Reed,2016-05-03 Science for Students of Leather Technology is the first of a series of textbooks of leather science and technology designed to assist students at technical colleges and institutes as well as at universities The book begins with an introduction to leather manufacturing This is followed by separate chapters on the physical chemistry of solutions needed by students of leather manufacture types of macromolecules lipids and their use at various stages of leather manufacture and the principles of their use as surface agents Subsequent chapters deal with the general features of skin as an organ how the skins from different animals may develop their special characteristics common problems arising from insects and from micro organisms in leather manufacture and the structure and reactions of chromium complexes which are the most widely used tanning agents and modern views on the structure of the vegetable tannins and of the dyestuffs and pigments This book is intended for students with a variety of backgrounds Those whose chemical studies have not proceeded

much beyond the elementary level will find considerable difficulty with some sections especially where the organic chemistry of complex molecules proteins carbohydrates dyes and vegetable tannins is described It is however possible to supplement the explanations given by reference to standard chemical textbooks using the subject matter of the present volume as a guide to those sections which would repay further study

Advances in Intelligent Control Systems and Computer Science Loan Dumitrache, 2012-08-22 The conception of real time control networks taking into account as an integrating approach both the specific aspects of information and knowledge processing and the dynamic and energetic particularities of physical processes and of communication networks is representing one of the newest scientific and technological challenges The new paradigm of Cyber Physical Systems CPS reflects this tendency and will certainly change the evolution of the technology with major social and economic impact This book presents significant results in the field of process control and advanced information and knowledge processing with applications in the fields of robotics biotechnology environment energy transportation et al It introduces intelligent control concepts and strategies as well as real time implementation aspects for complex control approaches One of the sections is dedicated to the complex problem of designing software systems for distributed information processing networks Problems as complexity and specific instruments for modeling and control are also presented in a group of papers which identifies a large opening towards the new generation of CPS The book is structured so as to ensure a good equilibrium between conceptual and applicative aspects

Reconceptualizing the Nature of Science for Science Education Sibel Erduran, Zoubeida R. Dagher, 2014-08-20 Prompted by the ongoing debate among science educators over nature of science and its importance in school and university curricula this book is a clarion call for a broad re conceptualizing of nature of science in science education The authors draw on the family resemblance approach popularized by Wittgenstein defining science as a cognitive epistemic and social institutional system whose heterogeneous characteristics and influences should be more thoroughly reflected in science education They seek wherever possible to clarify their developing thesis with visual tools that illustrate how their ideas can be practically applied in science education The volume s holistic representation of science which includes the aims and values knowledge practices techniques and methodological rules as well as science s social and institutional contexts mirrors its core aim to synthesize perspectives from the fields of philosophy of science and science education The authors believe that this more integrated conception of nature of science in science education is both innovative and beneficial They discuss in detail the implications for curriculum content pedagogy and learning outcomes deploy numerous real life examples and detail the links between their ideas and curriculum policy more generally

Utopian Literature and Science Patrick Parrinder, 2015-08-11 Scientific progress is usually seen as a precondition of modern utopias but science and utopia are frequently at odds Ranging from Galileo s observations with the telescope to current ideas of the post human and the human animal boundary this study brings a fresh perspective to the paradoxes of utopian thinking since Plato
