Rousar, 2013-03-09 If you think about it all life drawing and painting is at some point being done from the artist's memory even if that memory is only a few seconds old Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas their visual memory is involved What if that artist's visual memory was highly trained That artist might need the model for a shorter period of time or she might have a more productive time when the model is in pose He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air Memory Drawing Perceptual Training and Recall exists to guide you in doing just that It will also help you improve your abilities to remember fleeting effects seize essentials and even enhance your imagination *Pencil Sketching* Thomas C.
