both skating and philosophy eventually crept into the mainstream of society and have since earned their place as permanent fixtures in the culture. With all they have in common it's only appropriate that the two should intersect in this book. This collection of 19 new essays written by philosophers who are also skaters and skating enthusiasts covers a wide variety of topics important to skating such as its culture, politics, history, art, and status as a sport. If you're a skater or someone who simply appreciates skating and you're interested in thinking a bit more carefully, a bit more deeply about skateboarding, this book was put together to help you do just that. **The Skateboard** Ben Marcus, 2011-06-06 The story of the simple skateboard is part thriller, part underground underdog success tale. It's chock full of innovations, far-out graphic artistry, and ever more incredible hot-dogging feats. And the story's told in this book with contributions from the stars themselves: Tony Hawk, Stacey Peralta, Jeff Ho, the Dogtown Z-Boys, and more. Beautifully illustrated with historical posters, ads, and memorabilia along with new action photography, studio skateboard shots, and unique portraits of the stars, this is a fitting tribute to an American classic.

Places of Invention Arthur P. Molella, Anna Karvellas, 2015-06-30 The companion book to an upcoming museum exhibition of the same name, *Places of Invention* seeks to answer timely questions about the nature of invention and innovation. What is it about some places that sparks invention and innovation? Is it simply being at the right place at the right time, or is it more than that? How does place, whether physical, social, or cultural, support, constrain, and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short, why there? Why then? *Places of Invention* frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History's Lemelson Center for the Study of Invention and Innovation. The book is built around six place case studies: Hartford, CT (late 1800s), Hollywood, CA (1930s), Medical Alley, MN (1950s), Bronx, NY (1970s), Silicon Valley, CA (1970s-1980s), and Fort Collins, CO (2010s). Interspersed with these case studies are dispatches from three learning labs detailing Smithsonian Affiliate museums' work using *Places of*

Invention as a model for documenting local invention and innovation Written by exhibition curators each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people ready resources and inspiring surroundings Like the locations it explores Places of Invention shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond
