Hofstetter, 2018-02-02 Border crossing in Education comprises a series of case studies covering a variety of cultural areas in order to reveal the density of connections and exchanges that inform educational practices policies and systems It attaches particular importance to individual and collective actors that govern these flows initiating promoting or reconfiguring

transfers of policy models The contributors explore various aspects of the circulatory mechanisms that have been deployed in the field of education during the modern and contemporary period Varying the observation scales from local to international they demonstrate the multilateral character of the circulatory dynamics observed The implementation of rich and varied approaches to these complex processes offers a perspective that complements and renews our knowledge of the genesis and evolution of educational policies and systems most notably highlighting their foreign inspirations However these studies do not merely evoke borrowings and hybridization as if national borders proved porous or non existent Instead they show that the phenomena of resistance reinterpretation and rejection are also an integral part of transnational mechanisms of exchanges The book thus demonstrates the relevance of a historical approach in addressing these transnational mechanisms in the field of education and childhood policy This book was originally published as a special issue of *Paedagogica Historica*
