millions of healthy children to test an unproven medical intervention seems nothing short of astonishing In *Selling Science* medical historian Stephen E Mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children 55 000 healthy children revealing how this long forgotten incident cleared the path for Salk s later trial Mawdsley describes how in the early 1950s Dr William Hammon and the National Foundation for Infantile Paralysis launched a pioneering medical experiment on a previously untried scale Conducted on over 55 000 healthy children in Texas Utah Iowa and Nebraska this landmark study assessed the safety and effectiveness of a blood component gamma globulin to prevent paralytic polio The value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks but as Mawdsley points out compromise and coercion moved it forward And though the trial returned dubious results it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954 Indeed the concept conduct and outcome of the GG study were sold to health professionals medical researchers and the public at each stage At a time when most Americans trusted scientists their mutual encounter under the auspices of conquering disease was shaped by politics marketing and at times deception Drawing on oral history interviews medical journals newspapers meeting minutes and private institutional records *Selling Science* sheds light on the ethics of scientific conduct and on the power of marketing to shape public opinion about medical experimentation

The New Middle Classes Arthur J. Vidich,2016-07-27 This volume is designed first to provide a theoretical orientation and historical perspective on the rise of the middle classes in modern civilization and second to portray the social and political roles these classes have played and continue to play in the United States over the past century with particular reference to the American class structure and political economy Our method is necessarily both historical and sociological and offers an orientation for understanding contemporary American society The essays included here were written between 1926 and 1982 they reveal both the genealogical development of sociological thought about the middle classes and the substantive content of these classes life styles status claims and political orientations The present work stresses empirical studies and puts forth neither a theoretical interpretation nor a conceptual taxonomy rather it delineates the emergence and the social and political significance of the new middle classes in relation to the classes above and below that preceded them

Public Service Marc Holzer,2018-03-05 This volume includes perspectives on public

service selected from six decades of major public administration journals. Recurring themes include motivations to enter the public service, positive and negative images of public servants, and of government conflicts between loyalty to the organization and loyalty to the public, morale, burnout, and turnover. The volume also includes cross-national analyses of the public service in other systems, proposals for rethinking public service systems, and questions as to the future of the public service. It recaptures a long continuing debate as to the health of the public service and in so doing suggests agendas for university research and administrative action.

The Enigmatic Academy Christian J. Churchill, Gerald Levy, 2011-06-15

The Enigmatic Academy is a provocative look at the purpose and practice of education in America. Authors Christian Churchill and Gerald Levy use three case studies: a liberal arts college, a boarding school, and a Job Corps center, to illustrate how class, bureaucratic, and secular religious dimensions of education prepare youth for participation in American foreign and domestic policy at all levels. The authors describe how schools contribute to the formation of a bureaucratic character, how middle and upper class students are trained for leadership positions in corporations, government, and the military, and how the education of lower class students often serves more powerful classes and institutions. Exploring how youth and their educators encounter the complexities of ideology and bureaucracy in school, The Enigmatic Academy deepens our understanding of the flawed redemptive relationship between education and society in the United States. Paradoxically, these three studied schools all prepare students to participate in a society whose values they oppose.

The Relational Fabric of Community Kenneth C. Bessant, 2018-04-10

Theoretical and philosophical work on community has yielded multifold definitions and analytical frameworks. Kenneth C. Bessant reflects on the inherent complexity and diversity of this deeply intersubjective aspect of lived social experience. He explores the relational underpinnings of early and more contemporary approaches to the study of community with a particular emphasis on their core assumptions, concepts, and tenets. Each of these perspectives offers a relatively distinct interpretation of community while also revealing the intrinsically relational fabric of its perpetual emergence, dynamism, and transformation. The being-with of relational social existence is the fundamental basis upon which all conceptions of community are built, and this is the epicenter around which the book revolves. Community is born, exists within, and brings forth social relations. It is a living expression of relational willing, thinking, and acting.

Communication and Development Y. V. Lakshmana Rao, 1966-06-13

Communication and Development was first published in 1966. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. What role does communication play in the economic, social, and political development of a community? The results of the study reported here, based on comprehensive field work in two small villages in India, throw considerable light on that question, one which is of fundamental importance to those concerned with rates and patterns of growth in any developing country. In this study, the term communication refers to a social process: the flow of information, the circulation of knowledge and ideas in society, the

propagation and internalization of thoughts It does not refer to the media or means of communication such as electronics roads and railways or vehicles The two villages studied both in South India were at contrasting stages of development One was becoming industrialized while the other still clung to such traditional ways as the barter system To carry out the field work for his study Dr Rao lived in these villages for several months talking at length with the people obtaining information about their attitudes beliefs and opinions and observing them and their surroundings with a trained eye He also checked official records for pertinent information He analyzes his findings from a psychological and sociological standpoint and in addition provides an intimate description of the village life The book will be of particular interest to communications specialists anthropologists sociologists political scientists economists and others concerned with studies of the developing countries in Asia Africa and Latin America
